Routledge Encyclopedia of Translation Technology Sin-Wai Chan,2014-11-13 The Routledge Encyclopedia of Translation Technology provides a state-of-the art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

Left of Boom Douglas Laux,Ralph Pezzullo,2017-04-25 Left of Boom is the explosive New York Times bestselling memoir by a young CIA operative on the front lines in Afghanistan. On September 11, 2001, Douglas Laux was a freshman in college, on the path to becoming a doctor. But with the fall of the Twin Towers came a turning point in his life. After graduating he joined the Central Intelligence Agency, determined to get himself to Afghanistan and into the center of the action. Through persistence and hard work he was fast-tracked to a clandestine operations position overseas. Dropped into a remote region of Afghanistan, he received his baptism by fire. Frustrated by bureaucratic red tape, a widespread lack of knowledge of the local customs and culture and an attitude of complacency that hindered his ability to combat the local Taliban, Doug confounded his peers by dressing like a native and mastering the local dialect, making contact and building sources within several deadly terrorist networks. His new approach resulted in unprecedented successes for the CIA, including the uncovering the largest IED network in the world, responsible for killing hundreds of US soldiers. Meanwhile, Doug had to keep up false pretenses with his family, girlfriend and friends--nobody could know what he did for a living--and deal with the emotional turbulence of constantly living a lie. His double life was building to an explosive resolution, with repercussions that would have far reaching consequences. Left of Boom tells his story.
