The activities start with the consonant letters and their sounds, then progress to vowel sounds, consonant blends, the hard and soft sounds of certain letters, digraphs, diphthongs, and other aspects of phonics. Many of the worksheets engage children in creating new words and using them in context. The words are age-appropriate and the reading selections have been created using the Spache Readability Formula. How To Teach Phonics Janice Porter,2019-09-23 Why Phonics? Phonics is the MAGIC KEY that unlocks and opens the door to the wonderful world of Reading. Learning to read by Phonics is merely converting the letters of our English-speaking alphabet into their respective sounds. Phonics is the natural and logical way to learn to read.Phonics is the Science of sounds as it applies to letters or groups of letters called phonograms. Since words form from the sounds the letters make, we teach the sounds first- and not the names of the alphabet letters in the beginning (but teach in a later lesson). This gets him on the Reading road quickly, rather than bogging him down for months with alphabet instruction. Without the use of Phonics, the love of Reading is undeveloped, comprehension misunderstood, vocabulary limited, and Spelling difficult.With Phonics, children from Kindergarten-age to adults in business have learned to read, spell, and write without having to memorize hundreds- if not thousands of words. Once learning the sounds is under way, students are reading words, and shortly after that, complete sentences. But what sets this phonics program apart from others, is that words are taught in 'Families', include Reading 'Rules', and exceptions to those rules. Reading and Spelling taught apart from word families leave the student confused over many words that sound alike but are spelled differently. How to Teach Phonics (by this author) is such a book that will give the best foundation for Reading and Spelling. I cannot stress enough the importance of teaching words in their own families.

Phonics First! Wilma H. Miller,2001-03-15 This book of activities gives children practice in learning the various sounds of the alphabet, helping them decode new words as well as build on their knowledge of previously learned words. The activities cover a wide array of topics, including consonant blends and digraphs, vowels, rhyming words, homophones, silent letters, prefixes, suffixes, root words, plurals, syllables, and more. Many of the worksheets engage children in thinking out new words and putting them in sentence context. Others ask students to select a correct answer from several choices. Some have students working with a partner or using a dictionary to create word lists not found on the worksheet. The words are age-appropriate and the reading selections have been created using the Spache Readability Formula. These activities can be used in any reading program with children of all ability levels. They provide the extra practice that most children need as they continue to master intermediate reading skills.
