Ubiquitous Musics Marta García Quiñones, Anahid Kassabian, Elena Boschi, 2016-02-17

Ubiquitous Musics offers a multidisciplinary approach to the pervasive presence of music in everyday life. The essays address a variety of situations in which music is present alongside other activities and does not demand focused attention from (sometimes involuntary) listeners. The contributors present different theoretical perspectives on the increasing ubiquity of music and its implications for the experience of listening. The collection consists of nine essays divided into three sections: Histories, Technologies, and Spaces. The first section addresses the historical origins of functional music and the debates on how reproduced music, including a wide range of styles and genres, spread so quickly across so many environments. The second section focuses on more contemporary sound technologies, including mobile phones in India, the role of visible playback technology in film, and listening to portable digital players. The final section reflects on settings such as malls, stores, gyms, offices and cars in which ubiquitous musics are often present, but rarely thought about. This last section - and ultimately the whole collection - seeks to foster a wider understanding of listening practices by lending a fresh, critical ear.

Web Information Systems Engineering -- WISE 2014 Boualem Benatallah, Azer

Bestavros, Yannis Manolopoulos, Athena Vakali, Yanchun Zhang, 2014-09-11 This book constitutes the proceedings of the 15th International Conference on Web Information Systems Engineering, WISE 2014, held in Thessaloniki, Greece, in October 2014. The 52 full papers, 16 short and 14 poster papers, presented in the two-volume proceedings LNCS 8786 and 8787 were carefully reviewed and selected from 196 submissions. They are organized in topical sections named: Web mining, modeling and classification; Web querying and searching; Web recommendation and personalization; semantic Web; social online networks; software architectures and platforms; Web technologies and frameworks; Web innovation and applications; and challenge.

Semantic Methods for Knowledge Management and Communication Radosław

Katarzyniak Katarzyniak, Tzu-Fu Chiu, Chao-Fu Hong, Ngoc-Thanh Nguyen, 2011-08-04 The book consists of 31 chapters in which the authors deal with multiple aspects of modeling, utilization and implementation of semantic methods for knowledge management and communication in the context of human centered computing. It is assumed that the modern human centered computing requires the intensive application of these methods as well as effective integration with multiple techniques of computational collective intelligence. The book is organized in four parts devoted to the presentation of utilization of knowledge processing in agent and multiagent systems, application of computational collective intelligence to knowledge management, models for collectives of intelligent agents, and models and environments tailored directly to human-centered computing. All chapters in the book discuss theoretical and practical issues related to various models and aspects of computational techniques for semantic methods, which are currently studied and developed in many academic and industry centers over the world. The editors hope that the book can be useful for graduate and PhD students of computer science, as well as for mature academics, researchers and practitioners interested in developing of modern methods for representation, processing and distribution of knowledge in the context of human centered computing and by means of computer based information systems. It is the hope of the editors that readers of this volume can find in all chosen chapters many inspiring ideas and influential practical examples, as well as use them in their current and future work.

While media buzz regularly circulates around iPhone and Android, Nokia still leads the pack in terms of world market share. Symbian, for instance, remains the most widely used mobile operating system. With Nokia's open development platform, the opportunities available for mobile developers to target this vastly popular operating system are abundant and clear. Use Qt to target both platforms: Symbian, the most widely used mobile operating system in the world, as well as MeeGo, the Intel/Nokia platform for mobile devices. Develop HTML5 applications for both Symbian and MeeGo platforms that will run with little modification on other mobile platforms. Novice developers learn the basics of Qt with a mobile slant, giving them the ability to target both desktop and mobile platforms.

The Nokia Revolution ,

The Nokia Revolution Dan Steinbock,2001 This potent study of breakthrough innovation and strategic transformation takes readers behind the scenes of the legendary, yet enigmatic, Nokia Corporation.

Winning Across Global Markets Dan Steinbock,2010-03-02 Lessons for attaining global competitiveness, one market at a time, from international business giant Nokia Winning Across Global Markets examines how 145-year-old Nokia grew from a paper mill in Finland to a multinational telecommunications leader. Why are Nokia's lessons critical for other companies and industries? While multinationals based in large countries benefit from inherent advantages--such as a home base that often accounts for 30 to 50 percent of their revenues--multinationals based in smaller countries such as Nokia, enjoy no such competitive edge. Nokia, in fact, generates less than 1% of its revenues in its home base. To such a company, global competitiveness is a matter of life and death. With unparalleled access to Nokia's leadership, Winning Across Global Markets reveals the remarkable story of Nokia's resilience and endurance. Shows how Nokia's flexibility and focus on its people and local markets drive its distinct global approach. Includes exclusive interviews with Nokia's senior executives and key partners Provides a roadmap for developing, capturing,

and sustaining global advantage This book provides a roadmap for developing, capturing, and sustaining strategic global advantage in today's ever-changing world.
