Creative Themes for Groupwork and Personal Development Susan Pinn-Atkinson, Jenny Woolloff, 2018-10-24 Based around thirty themes, this practical resource provides flexible and adaptable ideas for groupwork sessions. The themes in this book: can be adapted and developed to match the exact needs and interests of the participants; aim to generate and inspire group facilitators to think broadly and creatively, and to feel confident in using the culture and history of their geographical area to enrich the work they do with participants; enable participants to explore, develop and reflect upon their hidden, unidentified or unacknowledged strengths, transferable skills and knowledge; have a variety of alternative or additional ideas, and many are accompanied by worksheets; and include colour, television, soaps, touch, mirrors, maps, weather and many more.

Infranomics Adrian V. Gheorghe, Marcelo Masera, Polin papilinho F. Katina, 2013-12-03 This book provides a rough entry into the interdisciplinary field of Infranomics. It enables better decision making in an increasingly ambiguous, complex, emergent, interdependent, and uncertain world where we attempt to anticipate modern society trends and patterns in order to react appropriately. However, as with any emerging discipline, much research is needed at the applications and conceptual level. The applications level may require development and testing of methods, tools, and techniques to enable analysis and decision-making in ambiguous, complex, emergent, interdependent, and uncertain conditions while the conceptual level may require tapping into driving philosophies, theories, and methodologies that form the basis for Infranomics. Striking the right balance between applications and conceptual foundation (theory) requires rigorous research. This book provides a springboard for robust discussions on applications, theory, and transformation of current thinking to better deal with modern society's problematic issues using Infranomics.
