Disruptive Business Mr Alexander Manu,2012-09-28 *Disruptive Business* is a provocative and insightful redefinition of innovation as an outcome of human behaviour, a dynamic in constant change requiring the shaping of new responses in business and the economy. Alexander Manu believes that organizations must treat innovation not as a process to be managed but as an outcome that changes people's lives. In *Disruptive Business* he explains how innovation is the moment when human behaviour is changed by a particular invention, discovery or event. This position challenges the current understanding of innovation, as well as the current ecology in which innovation operates in organizations: its management, methods, tools, language, focus and metrics. The challenge extends to some of the labels currently applied to innovation typologies, such as 'disruptive innovation', seen today as addressing purely the technological side of an invention, rather than the more complex motivational and behavioural side. Alexander Manu considers that a disruption is not manifest in the moment a new technology is introduced. The disruption is the human being and manifest only when human motivation embraces the technology and uses it to modify and improve everyday life. Our acceptance and appropriation of new technologies creates the business disruption. Manu makes the case that successful innovation outcomes are answers to conscious or subconscious goals residing in human motivation, and motivation starts in desire. This position is consistent with the history of innovations that have changed, improved and reshaped human life, and also consistent with their roots and ethos. Humans are a 'perpetually wanting animal', bound to desire, to seek media for a better self and to need innovation. In this dynamic, innovation is the constant and business is the variable. The role of business is to create the tools, objects and services through which people can manifest what they want and who they are. The book provides a new perspective of current behavioural disruptions which are relevant to the continuity of business, as well as a set of practical methodologies for business design, aimed at creating innovation outcomes of value to users.

In addition to the main entries and reviews, a full-color gallery provides a visual timeline of gaming through the decades, and several appendices help to place nearly 3,000 games in context. A Theory of Adaptation Linda Hutcheon,2012-08-21 *A Theory of Adaptation* explores the continuous development of creative adaptation, and argues that the practice of adapting is central to the story-telling imagination. Linda Hutcheon develops a theory of adaptation through a range of media, from film and opera, to video games, pop music and theme parks, analysing the breadth, scope and creative possibilities within each. This new edition is supplemented by a new preface from the author, discussing both new adaptive forms/platforms and recent critical developments in the study of adaptation. It also features an illuminating new epilogue from Siobhan O'Flynn, focusing on adaptation in the context of digital media. She considers the impact of transmedia practices and properties on the form and practice of adaptation, as well as studying the extension of game narrative across media platforms, fan-based adaptation (from Twitter and Facebook to home movies), and the adaptation of books to digital formats. *A Theory of Adaptation* is the ideal guide to this ever evolving field of study and is essential reading for anyone interested in adaptation in the context of literary
