Olympic Airways Graham M. Simons, 2019-07-30 "Readers with an interest in the early days of organized civil mass air transport will enjoy having a familiar story be retold from a Greek perspective." —SpeedReaders The Olympic Airways story has fascinated Graham M. Simons for many years. This new book represents the culmination of decades spent researching the history of this fascinating Greek airline. It is a story of evolution, conflict, personality and politics, all set against a backdrop of world and civil wars, coups and countercoups. During the course of his research, it became apparent to the author that many of the fine details pertaining to the company weren't widely known, although almost everyone had heard of the towering, controversial, leading figurehead who oversaw much of the central part of the story: Aristotle Socrates Onassis. His colorful life is threaded through this history, lending it drama and multiple levels of intrigue. The airline's story cannot be told in isolation. Olympic did not spring fully formed into being in 1957. The named company may have come into being then, but its roots were set much further back in history through a number of predecessor airlines—both national and international—who had been using the Hellenic Republic and Athína as the crossroads of the air for the Eastern Mediterranean since the dawn of aviation. This is the story of the birth and dramatic life of an airline with a checkered, controversial and complicated history. Graham M. Simons has skillfully woven all the various threads to create a powerful and important historic record.

AIR CRASH INVESTIGATIONS, FLYING COFFIN? The Near Crash of Olympic Airlines Flight OA202 Pete Collins, editor, 2012-07-01 The Lockheed 1011 registered A6-BSM, operated by Star Jet and chartered by Olympic Airlines, arrived on 4 July 2005 at Terminal 1 at Paris Charles de Gaulle airport. Departure was delayed because the forward hold door could not be closed. A mechanic tried to close the door manually with a hammer and a chuck. Some passengers, worried about the apparent state of the cabin and the noise, asked to disembark, and this led to a mass movement. The airplane took finally off at 16h17. Shortly after departure the crew noticed problems with engine number 3. The captain requested the SEVERE DAMAGE procedure and returned to the airport. The French Bureau d'Enqu tes et d'Analyses pour la s curit de l'aviation civile (BEA) investigated the incident. BEA found out that the aircraft suffered from many problems, such as leaking fuel, malfunctioning safety features and lacking maintenance. The flight crew was not properly licensed, the captain was too old to fly in Europe. The Lockheed Tristar was a flying coffin.

**The Business of Olympic Games Sponsorship** Nelly Kapsi, Eleni Beneki, 2004 Business and the Olympic Games have always maintained close ties. The book takes a historic look at the relationship the business community and the Olympic Games have maintained from ancient times until today. The Games' financial figures, the marketing program, the protection of the Olympic symbol, opportunistic marketing, broadcasting rights and online promotion, are examined. The authors make a first attempt at assessing the Olympic Games' impact on the country's key economic sectors.

**Beyond Open Skies** Brian F. Havel, 2009-01-01 'Beyond Open Skies' offers a systematic comparative analysis of the legal and policy dimensions of airline deregulation by federal fiat in the United States and by supranational collaboration in the European Union. The book draws upon a variety of sources, including very recent developments in U.S. and EC international aviation law, policy, and diplomacy, to propose a genuine multilateral air transport system. It examines the potential of the 'open skies' initiative, in the aftermath of the new U.S./EC air transport agreement, to inspire a genuine globalization of the world's air transport industry in such crucial aspects as the following: cabotage; ownership and citizenship requirements; route selection; airline identity; capacity; pricing regimes; competition and public aid; regulatory harmonization; labor laws; provisions for charter and/or cargo transportation; fair operation of and access to computer reservations systems; authorization of code-sharing arrangements; alliances and antitrust immunity; and dispute resolution.

**Global Airlines** Pat Hanlon, 2006-12-14 Global Airlines: Competition in a Transnational Industry presents an overview of the changing scene in air transport covering current issues such as security, no frills airlines, 'open skies' agreements, the outcome of the recent downturn in economic activity and the emergence of transnational airlines, and takes a forward looking view of these challenges for the industry. Since the publication of the second edition in 1999 major changes have occurred in the industry. The 'rules of the game' in air transport are now beginning to change; and it is time to take the story forward. This third edition contains nine new chapters and tackles the following issues amongst others: \* Security: The tragic events of 11 September 2001, followed by the war in Iraq, and the resultant heightened tensions over security and passenger safety. \* Financial instability: the cyclical downturn in economic activity has led some airlines to the verge of bankruptcy. Even some large well-established carriers are not immune from this. How can the industry look to survive? \* Attaining global reach: implications of transborder mergers, open skies agreements and the transatlantic Common Aviation area. Can full globalisation ever be reached? \* Low-cost carriers and e-commerce: as both increase, how much the industry re-structure and deal with issues associated with increased passenger traffic and decreased labour requirements? \* Airport capacity: Air traffic is estimated to grow at a long-term average annual rate of 5 per cent per annum. But many airports in many parts of the world are already reaching their capacity limits. How can this be overcome and are the environmental implications? Using up to date data and case studies from major international airlines such as United Airlines, British Airways, and Qantas amongst many others, Global Airlines provides a comprehensive insight into today's global airline industry.

**Airline Finance** Peter S. Morrell, 2007 Revised and updated in its third edition, this internationally renowned and respected book provides the essentials to understanding all areas of airline finance. Designed to address each of the distinct areas of financial management in an air transport industry context, it also shows how these fit together, while each chapter and topic provides a detailed resource which can be also consulted separately. Thoroughly amended and updated throughout, the third edition reflects the many developments that have affected the industry since 2001. It features several important new topics, including Low Cost Carriers (LCCs), fuel hedging and US Chapter 11 provisions.

Droit Des Aides D'etat Dans la CE Francisco Santaolalla Gadea, 2008-01-01 A uniquely important contribution to the debate on EC State aid, this book captures the direct knowledge and experience of twenty-six current and former Commission State aid litigators, offering detailed 'insider' analysis of EC State aid court cases, as well as related internal legal issues, between 1994 and 2008. The book brings together both legal and economic analysis, with detailed reflections on aspects of both substantive legal rules and procedural law. It also offers, over and above the specific interest of the contributions it contains, invaluable insights into the working methods of the Commission Legal Service. This collaborative work was conceived and realized by its authors as a mark of recognition, and a gesture of respect and friendship, for Francisco Santaolalla, on the occasion of his retirement from the Commission after fourteen years' service as Director of the State aid team. Among the many legal and economic forces affecting State aid litigation, the authors focus on such factors as the following: A {exports; A {private investment; A {role of economic analysis; A {ecotaxes; A {privatization; A {remedies; A {existing aid; A {third parties; A {actions against State aid decisions; A {national court decisions; A {fiscal discipline; and A {WTO subsidies law. In illuminating the underlying issues, and describing how they are handled by the Commission Legal Service, the authors shed light on the likely future development of State aid law. The book will be of particular interest to antitrust practitioners as well as academics

*Flying Off Course* Rigas Doganis, 2009-12-18 The airline industry presents an enigma. High growth rates in recent decades have produced only marginal profitability. This book sets out to explain, in clear and simple terms, why this should be so. It provides a unique insight into the economics and marketing of international airlines. Flying Off Course has established itself over the years as the

indispensable guide to the inner workings of this exciting industry. This enlarged fourth edition, largely re-written and completely updated, takes into account the sweeping changes which have affected airlines in recent years. It includes much new material on many key topics such as airline costs, 'open skies', air cargo economics, charters and new trends in airline pricing. It also contains two exciting new chapters on the economics of the low-cost no frills carriers and on the future prospects of the industry. The book provides a practical insight into key aspects of airline operations, planning and marketing within the conceptual framework of economics. It is given added force by the author's hands-on former experiences as a Chairman and CEO of Olympic Airways and as a non-executive Director of South African Airways while he is currently a non-executive Director of easyJet.

**The future of BAA** Great Britain: Parliament: House of Commons: Transport Committee, 2008-03-14 BAA Limited owns and operates seven UK airports: Heathrow, Gatwick, Stansted, Southampton, Glasgow, Edinburgh and Aberdeen. They handle nearly 150 million passengers a year, and are a vital part of the country's transport infrastructure. In the light of the Office of Fair Trading's referral of BAA to the Competition Commission, to investigate whether BAA's market position was limiting competition in the UK aviation sector, the Committee set up its own inquiry. It particularly wanted to consider: the regulatory framework; the quality of service provided; the size and quality of investment; any consequences following the acquisition of BAA by Ferrovial; the implications of further runway and terminal capacity; how more competition could be introduced into the market. The Committee concludes that the drawbacks of common ownership outweigh the advantages, and identifies a problem with service quality. It believes that increased competition is possible, and hopes the Competition Commission will ensure a healthy, competitive airport sector for the future.

**Controlled Crash** Eldon Brown, 2009-10 Pilots like to say that every safe landing is really just a controlled crash. In this witty and entertaining memoir of his airline career, Eldon Brown whisks us back to the heyday of the airline industry, when it was fun to fly and

salesmanship was a creative art. During his decades in cargo management with airlines like Japan and Northwest, Brown crosses paths with a surprising array of life forms: wily entrepreneurs, stowaway cockroaches, and, yes, a drunken bear. Along the way, there are challenges to be met with pluck and imagination. For example, he conducts reconnaissance missions (when his 007 persona springs to the fore). He arranges flights for fauna like eels, ostriches, tuna, and the Dallas Cowboys. He also has to learn to accommodate his relaxed American style to the rigidity of a Japanese managerial culture, to stay true to American values in places where less rigorous ethical standards are the norm, and to deal with such worrisome passengers as a tipsy senator, Dr. Timothy Leary, and an escaped mental patient. Through it all, Brown's common sense and sly humor prevail, making this book a fine and fun read.
