Berbagai masalah mayoritas dari BB Anda akan dikupas di sini meliputi lambatnya kinerja BB, maksimalkan BBM dengan membuat grup, mengatur nada dering grup supaya berbeda dengan dering SMS, email, dan juga Yahoo Messenger. Selain itu, BB Anda juga dapat dijadikan sebagai modem hanya dengan mengikuti 4 langkah mudah. Smart Economy in Smart African Cities Gora Mboup,Banji Oyelaran-Oyeyinka,2019-02-21 This book highlights the use of information and communication technology (ICT) infrastructures in order to develop smart cities and produce smart economies in Africa. It discusses a robust set of concepts, including smart planning, smart infrastructure development, smart economic development, smart environmental sustainability, smart social development, resilience, and smart peace and security in several African cities. By drawing on the accumulated knowledge on various conditions that make cities smart, green, livable and healthy, it helps in the planning, design and management of African urbanization. In turn, it fosters the development of e-commerce, e-education, e-governance, etc. The rapid development of ICT infrastructures facilitates the creation of smart economies in digitally served cities and towns through smart urban planning, smart infrastructures, smart land tenure and smart urban policies. In the long term, this can reduce emissions of CO2, promote the creation of low carbon cities, reduce land degradation and promote biodiversity.

Advancing Family Theories James M. White,2005 How can the study of families be scientific? What is the difference between postmodern and positivistic approaches? What is the role of models and metaphors in constructing our theoretical knowledge? In Advancing Family Theories, author James M. White addresses such difficult questions that have been longstanding issues within the field of family studies and examines these matters from a social science perspective. Advancing Family Theories explores two contemporary theories of the family-rational choice theory and transition theory. These diametrically different approaches illuminate what differing theories reveal about families. The book also discusses how meta-theories can assist in building and refining theory and offers insight on the understanding versus explanation debate. Advancing Family Theories gives students a precise notion of what a theory is and how theories work in research. The book not only looks at philosophical realms but also examines particular substantive theory to explain and predict family behaviors.

Mobilities, ICTs and Marginality in Africa Francis B. Nyamnjoh,Ingrid Brudvig,2016 Mobility has become a prominent feature in African societies. Populations all over Africa are both mobile and politically and economically marginal. Yet these populations are actively engaged in maintaining social networks across localities. Mobilities, ICTs and marginality in Africa looks at the dramatic changes brought about in socially marginal populations by new ICTs in general and mobile phones in particular. The book aims to situate the cultural, social and, in some cases, transnational context of ICT appropriation and virtual connectivity so as to reposition Africans from various countries and contexts as active agents of social change. The intricacies of local ICT use and the dynamics of mobility in the African context enables us to better understand material cultures, relationships between people, new media and social networking. Equally explored in relation to ICTs are the social and spatial dynamics of communication, association and belonging across spaces - particularly physical borders, social boundaries and confines and possibilities informed by the habits of bodies and practices. Mobilities, ICTs and marginality in Africa is rich in theoretically informed case studies that lend themselves to comparative perspectives and to ethnographies from beyond Africa.

Turing's Imitation Game Kevin Warwick,Huma Shah,2016-09-22 Can you tell the difference between talking to a human and talking to a machine? Or, is it possible to create a machine which is able to converse like a human? In fact, what is it that even makes us human? Turing's Imitation Game, commonly known as the Turing Test, is fundamental to the science of artificial intelligence. Involving an interrogator conversing with hidden identities, both human and machine, the test strikes at the heart of any questions about the capacity of machines to behave as humans. While this subject area

has shifted dramatically in the last few years, this book offers an up-to-date assessment of Turing's Imitation Game, its history, context and implications, all illustrated with practical Turing tests. The contemporary relevance of this topic and the strong emphasis on example transcripts makes this book an ideal companion for undergraduate courses in artificial intelligence, engineering or computer science.

Advances onto the Internet of Things Salvatore Gaglio, Giuseppe Lo Re, 2014-01-15 The title of this book is a pun on the use of the preposition “onto” with the aim of recalling “Ontology”, the term commonly adopted in the computer science community to indicate the study of the formal specification for organizing knowledge. In the field of knowledge engineering, Ontologies are used for modeling concepts and relationships on some domain. The year 2013 celebrates the twentieth anniversary of the World Wide Web. The simple network of hypermedia has transformed the world of communications with enormous implications on the social relationships. However, traditional World Wide Web is currently experiencing a challenging evolution toward the Internet of Things (IoT), today feasible thanks to the integration of pervasive technologies capable of sensing the environment. The most important contribution of IoT regards the possibility of enabling more efficient machine-to-machine cooperation. To such aim, ontologies represent the most suitable tool to enable transfer and comprehension of information among computer applications, even those designed and developed by unrelated people in different places. This book proposes a collection of contributions illustrating different applications following these directions and that are the outcomes of real experiences developed in the context of research projects.

Fit Doesn't Fit Nishtha Gehija, 2019-06-11 What if you have a dream career but your family has other plans for you? What if you didn't have heartbreak, you were rather thrown out of love in exactly same manner by two different people? What if you have best degree and a fab job, and still feel something is missing? What if, your bae was exactly like your parents? Most importantly, what if, someone sat with you to listen to every detail of your problem.....that's not all.....you just found new friends who support your journey without judgement. Saying I am happy thousand times does not work - if you're not!!! Welcome to the story of Aryan, Satya, Sid and Jen - four strangers whose lives appear perfect on the outside, and on the inside, it is anything but perfect. In a series of random events, they end up taking a journey together which lands them up to having their frustrations, pains, anger and hurts to be taken off from the roots, layer by layer. Picture this: You go to a trip with extreme strangers and when you least expected it, you are pleasantly shocked to know a professional will sit with you one-on-one for one whole day to talk about your life. Question is, what would your life look like after that?

Marriage and the Family David H. L. Olson, John D. DeFrain, 2000 This introduction to marriage and the family accentuates the positive aspects of relationships and focuses on enriching students' knowledge and experience in building strong, successful relationships. The authors, both seasoned family scholars and therapists, integrate research, theory, and practical application with an interdisciplinary perspective of marriage and family. Throughout the book, emphasis is placed on both the diversity of ethnic and cultural groups as well as the types of family structures and intimate relationships that are common today. A variety of personal assessments and end-of-chapter exercises are provided to increase student understanding of interpersonal relationships.
