**The Teen Code** Rhett Godfrey, 2004-05-07 How is a parent to know what to say—and when and how to say it—when talking to teens about all those big, scary topics that are tough to discuss? In researching this book for the past 3 years, 17-year-old Rhett Godfrey interviewed hundreds of teenagers about how their parents talk to them about the big stuff: sex, drugs, privacy, school problems, cigarettes and alcohol, divorce and remarriage and self-expression. Now Rhett reports back—in frank and surprising conversations—how teens really feel about these touchy subjects. What's more, he shares the best methods that parents have used to open up dialogue behind closed doors. Rhett's mother, #1 New York Times bestselling author Neale S. Godfrey (*Money Doesn't Grow on Trees*), then helps parents make sense out of what teens say they want from parents—from her own experience as well as from interviews with experts. In the first book to ever take us inside the teen mind to help us understand these topics their point of view, parents will discover how to establish an environment of honesty and open dialogue in their homes so they can better guide their kids through the rocky road of adolescence by understanding: – Why teenagers think oral sex isn't really sex and alcohol is not a drug. And how to convince them otherwise. – How to correct the most common mistake parents make in talking with their kids about drugs. Hint: It involves the phrase You aren't doing drugs, are you? – How to still be on good terms with your son after his mohawk grows out and piercings close.

*How to Raise a Drug-Free Kid* Joseph A. Califano, 2014-09-09 The highly acclaimed comprehensive guide to getting your child through the formative pre-teen, teen, and college years drug-free—now completely revised and updated. Nearly every child will be offered drugs or alcohol before graduating high school, and excessive drinking is common at most colleges. But the good news is that a child who gets to age twenty-one without smoking, using illegal drugs, or abusing alcohol or prescription drugs is virtually certain never to do so. Drawing on more than two decades of research at The National Center on Addiction and Substance Abuse at Columbia University (CASAColumbia), founder Joseph A. Califano, Jr., presents a clear, common-sense guide to helping kids stay drug-free. All parents dream of a healthy, productive, and fulfilling future for their children; Califano shows which specific actions work and what parents can do to teach, protect, and empower their children to have the greatest chance of making that future come true. Teenagers who learn about the risks of drugs from their parents are twice as likely never to try them, and this book provides the tools parents need to prepare their children for those crucial decision-making moments. In this revised and updated edition, Califano tackles some of the newest obstacles standing between our kids and a drug-free life—from social media sites and cell phone apps to the explosion in prescription and over-the-counter drug abuse and the increased dangers and addictive power of marijuana. He reveals what teens can't or won't tell their parents about their thoughts on drugs and alcohol, and combines the latest research with his discussions with thousands of parents and teens about the challenges that widespread access to drugs and alcohol present, and how parents can instill in their teens the will and skills to choose not to use. Califano's insightful and lively guide is as readable as it is informative.

**Opioids** National Institutes Of Health,National Institute on Drug Abuse,2020-03-03 You have probably heard a lot about the opioid crisis in the news lately. But what are opioids, and what do they have to do with you as the parent of a teenager? If your child has had a sports injury, dental work, or surgery, it is possible that he or she was prescribed a pain reliever that contained an opioid. Opioids can be very effective at reducing severe pain in the short term, such as after surgery, but they can be very addictive, especially if they are misused. Children and adolescents are at greater risk than adults of becoming addicted when exposed to drugs. Particularly when used in treating children or adolescents, opioids should only be taken to manage severe pain, when no other pain medicine works, and for the shortest time necessary - and most importantly, only while under the careful watch of a trained health care provider. In addition to opioids prescribed for treating pain, there are powerful opioids sold on the street and used solely to get high, including heroin and illicit fentanyl. These are also highly addictive. All opioids - particularly when misused to get high, when combined with other drugs like alcohol or tranquilizers, or when used for pain without proper medical supervision - can result in deadly overdoses. While opioid misuse in teens has been going down, the rate of opioid misuse increases significantly after the age of 18, so it is critical to talk with teens early and frequently to protect them from experimenting with opioids as they transition into adulthood. Talking to your kids about drugs may not be easy, but it is important. Here at the National Institute on Drug Abuse (NIDA), we developed this guide to help parents talk with their kids. We also have a companion book, Opioid Facts for Teens, that you can share. Sometimes, just beginning the conversation is the hardest part.

Organized by age group, from preschool through young adulthood, the handy 100 tips will show parents how to help their children to: Feel good about themselves without an artificial high.
