Innovative Internet Secrets Doug Knell, 2018-01-11 There are so many secrets packed in here, I have to wonder if the Illuminati will have this author assassinated - Derrick Mennings, Marxist Internet Weekly Digest Written by an engineering expert with comprehensive knowledge of SEO marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: Basic competence is good enough for me. Why would I want or need to do more than that? You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at

Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Every single one of these internet secrets will shoot your internet productivity into the stratosphere and leave you head and shoulders above your peers. We're not naive to think you don't know any of these secrets, but we're confident you don't know about most of them. Any of these 100+ internet insights will more than make up for the book's cost

- * Keep your computer and other devices protected: the best anti-virus & malware tools internet tools you should install to keep your computer, mobile phone, and tablet from being crippled.
- * Set up sharable internet networks wherever you happen to be, like standing in front of Buckingham Palace.
- * Start building your favorite link bookmarks across all internet browsers and platforms.
- * Avoid internet scams.
- * Download and view internet videos offline. Video streaming sucks bandwidth from your 4G plan.
- * Keep your identity safe.
- * Transfer large files.
- * Set up online music libraries so you can listen to your music anywhere, anytime.
- * Shop on the internet for the absolute best prices.
- * View web sites optimally on any

device. * Remember your passwords for any site and situation. * And much, much more. Some of these internet secrets you could discover if you knew where to look, but it would take you months to collect the same knowledge you'll find here. Other internet tools we've picked up from years of experience. You won't find those gems anywhere else. Dump your other SEO books and for-idiots web development guides. You will not find another internet book this practical or enjoyable for any price. The new internet isn't going anywhere, but you should. Let's get going, with us as your guide along this infinitely more diverse Information Superhighway.

Computer Comprehensive Companion Doug Knell, 2018-01-09 This book almost saved my last couple of marriages - Andrew McBain, Computer Hacker Intl Written by an idiot savant who became acquainted with these secrets during a pseudo-religious experience! Preview the book and be saved. Holy Mackerel! My Desktop Computer PC System Just Crashed. What The \$@)*%# Should I Do? An Apple a day may keep the doctor away, but what happens if you have a Windows PC and no computer science degree? The Computer Comprehensive Companion contains over 100 powerful tricks to broaden your computer knowledge, any single one when applied which will save you countless heartaches, money, and time, possibly a marriage. You've seen the encyclopedia-like Windows reference guides for dummies. Who the f-k reads those? You're no geek! What you need is a concise, entertaining, life-changing book to learn about computers that will finally put you in charge of your PC. Your Computer PC is

the most important tool on your desktop. Should you remain completely ignorant about something that important? According to PC Magazine, 65% of Americans spend more time with their computer than they do with their spouse. In another magazine article, over 7 in 10 Americans claim they're more dependent on their PC than they were three years ago. For a machine you're so dependent on, don't you think it'd be prudent to better learn how computers work? Ignore another snoozefest book on software or hardware you'll quickly forget. The Computer Comprehensive Companion is packed with just the sort of computer knowledge, well beyond stuff only for dummies, that every Windows PC user needs. BE ABLE TO: * Salvage your system or at least minimize damage. By following the computer knowledge in this book before this painful day arrives, you should be reaching for a gin & tonic and not a shotgun. * Select the right warranty. * Recover accidentally deleted or corrupted files. * Keep your PC protected with optimal computer security science. * Speed up your Windows PC. * Perform backups. * Convert your files into universal file formats for sharing. * Get rid of hard-to-delete files. * View internet video offline on any device. * Convert video so it plays anywhere. * Build your dream song libraries. * Uninstall Windows software the right way. * Choose the ideal software without having to consult another book! * Use the proper computer science security diagnostic tools to monitor your PC's 'cholesterol.' * Compare different PC's for your next purchase. * Make the best decision on which software upgrades to book. * Monitor the children so

they can't abuse the internet and computer's DVD player 24/7. * And much more. You want to know the problems with those other books that try to teach you how computers work? You surely know some since, in the past, you must have bought a number of these cumbersome paperweights posing as a software book. Let me remind you of just two. First, those other books are written in boring techno-geek. They might be packed with some knowledge to learn about computers, but that doesn't do you a whole lot of good when you can't stay awake past the first chapter. You don't have to worry about that here. And second, those other techno geek books focus only on Windows for dummies tricks. What you need to know about Windows is given its due, but the title of this easy-to-understand book is not the Windows Comprehensive Companion. Put into practice just a handful of the computer knowledge you'll be taught, and we're positive you'll consider this book one of the best educational investments you've ever made. This is a companion who will never let you down!

 (Noah = N ; Ruth = R) N: Ruth! Are you OK? Are you hurt? R: Yeah, I'm OK, but
 I'll have a sore arm tomorrow. N: That big bully really gave you a hard time.
 R: I told her to leave me alone, but she wouldn't listen. N: Why didn't you
 just walk away? R: I tried, but she grabbed my arm. Hey, why didn't you do
 anything to stop it? N: I couldn't. I was afraid, and I didn't want the bully
 to get me, too. R: I understand. Next time, go get a teacher to help. Part A

 Part B: Indirect Bullying Noah stops Ruth

 answers to the big science test? R: What are you talking about? N: Sheila
 said that you found them on the teacher's desk and took them. R: I did not!
 Sheila's always telling lies about me. I lost a few friends because of her.
 N: What did you do about that? R: I asked her nicely to stop, but she just
 laughed at me. N: Did you try telling a teacher? Maybe they can help. R: Yes,
 many times, but they can't do anything without proof. Part B

Part C: Cyberbullying Noah shows Ruth something on his cell phone. (Noah = N ; Ruth = R) N: Wow! You look really fat in this photo. When was that? R: Oh, no! Not again. That photo is a fake! I already asked that person to take the photo down. N: Well, they didn't. What are you going to do? R: I'm going to tell the social media site about them. Part C
