Solving The Equation of Love: A Manic Imagination [Equation Of Humanity Book 1] Eric J. Chou, 2023-08-25 This book is the 1st compendium of my life story and work. I have lived experience of bipolar 1, and a vision disability, and that informs everything I've done. Looking back at the past decade of my life, and all I've accomplished to date, I can see it all in perfect focus, and I can see the guiding will of God moving through my life, bringing me through my relationships, and setting me on the paths I've not just walked, but the paths I've paved. I've organized and build communities 150+ members strong I've built a company and game project off of the fuel of passion alone. I've not just influenced but have literally saved lives. I've done research summarizing and highlighting my findings, so others can carry on the legacy of Honor I've started The journey has been long, and it's been hard, but as I write this, I'm beginning a new chapter of my life, and I couldn't be humbler and prouder. This book includes all the people, communities and projects I care about, and what has shaped me into the man, leader, and founder I am today. I hope this lived experience of Bipolar 1 helps break the stigma shrouding mental health, both in general, and specifically in the creative industries I've been privileged to be a part of. I wish to continue a dialog on these subjects, and show that Mental health issues are indeed double-edged swords that are core to who we are. This book contains select documents of

snap shots in time of my Tiberium Secrets mod, a passion project that looks to the future of the Command & Conquer video game franchise. This book contains a new theory and model of mental health that is called "The PPF Model" = The Past Present and Future model, which aims to ground mental health discussions in common understandable terms. Thanks to all the unsung heroes in my life, I would not be who I am without all of you. It's time for a new challenge. The Future is Bright!

Mediated Campaigns and Populism in Europe Susana Salgado,2018-12-07 This book analyses the coverage of elections that occurred between September 2015 and February 2016 in six European countries (Greece, Portugal, Poland, Croatia, Spain and Ireland). The sample examined includes all news stories published during the official electoral campaign in different types of media outlets: three newspapers per country covering centre-left and centre-right wing political leaning, as well as reference and tabloid papers; three main television news broadcasts covering commercial/private and public broadcast television channels; and three papers that are published only online, taking into account their levels of audience and importance within each national media and political system. The book also examines different connections to the EU and to the Euro Crisis. Questions such as the following guide the overall analysis: In what ways is news election coverage similar and different in these countries? Which issues are mostly covered by the news media and how? Are there patterns of election news coverage in these six European countries? This book is indispensable reading for researchers and students in the field of the media coverage of election campaigns, political communication and populism. Chapters 4 and 8 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

From Warsaw with Love John Pomfret,2021-10-26 From

Warsaw with Love is the epic story of how Polish intelligence officers forged an alliance with the CIA in the twilight of the Cold War, told by the award-winning author John Pomfret. Spanning decades and continents, from the battlefields of the Balkans to secret nuclear research labs in Iran and embassy grounds in North Korea, this saga begins in 1990. As the United States cobbles together a coalition to undo Saddam Hussein's invasion of Kuwait, six US officers are trapped in Iraq with intelligence that could ruin Operation Desert Storm if it is obtained by the brutal Iraqi dictator. Desperate, the CIA asks Poland, a longtime Cold War foe famed for its excellent spies, for help. Just months after the Polish people voted in their first democratic election since the 1930s, the young Solidarity government in Warsaw sends a veteran ex-Communist spy who'd battled the West for decades to rescue the six Americans. John Pomfret's gripping account of the 1990 cliffhanger in Iraq is just the beginning of the tale about intelligence cooperation between Poland and the United States, cooperation that one CIA director would later describe as "one of the two foremost intelligence relationships that the United States has ever had." Pomfret uncovers new details about the CIA's black site program that held suspected terrorists in Poland after 9/11 as well as the role of Polish spies in the hunt for Osama bin Laden. In the tradition of the most memorable works on espionage, Pomfret's book tells a distressing and disquieting tale of moral ambiguity in which right and wrong, black and white, are not conveniently distinguishable. As the United States teeters on the edge of a new cold war with Russia and China, Pomfret explores how these little-known events serve as a reminder of the importance of alliances in a dangerous world.

Computational Collective Intelligence. Semantic Web, Social Networks and Multiagent Systems Ryszard Kowalczyk, 2009-10-04
Computational collective intelligence (CCI) is most often understood as a subfield of artificial intelligence (AI) dealing with soft computing methods that enable group decisions to be made or knowledge to be processed among autonomous units acting in distributed environments. The needs for CCI techniques and tools have grown significantly recently as many information systems work in distributed environments and use distributed resources. Web-based systems, social networks and multi-agent systems very often need these tools for working out consistent knowledge states, resolving conflicts and making decisions. Therefore, CCI is of great importance for today's and future distributed systems. Methodological, theoretical and practical aspects of computational collective intelligence, such as group decision making, collective action coordination, and knowledge integration, are considered as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., can support human and other collective intelligence and create new forms of CCI in natural and/or artificial systems.
