The Snow Woman and Other Yokai Stories from Japan Noboru Wada,2024-04-16 An extraordinary collection of Japanese folk tales, many in English for the first time! This book contains 79 stories from the Japanese collection Tales from Shinshu, compiled and edited by award-winning author Noboru Wada. It features traditional tales of yokai, ghosts, mountain witches, demons and apparitions frequently sighted in and around the mountainous Shinshu region in central Japan, such as: The Legend of the Snow Woman: A beautiful woman appears at Minokichi's door one night in a snowstorm. They marry and live happily, until one day her terrible secret is revealed. Kappa Taro: A legendary yokai terrifies villagers by luring them into a pond, where they drown. Can Suwa Yorito, famed for his strength, successfully challenge this terrifying demon? The Yamamba Witch's Daughter: Who would ever dream of marrying a mountain witch? Can the Yamamba's daughter find the love and happiness she seeks? These stories have been passed down for generations from grandparents to their grandchildren, sitting around the hearth on cold and snowy winter nights. They are well-known throughout Japan and are believed by the inhabitants of Shinshu to have actually occurred in the distant past!

A History of Modern Chemistry Noboru Hirota,2016 This publication is a translation of the book entitled Gendai Kagakushi (A History of Modern Chemistry) published by Kyoto University Press in 2013.

Constructing Subjectivities Noboru Tomonari,2008 Constructing Subjectivities addresses the relationship between memory and modernity and its relevance to Japanese autobiographical texts. Tomonari construes autobiographies as embodying memory in modernity, and regards the conditions of modernity as having determined, in part, the shape of autobiographical texts. At the same time, however, he argues that Japanese autobiographies were not simply bound to the cultural and social norms of the time, but rather that the texts themselves were among the main agents of fostering Japanese modernity. The autobiographies he discusses served to initiate certain societal transitions and took part in the remaking of social norms and conventions. According to Constructing Subjectivities, mnemonic texts were crucial to the construction of modern ideological discourses such as those on the self, the family, entrepreneurship, the roles of women, and the nation. The study of this discursive process enables us to understand how the Japanese themselves tried to control the form of modernity that materialized in Japan. Because autobiography constructed and embodied collective memory at this time, analyzing the discursive process is also crucial to understanding both contemporary Japan and the self-perception of the Japanese people.

Between Frontiers Noboru Ishikawa,2010-03-15 A staple of postwar academic writing, “nationalism” is a contentious and often unanalyzed abstraction. It is generally treated as something “imagined,” “fashioned,” and “disseminated,” as an idea located in the mind, in printed matter, on maps, in symbols such as flags and anthems, and in collective memory. Between Frontiers restores the nation to the social field from which it has been abstracted by looking at how the concept shapes the existence of people in border zones, where they live between nations. Noboru Ishikawa grounds his discussion of border zones in materials gathered during two years of archival research and fieldwork relating to the boundary that separates Malaysian from Indonesian territory in western Borneo. His book considers how the state maintains its national space and how people strategically situate themselves by their community, nation, and ethnic group designated as national territory. Examining these issues in the context of concrete circumstances, where a village boundary coincides with a national border, allows him to delineate the dialectical relationship between nation-state and borderland society both as history and as process. Scholars across the humanities and social sciences will learn from this masterful linking of history and ethnography, and of macro and micro perspectives.

Knot Projections Noboru Ito, 2016-11-03 Knot Projections offers a comprehensive overview of the latest methods in the study of this branch of topology, based on current research inspired by Arnold's theory of plane curves, Viro's quantization of the Arnold invariant, and Vassiliev's theory of knots, among others. The presentation exploits the intuitiveness of knot projections to introduce the material to an audience without a prior background in topology, making the book suitable as a useful alternative to standard textbooks on the subject. However, the main aim is to serve as an introduction to an active research subject, and includes many open questions.
