Derek Quilliam

Fishing in Pre-European New Zealand Foss Leach, 2006 This authoritative volume draws together a broad range of information about pre-European Maori fishing in a well illustrated and very readable form. The author uses identifications and measurements of fish remains from 126 archaeological sites covering the full time span of prehistoric New Zealand to describe the range of fish caught by pre-European Maori, explore variations between regions and through time, and examine the impact of Maori on the fishery. The archaeological information is placed in a series of wider contexts -the Pacific background to Maori fishing, the nature of the New Zealand fishery, climatic fluctuations during the last millennium, and the nutritional requirements of human diet and the role of marine food in it. The discussion of the technology and material culture of fishing breaks new ground in its treatment of cordage and knots, netting and fish hooks, canoe design, fish preservation and cooking methods. Research on fish behaviour towards hooks provides much needed insight into the reason why the rotating hook, so common amongst early Maori and other Pacific island peoples, was so successful. The author shows that pre-European Maori had a different approach to conservation of the marine environment than is currently employed in modern fisheries management and that claims of pre-European over-exploitation of snapper and other species are ill-founded. An especially important finding is that the average size of fish increased over time following the strategy of taking large numbers of what would now be considered under-sized fish. New Zealand had super-abundant fish stocks right up to the time of first European settlement, and all necessary marine food was obtained in shallow waters less than 100 m from the shore. Pre-European Maori fishermen in New Zealand are shown to have been extremely knowledgeable about all aspects of the New Zealand fishery.

2016 Solunar Fishing Calendar Julian Chitta, 2016-02-25 This booklet is conceived in the form of a calendar, and it is based on astronomical calculations for Moon phases. It selects the points at which the biological clock of the fish urges them to feed. It describes the popular types of fish found in the freshwater of the continental USA pointing to their behavior which can improve your catches. It does not teach you how to cook the fish you caught, but it explains what desirable attributes are there in their meat. It is a brief practical guide for better fishing.

Open Season Dave Witherow, 2014-10-03 A charming collection of fishing stories drawn from over 30 years of persistent pursuit of the elusive trout. Dave Witherow is an angler: an adventurous, risk-taking, articulate, passionate angler. He's spent the best part of his life fishing the rivers of New Zealand. He's also a story teller of rare talent. His stories are beautifully and hilariously imbued with the camaraderie of men, of fellow anglers, seeking a world away from domesticity and daily cares; 'getting away from it all' and finding their inner hunter-gatherers. Two-Pies, Kevin, Bubbles and others appear again and again, their characters and quirks masterfully portrayed - these are friends who for many years have fished some of the most remote areas of New Zealand. The author wore-out one small plane and built another in order to visit the more secluded river spots where one doesn't come across the 80 per cent of fishers, or the guides and the well-outfitted tourists disembarking a helicopter. His encounters and adventures are always highly entertaining, appealing and down-right hair-raising. Lyrical, erudite, ferociously astute, Witherow captures a New Zealand that few experience. Throughout, the penetrating, concise mind of the hunter, the grace of the fly-caster and the cool-headed approach to a river crossing are brilliantly balanced with the antics and utter joy of the author and his fishing mates. Open Season is the perfect book for the keen angler, the armchair traveller and the many tourists who venture to New Zealand just for the season.

Top Catch John Eichelsheim, 2010-08-13 Popular fishing writer John Eichelsheim spills the beans on how and where to catch the best examples of New Zealand's top fish species. John draws on his own forty years of experience fishing around the country to tell personal stories of his own 'top catch' for each species, then provides biological/ geographical information on the fish, the nuts and bolts of tackle and technique, including the peak season, and the current records (biggest fish ever caught etc). The author has chosen species with appeal for anglers in both main islands and has chosen those that are accessible to the average angler as well as some more 'aspirational' species that need to be caught with specialist gear:, including snapper, kingfish, salmon, trout (rainbow/brown), gurnard, tarakihi, blue cod, john dory, tuna, marlin, shark and hapuku. It's both a practical guide and a celebration of our top fish species, full of great yarns and useful information.
