Radio Fields Lucas Bessire,2012-11-19 Radio is the most widespread electronic medium in the world today. As a form of technology that is both durable and relatively cheap, radio remains central to the everyday lives of billions of people around the globe. It is used as a call for prayer in Argentina and Appalachia, to organize political protest in Mexico and Libya, and for wartime communication in Iraq and Afghanistan. In urban centers it is played constantly in shopping malls, waiting rooms, and classrooms. Yet despite its omnipresence, it remains the media form least studied by anthropologists. Radio Fields employs ethnographic methods to reveal the diverse domains in which radio is imagined, deployed, and understood. Drawing on research from six continents, the volume demonstrates how the particular capacities and practices of radio provide singular insight into diverse social worlds, ranging from aboriginal Australia to urban Zambia. Together, the contributors address how radio creates distinct possibilities for rethinking such fundamental concepts as culture, communication, community, and collective agency.

Reality Radio John Biewen,Alexa Dilworth,2010-03-15 Over the last few decades, the radio documentary has developed into a strikingly vibrant form of creative expression. Millions of listeners hear arresting, intimate storytelling from an ever-widening array of producers on programs including This American Life, StoryCorps, and Radio Lab; online through such sites as Transom, the Public Radio Exchange, Hearing Voices, and Soundprint; and through a growing collection of podcasts. Reality Radio celebrates today's best audio documentary work by bringing together some of the most influential and innovative practitioners from the United States, Canada, the United Kingdom, and Australia. In these nineteen essays, documentary artists tell--and demonstrate, through stories and transcripts--how they make radio the way they do, and why. Whether the contributors to the volume call themselves journalists, storytellers, even audio artists--and although their essays are just as diverse in content and approach--all use sound to tell true stories, artfully. Border Radio Gene Fowler,Bill Crawford,2010-06-28 “Border Radio tells the 50,000-watt clear-channel story of the most outrageous and audacious phenomenon to ever hit the airwaves.”—Los Angeles Times Before the Internet brought the world together, there was border radio. These mega-watt “border blaster” stations, set up just across the Mexican border to evade U.S. regulations, beamed programming across the United States and as far away as South America, Japan, and Western Europe. This book traces the eventful history of border radio from its founding in the 1930s by “goat-gland doctor” J. R. Brinkley to the glory days of Wolfman Jack in the 1960s. Along the way, it shows how border broadcasters pioneered direct sales advertising, helped prove the power of electronic media as a political tool, aided in spreading the popularity of country music, rhythm and blues, and rock, and laid the foundations for today’s electronic church. The authors have revised the text to include even more first-hand information and a larger selection of photographs. “The magic of [a] wildly colorful chapter in broadcast history lives on in this entertainingly informative look at the forces and the people who contributed to the rise of the medium.”—Chicago Tribune “Characters like Wolfman Jack, Reverend Ike, Norman Baker, “Dr.” J. R. Brinkley, Pappy O’Daniel and others were master showmen and tremendously successful salesmen. Secret-formula medicines, magic prayer cloths, Crazy Water Crystals, and goat-gland rejuvenations are just part of this often hilarious telling of this outrageous period in broadcast history.”—Variety “If you’re wondering where Herbalife, Home Shopping Network, No-Money-Down Seminars, and Jim and Tammy Bakker found their inspiration and techniques, look no further than this superb book.”—Dallas Morning News

Radio in the Movies Laurence Etling,,Frank Barnas,Marie Barnas,2023-10-27 This richly detailed examination of two forms of American entertainment focuses on the various ways that radio stations and air personalities have been depicted in motion pictures, from 1926's The Radio Detective to more recent films like 2022's Halloween Ends. Newly updated and revised chapters cover the cinematic portrayals of various aspects of radio, including disc jockeys, sports broadcasts, religious programs and abnormal personalities on the air. Such films as The Big Broadcast (1932), Reveille with Beverly (1943), Mister Rock and Roll (1957), WUSA (1970), Radio Days (1987), Private Parts (1997), We Are Marshall (2006) and Straight Outta Compton (2015) provide fascinating insights into not only their own times but also the historical eras that some of these films have attempted to recreate.

Big Podcast – Grow Your Podcast Audience, Build Listener Loyalty, and Get Everybody Talking About Your Show David Hooper,2019-03-12 Is it worth doing a podcast if nobody listens? You started your podcast because you want to: - Spread an important message - Share your passion - Make money But your podcast hasn’t quite taken off like you thought it would. What happened? This book is for podcasters who can’t quite figure out what they’re doing wrong (and are ready to do things right). You’ll learn: - Why your “natural personality” may be repelling to people and how to make it attract listeners to your podcast like a magnet (See p198) - What to do when a company tries to “lowball” you on advertising fees (do nothing, except send them the email on p424) - It’s easy to screw up an interview. To be sure you don’t run into any problems, use my “guest contract” on p311. - A six-word “trick” (learned from a 20-year radio veteran) that will instantly make you a better host (it’s on p210) - 9 reasons to kill an interview before it happens – ignore these “red flags” and you’ll be sorry

(p299) - What Victoria’s Secret models know about podcasting (even though you never hear them talk) – this lesson starts on p208! - Nervous on the mic? You have lots of company – 75% of podcasters to be exact. I give you a 5-step way to cure your “stage fright” on p229. - If you’re scared of getting bad reviews, don’t worry – I have three simple ways to handle critics on p236 (two of which can turn critics into fans) - Why copying top podcasters may be killing your podcast (I share the story on p116) and how to develop a podcasting style that works for you (and will attract more listeners) - My 3-step “episode teaser” formula – it’s boring, but it works (get it on p110) - Thinking of doing a “daily” podcast? You must read p103 before you start. - Want to impress a guest? See the chapter starting on p321 for my 3-step followup “ritual” that will make being on your podcast unforgettable (and encourage guests to promote your episodes) And that’s just the start ... This book contains my complete system on how to attract listeners, deliver your message effectively, and build a big podcast. You can't build a big podcast on hope. But you can build a big podcast. And if you’re ready to do just that, read this book.

Radio Active Kathleen M. Newman,2004-05-17 Radio Active tells the story of how radio listeners at the American mid-century were active in their listening practices. While cultural historians have seen this period as one of failed reform—focusing on the failure of activists to win significant changes for commercial radio—Kathy M. Newman argues that the 1930s witnessed the emergence of a symbiotic relationship between advertising and activism. Advertising helped to kindle the consumer activism of union members affiliated with the CIO, middle-class club women, and working-class housewives. Once provoked, these activists became determined to influence—and in some cases eliminate—radio advertising. As one example of how radio consumption was an active rather than a passive process, Newman cites The Hucksters, Frederick Wakeman's 1946 radio spoof that skewered eccentric sponsors, neurotic account executives, and grating radio jingles. The book sold over 700,000 copies in its first six months and convinced broadcast executives that Americans were unhappy with radio advertising. The Hucksters left its mark on the radio age, showing that radio could inspire collective action and not just passive conformity.

The Radio Right Paul Matzko,2020 By the early 1960s, and for the first time in history, most Americans across the nation could tune their radio to a station that aired conservative programming from dawn to dusk. People listened to these shows in remarkable numbers; for example, the broadcaster with the largest listening audience, Carl McIntire, had a weekly audience of twenty million, or one in nine American households. For sake of comparison, that is a higher percentage of the country than would listen to conservative talk radio host Rush Limbaugh forty years later. As this Radio Right phenomenon grew, President John F. Kennedy responded with the most successful government censorship campaign of the last half century. Taking the advice of union leader Walter Reuther, the Kennedy administration used the Internal Revenue Service and the Federal Communications Commission to pressure stations into dropping conservative programs. This book reveals the growing power of the Radio Right through the eyes of its opponents using confidential reports, internal correspondence, and Oval Office tape recordings. With the help of other liberal organizations, including the Democratic National Committee and the National Council of Churches, the censorship campaign muted the Radio Right. But by the late 1970s, technological innovations and regulatory changes fueled a resurgence in conservative broadcasting. A new generation of conservative broadcasters, from Pat Robertson to Ronald Reagan, harnessed the power of conservative mass media and transformed the political landscape of America--
