QR Codes in Education David Hopkins, 2013-05 These black and white squares have appeared everywhere from billboards at the side of the road, roof tops, cola cans, buses, magazines, etc. So why not in your library, textbook, assignment, project, or classroom display? The ability to use them to direct students or colleagues to online resources (presentation slides, websites, video, book location, etc.) is powerful and engaging and, when well implemented, can offer a level of interaction and engagement. It's not about what they are but about how we use them and what they can offer me in an educational setting. Whether you're a teacher, student, parent, school governor, or on the PTA, you ought to know about QR Codes – what they are, how they work, and how you can leverage them to increase student participation in and around the classroom. They offer the ability to share digital content from teacher to student, from student to student, and even from student to teacher. Go on, try it! This eBook will explain everything and put QR Codes in context. Using computers and technology in educational environments can be exciting and challenging. Implementing QR Codes within your student's learning is just that: exciting to see how students of all ages use and interact with them, and a challenge to make them usable, informative, applicable, and appropriate. This book draws on established examples from the commercial and corporate world as well as from established users of QR Codes at all levels of education; from primary schools up to Universities. Not only will you find examples of how QR Codes have been used but you will find out how you can design, create, and implement your own QR Code treasure hunt, library resource, student group work, orientation activity, conference or event feedback, etc. David Hopkins has developed a respected reputation among educational technology networks for his use and research into the uses of QR Codes. He has been active with QR Codes at Bournemouth University and more recently at the University of Leicester since 2008. This book draws on David's QR Code experience with poster projects, classroom activities, and workshops and delivers these through a practical and up to date guide. "What are people saying about QR Codes in Education?" All you ever wanted to know about using QR codes in Education is in this eBook. It takes you from the very basics of what these delightful square barcodes are, how to view the information they link to, how to easily create your own and, most importantly, a vast array of ideas on why you would want to use them! Whilst not a newcomer to QR codes, I came away from reading inspired and with new ideas of how QR codes could be used to enhance learning and teaching." - Sue Beckingham (@suebecks), Educational Developer, Sheffield Hallam University "The information is concise and user-friendly. The 'Planning, Creating, and Monitoring your QR Codes' chapter offers everything you need to get going with QR codes. Because of David's extensive experience,

you won't have to learn the hard way. He's made it easy. The book is well-balanced, but keep in mind - David's examples and suggestions for using QR Codes in Education are very persuasive.”- Brian Bishop (@bbishop262), CEO, Virtualwurks “David's book is a great place to begin for those educators who wish to start using QR codes in their classroom. The book begins by explaining what QR codes are and then delves into examples of use in education and Libraries. A veritable treasure trove of inspiration, the book should be read for this alone [chapter: QR Codes in the classroom] and I will be definitely trying some out.”Julian Wood (@ideas\_factory), Sheffield Primary School Future Learning Technologist

The Ground I Stand on is Not My Ground Collier Nogues, 2015 Poetry. Art. THE GROUND I STAND ON IS NOT MY GROUND, selected by Forrest Gander as the winner of Drunken Boat's 2014 poetry book contest, is a hybrid of poetry and digital art. The poems erase historical documents related to the development and aftermath of the Pacific War, especially on the island of Okinawa. Erased into poems, these texts become spare narratives of how individual soldiers' and civilians' daily lives were transformed by the war. Using QR codes, each poem links to an interactive version at the book's companion website, where readers can explore original documents ranging from government documents and political manifestos to travel narratives, blockbuster adventure fiction, and science writing. Taken together, the poems and their original texts tell a larger story about the ways we imagine war, and the ways language can be used to record, justify, memorialize, or resist it. This is the best book of erasure poems since Srikanth Reddy's Voyager. Nogues carves critical observations into slow motion (erasure isolating and elongating time) so that we seem to see inside the body's gestures. The book is an intense meditation on war, riddled with aporia and drawing on many resources documentary, epistolary, and even rhyming lyric- to create an empathic and deeply affecting experience of contact with the devastation war brings and with the pain about to come. Forrest Gander Collier Nogues is nothing short of brilliant in this necessary book, which lights up a long shadow two big governments have cast on a miraculous island and an indigenous people. Nogues comprehends how any war is a continuum of the same hell, yet each experience is specific: the chronic trauma of surviving amid the dead, the way history makes a war a narrative but the participants (victims/survivors/casualties) experience it only in fragments. The speakers of these poems are visionary; they are one of us. And if we can see that, we can see what Nogues has envisioned here, see how our world can change in the direction of mercy, human dignity, survival. Brenda Shaughnessy Collier Nogues, who grew up on a U.S. military base in Okinawa, explores how war has shaped the island of her childhood. Taken together, these poems not only express a desire to erase violence, but they also attempt to map the topography of islands and nations, caves and embrasures, weapons and flags, grace and dread. Nogues is a brave poet who disassembles the official discourses of empire to articulate a dream for an island of peace. Craig Santos Perez

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2008-07-14 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings

you have in your hands. An impressive group of experts agreed to organize “Special Thematic Sessions” (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the me- ing into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the - portance of giving access to ICT and AT at a global level. In another keynote by H- old Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.
