Sicilian Dragon Bill Harvey, Robert Gamble, 2017-05-05 It is more fruitful to study the tactics of an opening you might encounter as White or Black than to study the knight fork, pin or skewer, one tactic at a time. When the type of tactic is provided with the puzzle, it is already half solved. Study the more common tactics found within an opening you face and you will come away with an

understanding of the real dynamics of the opening and pick up tactics you can already use. The Dragon is a rich opening with sacrifices, counter-sacrifices and 'do or die' pawn storms - lots of tactics you would see nowhere else. What's more, nearly half of its games are decided in the first 30 moves, so if one falls behind in this opening, there is usually a swift conclusion. Here are nearly 550 chess puzzles to illuminate the Dragon.

Dragon Puzzle Games Marcus White, 2018-09-30 Dragon is a logic puzzle published by Nikoli. A grid is divided into rectangular and square regions. Some of the cells in the grid are numbered. The aim is to blacken some cells of a grid according to the following rules: - Cells with numbers are always white. - A number in a cell indicates how many black cells must be placed adjacent to its four sides. However, in each region there is one (and only one) wrong number (it shows a wrong amount of black cells). - Two black cells must not be orthogonally adjacent. - All of the white cells must be connected.

The Little Giant Encyclopedia of Logic Puzzles Norman D. Willis, 2000 Have fun while you expand your powers of deductive reasoning! Every one of these puzzles calls for conclusions based only on the information provided; the answers don't depend on previous knowledge, memory, wordplay, or deception--just a logical mind. Accept the alternatives that lead to the correct response and discard all faulty assumptions until you've arrived at the only possibility that makes sense. There are eight kinds of puzzle, and in most cases diagrams help organize your results. Here's one example: A supermarket theft has occurred. Someone took a fully loaded cart without paying for the groceries. One of the three suspects is guilty--but which one? The guilty party's statement is true; the other two are false. Who is guilty? A. B took the cart loaded with groceries B. A's statement is true C. A's statement is false Answer: C is the guilty party.
