Flash .NET Gerald YardFace,David Neal,Pallav
Nadhani,Graeme Bull,Chris Bizzell,2013-12-14 The
absolute cutting edge for application development
at the moment is using Macromedia's Flash MX (the
premier software for designing fantastic looking
interfaces) with Microsoft's .NET framework
(tremendously powerful server-side technology).
Combining these technologies has been greatly
aided by the release of Macromedia's Flash
Remoting MX, which is covered fully in this book.
Designers and developers involved in the creation
of this technology impart their knowledge to you
in this book through extensive case studies. Flash
Remoting is not the only way to combine these
technologies, however, so this book will fully
cover Flash/.NET integration using ASP.NET. This
book is for readers who are looking to integrate
their Flash movies with a .NET-enabled back-end.
It assumes no prior knowledge of server-side
technologies, but does require knowledge of Flash
MX and ActionScript.

Inside NAND Flash Memories Rino Micheloni, Luca Crippa, Alessia Marelli, 2010-07-27 Digital photography, MP3, digital video, etc. make extensive use of NAND-based Flash cards as storage media. To realize how much NAND Flash memories pervade every aspect of our life, just imagine how our recent habits would change if the NAND memories suddenly disappeared. To take a picture it would be necessary to find a film (as well as a traditional camera...), disks or even magnetic tapes would be used to record a video or to listen a song, and a cellular phone would return to be a simple mean of communication rather than a multimedia console. The development of NAND Flash memories will not be set down on the mere evolution of personal entertainment systems since a new killer application can trigger a further success: the replacement of Hard Disk Drives (HDDs) with Solid State Drives (SSDs). SSD is made up by a microcontroller and several NANDs. As NAND is the technology driver for IC circuits, Flash designers and technologists have to deal with a lot of challenges. Therefore, SSD (system) developers must understand Flash technology in order to exploit its benefits and countermeasure its weaknesses. *Inside NAND Flash Memories* is a comprehensive guide of the NAND world: from circuits design (analog and digital) to Flash reliability (including radiation effects), from

testing issues to high-performance (DDR) interface, from error correction codes to NAND applications like Flash cards and SSDs.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and

connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Changed in a Flash Elizabeth G. Krohn, Jeffrey J. Kripal, 2018-10-23 A fascinating first-hand account of an awakening into a psychic consciousness, paired with a revolutionary analysis by a respected professor of religion When Elizabeth Greenfield Krohn got out of her car with her two young sons in the parking lot of her synagogue on a late afternoon in September 1988, she couldn't have anticipated she would within seconds be struck by lightning and have a near-death experience. She felt herself transported to a garden and engaging in a revelatory conversation with a spiritual being. When she recovered, her most fundamental understandings of what the world is and how it works had been completely transformed. She was "changed in a flash," suddenly able to interact with those who had died and have prescient dreams predicting news events. She came to believe that some early traumatic and abusive experiences had played a part in preparing her for this experience. Told in matter-of-fact language, the first half of this book is the story of Krohn's journey, and the second is an

interpretation and analysis by respected professor of religion Jeffrey J. Kripal. He places Krohn's experience in the context of religious traditions and proposes the groundbreaking idea that we are shaping our own experiences in the future by how we engage with near-death experiences in the present. *Changed in a Flash* is not about proving a story, but about carving out space for serious discussion of this phenomenon.

Talk to Me Like I'm Someone You Love Nancy

Dreyfus, Psy.D., 2009-12-24 "The most crucial relationship advice book since *Men Are from Mars*."—Erin Meanley, *Glamour.com* A groundbreaking, interactive relationship tool that literally places in the hands of couples the power to transform chronically frustrating relationship dynamics. We've all been there. A conversation with a loved one escalates into conflict. Voices

rise to a fever pitch and angry, accusative words fly through the air. At times like these, it seems impossible to find the magic words that will lead to healing. Enter *Talk to Me Like I'm Someone You Love*. A psychotherapist with decades of experience in counseling couples, Nancy Dreyfus hit upon the revolutionary practice outlined in this book during a couples-therapy session in which a wife's unrelenting criticism of her husband was causing him to become emotionally withdrawn. In the midst of this, Dreyfus found herself scribbling on a scrap of paper, "Talk to me like I'm someone you love," and gestured to the husband that he should hold it up. He did and within seconds the familiar power differential between the two shifted, and a gentler, more genuine connection emerged. Dreyfus was startled, then intrigued, and then motivated to create a tool that could help others. This book features more than one hundred of Dreyfus's flash cards for real life, written statements that express what we wish we could communicate to the person we love, but either can't find the right words or the right tone in which to say it. The statements include:

- Taking responsibility: I realize I'm overreacting. Can you give me a minute to get sane again?
- Apologizing: I know I've really hurt you. What can I do to help you trust me again?
- Loving: You are precious, and I get that I haven't been treating you like you are.

A one-of-a-kind, practical relationship tool, *Talk to Me Like I'm Someone You Love* will help couples to stop arguing and begin healing.

Einstein Never Used Flash Cards Kathy Hirsh-Pasek, Roberta Michnick Golinkoff, Diane Eyer, 2004-08-12 Now Available in Paperback! In **Einstein Never Used Flashcards** highly credentialed child psychologists, Kathy Hirsh-Pasek, Ph.D., and Roberta Michnick Golinkoff, Ph.D., with Diane Eyer, Ph.D., offer a compelling indictment of the growing trend toward accelerated learning. It's a message that stressed-out parents are craving to hear: Letting tots learn through play is not only okay-it's better than drilling academics! Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, and addressing the key areas of development-math, reading, verbal communication, science, self-awareness, and social skills-the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun--yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.
