*Mobile Technologies for Every Library* Ann Whitney Gleason, 2015-03-19 If you are wondering what mobile technology adoption means for your library or how to get started, *Mobile Technologies for Every Library* will answer your questions! This book will detail the opportunities and pitfalls in using mobile technology in libraries.

*Corpora in Translation and Contrastive Research in the Digital Age* Julia Lavid-López, Carmen Maíz-Arévalo, Juan Rafael Zamorano-Mansilla, 2021-12-15 Corpus-based contrastive and translation research are areas that keep evolving in the digital age, as the range of new corpus resources and tools expands, opening up to different approaches and application contexts. The current book contains a selection of papers which focus on corpora and translation research in the digital age, outlining some recent advances and explorations. After an introductory chapter which outlines language technologies applied to translation and interpreting with a view to identifying challenges and research opportunities, the first part of the book is devoted to current advances in the creation of new parallel corpora for under-researched areas, the development of tools to manage parallel corpora or as an alternative to parallel corpora, and new methodologies to improve existing translation memory systems. The contributions in the second part of the book address a number of cutting-edge linguistic issues in the area of contrastive discourse studies and translation analysis on the basis of comparable and parallel corpora in several languages such as

English, German, Swedish, French, Italian, Spanish, Portuguese and Turkish, thus showcasing the richness of the linguistic diversity carried out in these recent investigations. Given the multiplicity of topics, methodologies and languages studied in the different chapters, the book will be of interest to a wide audience working in the fields of translation studies, contrastive linguistics and the automatic processing of language.

**Interpreting and technology** Claudio

Fantinuoli, 2018-12-15 Unlike other professions, the impact of information and communication technology on interpreting has been moderate so far. However, recent advances in the areas of remote, computer-assisted, and, most recently, machine interpreting, are gaining the interest of both researchers and practitioners. This volume aims at exploring key issues, approaches and challenges to the interplay of interpreting and technology, an area that is still underrepresented in the field of Interpreting Studies. The contributions to this volume cover topics in the area of computer-assisted and remote interpreting, both in the conference as well as in the court setting, and report on experimental studies.

*Trends in E-Tools and Resources for Translators and Interpreters*, 2017-12-11 Trends in E-Tools and Resources for Translators and Interpreters offers a collection of contributions from key players in the field of translation and interpreting that accurately outline some of the most cutting-edge technologies in this field.

*Human Issues in Translation Technology* Dorothy Kenny, 2017-01-12 Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users – as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from ‘traditional’ translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators – in various contexts and with widely differing profiles – use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and psychological, and with empirical evidence of what the technologization of the workplace means to translators, *Human Issues in Translation Technology* is key reading for all those involved in translation and technology, translation theory and translation research methods.

## **ROUTLEDGE ENCYCLOPEDIA OF INTERPRETING STUDIES**

Franz Pochhammer, 2015-09-25 The Routledge Encyclopedia of Interpreting Studies is the authoritative reference for anyone with an academic or professional interest in interpreting. Drawing on the expertise of an international team of specialist contributors, this single-volume reference presents the state of the art in interpreting studies in a much more fine-grained matrix of entries than has ever been seen before. For the first time all key issues and concepts in interpreting studies are brought together and covered systematically and in a structured and accessible format. With all entries alphabetically arranged, extensively cross-referenced and including suggestions for further reading, this text combines clarity with scholarly accuracy and depth, defining and discussing key terms in context to ensure maximum understanding and ease of use. Practical and unique, this Encyclopedia of Interpreting Studies presents a genuinely comprehensive overview of the fast growing and increasingly diverse field of interpreting studies.

**Evaluation of Translation Technology** Walter Daelemans, Véronique Hoste, 2010 This collection of scholarly articles asks the question How useful is translation technology? Pointing to the need for a widely used and reliable way to test the efficiency of language translation programs, the presenters show that commercial tools such as translation memories and translation workbenches are popular, and their developers find them useful in terms of productivity, consistency, or quality.

However, these claims are rarely proven using objective comparative studies, and this group describes several new statistical approaches to more rigorous evaluation methods. -- Product Description.

**Making Way in Corpus-based Interpreting Studies** Mariachiara Russo, Claudio Bendazzoli, Bart Defrancq, 2017-10-24 This book presents a

collection of state-of-the-art work in corpus-based interpreting studies, highlighting international research on the properties of interpreted speech, based on naturalistic interpreting data. Interpreting research has long been hampered by the lack of naturalistic data that would allow researchers to make empirically valid generalizations about interpreting. The researchers who present their work here have played a pioneering role in the compilation of interpreting data and in the exploitation of that data. The collection focuses on both of these aspects, including a detailed overview of interpreting corpora, a collective paper on the way forward in corpus compilation and several studies on interpreted speech in diverse language pairs and interpreter-mediated settings, based on existing corpora.

Breaking Ground in Corpus-based Interpreting Studies Francesco Straniero Sergio, Caterina Falbo, 2012 This book focuses on interpretation corpora which is one of the major subjects of research in interpreting studies. It explores key issues such as corpus design and representativeness, as well as aims and challenges of the application of corpus-linguistics principles and methods to interpreting. Interpreting corpora represent a real challenge because of the very nature of the items they are composed of. The oral dimension, the unavoidable stage of transcription and the difficulties in relying on authentic data are only some of the aspects that make the creation of interpreting corpora a complex, challenging and time-consuming

activity. The book discusses the theoretical problems and presents the working phases leading to the collection of five different interpreting corpora. The variety of approaches adopted by each research team highlights the fact that aims, interrogation methods and corpus design are intertwined. A survey of the studies carried out so far using these five interpreting corpora identifies data comparability as the core issue of corpus-based interpreting studies.

Corpus-based Approaches to Translation and Interpreting Gloria Corpas Pastor, Miriam Seghiri, 2016 This volume represents a collection of theoretical and application-orientated contributions which report advances in corpus-based translation and interpreting studies. The theoretical papers reflect the development of the discipline. The applied studies discuss recent results in different areas such as training, practice and the use of CAT tools

**Translation-mediated Communication in a Digital World** Minako O'Hagan, David Ashworth, 2002-05-03 The Internet is accelerating globalization by exposing organizations and individuals to global audiences. This in turn is driving teletranslation and teleinterpretation, new types of multilingual support, which are functional in digital communications environments. The book describes teletranslation and teleinterpretation by exploring a number of key emerging contexts for language professionals.

**Translation Technology and Its Teaching** Anthony Pym, Alexander Perekrstenko, Bram Starink, 2006

**Amnesia Road** Luke Stegemann, 2021-03-01 'At both

ends of the world, I have found confusion and profound disagreement about how to read the story of the past, about who should write or speak it, and what parts of it should be written or spoken about at all.' *Amnesia Road* is a compelling literary examination of historic violence in rural areas of Australia and Spain. It is also an unashamed celebration of the beautiful landscapes where this violence has been carried out.

Travelling and writing across two locations – the seldom-visited mulga plains of south-west Queensland and the backroads of rural Andalusia – award-winning Australian Hispanist Luke Stegemann uncovers neglected history and its many neglected victims, and asks what place such forgotten people have in contemporary debates around history, nationality, guilt and identity. 'This book will come to be regarded as a classic of Australian literature.' – Nicolas Rothwell 'Daring and original: an eloquent and moving meditation on place, memory and history.' – Mark McKenna

'*Amnesia Road* swept me away in lyrical storytelling, though veiled inside is a brutally complex shared history exposing the deliberate annihilation of the relationship between landscapes and their kin. Stegemann has lifted the dark shadowy veil of this denial, invisibility and silence to shift the direction of historical redemptive memory so the action of healing can begin.' – Brook Andrew 'Luke Stegemann explores with extraordinary tenderness and understanding the aftermaths of the frontier massacres in Australia and the atrocities of civil war Spain. He offers new insights about amnesia and the

forgetting of the violent past and sets a roadmap to acknowledge and come to terms with the past. A brilliant achievement.' – Lyndall Ryan 'In this absorbing meditation on spectacular beauty and unfathomable cruelty, Luke Stegemann seamlessly joins his passionate love of two soils, Queensland in Australia and Andalusia in Spain. Amnesia Road displays that combination of warm empathy and cool appraisal essential in the best kind of history.' – Frank Bongiorno 'By turns beautiful and shocking, Stegemann's book reflects with a coolly objective, emotionally spare voice on the murderous pasts of Andalusia and south-west Queensland. Amnesia Road probes, with sharp intelligence, what history looks like when it can't be remembered and what it means to remember the otherwise forgotten dead.' – Francis O'Gorman, Saintsbury Professor of English Literature, University of Edinburgh

*Interdisciplinarity in Translation and Interpreting Process Research* Maureen Ehrensberger-Dow, Susanne Göpferich, Sharon O'Brien, 2015-06-15 First published as a special issue of *Target* (issue 25:1, 2013), this volume explores interdisciplinarity in translation and interpreting process research, fields that have enjoyed a boom in the last decade. For this reason, the time was ripe for a reflection on the broad range of methodologies that have been applied in our endeavours to understand both translation and interpreting processes better. The ten chapters provide a snapshot of how translation and interpreting process researchers have availed themselves of concepts and theories developed in

other disciplines, such as psychology, the cognitive sciences, journalism, and literary studies, to examine and illuminate their object of study. This collection demonstrates that translation and interpreting process research borrow heavily from other disciplines and call for a consideration of how translation research can become truly interdisciplinary through increased collaboration, synergy, and mutual advancement.

Basic Concepts and Models for Interpreter and Translator Training Daniel Gile, 1995 This book is based on the author's many years of experience as a practitioner, teacher and researcher in translation and conference interpreting. It is written for I/T trainers who are in search of a methodological basis for their teaching program. The author deals with essential translation and interpretation phenomena and difficulties encountered by students and professionals alike. The underlying theory is based on insights from psycholinguistics, cognitive psychology and I/T research. The 'concepts' and 'models' are easy to understand and the chapters include teaching suggestions and examples. Suitable for I/T trainers and practitioners.

**Conference Interpreting** Valerie Taylor-Bouladon, 2007 This book is now in its Third Edition having recently been revised and updated. It is also available as an e-Book (Kindle). It has been described by Sherrill J. Bell, Executive Director of NAATI at the time of its first publication, as one of the most significant contributions to the field of interpreting and translating in Australia in the past decade. It

represents the only major publication in Australia on this specific aspect of interpreting in recent years. As such, it provides an all-encompassing reference work for prospective conference interpreters, for conference organisers, for interpreting and translation educators and for individuals generally interested in the profession. The book is written in a very free style that clearly reflects the enthusiasm and vibrancy of the author. Its content is informative and practical, often based on scientific principles, while at the same time interspersed with humour and fascinating anecdotes. The book has the remarkable quality of conveying serious and important concepts in a format that is user-friendly and enjoyable to read. In summary, Conference Interpreting is a most significant contribution to the field of interpreting in Australia and internationally. It should be required reading for all those involved with the profession. It begins with the history of interpreting in Europe and Australia, then looks at how it is done today, and what lies ahead. The different modes of interpretation are explained; there are tips for beginners such as how to overcome stage fright, what to do if you miss something, booth behaviour and microphone manners, how to become a graceful scapegoat, economise your voice and make delegates laugh as well as how to deal with Australianisms. A chapter is devoted to conference organisers, another to protocol and etiquette, after-dinner speeches and press conferences, as well as the duties, responsibilities and ethics of the profession, how

to improve your performance, working for radio and television and the special requirements, gravity and complexity of court interpreting. The bodies that make up UN and EU are detailed and the languages used. Finally a comprehensive bibliography is given with suggestions for further reading. This book is intended to help language students, would-be interpreters, conference organizers and delegates as well as those who have studied interpretation techniques but lack booth experience and are reluctant to launch themselves into this challenging but satisfying, stimulating, even exhilarating, profession. It is not about the theory of interpretation but rather a 'hands-on' manuel explaining how simultaneous interpretation works, how it is done, the pitfalls to avoid, which languages are most in demand and where.
