State-Owned Enterprises and Corruption What Are the Risks and What Can Be Done?

OECD,2018-08-27 Corruption is the antithesis of good governance, and it is a direct threat to the purpose of state ownership. This report brings a comprehensive set of facts and figures to the discussion about the corruption risks facing state-owned enterprises (SOEs).

Alternative and Unconventional Energy Sources

Anurodh M. Dayal,2024-01-12 A timely volume for understanding our future energy landscape and for creating a bridge towards a decarbonized energy system Alternative and Unconventional Energy Sources discusses various alternative energy sources and their present usage, including wind, solar, ocean, and geothermal energy, along with unconventional fossil energy sources, such as shale gas. The text covers the development and global adoption of each energy source, along with their environmental and economic impacts, resulting in a comprehensive and in-depth treatment of the subject. This approach provides the reader with a one-stop reference for each particular energy source, making the information accessible to all, regardless of discipline or current level of experience with each energy source. Specific topics covered in Alternative and Unconventional Energy Sources include: The controversial perception of shale gas and its future potential as an energy source Technologies to reduce harmful emissions of CO₂ and other waste gases and their potential to cause less global warming Downsides of commonly accepted alternative energy sources, such as the disposal of nuclear waste and land requirements for solar panels How undeveloped countries can make use of local energy

sources to become more efficient and competitive. *Alternative and Unconventional Energy Sources* is a highly accessible and useful resource for geographers, geologists, petroleum engineers, renewable energy specialists, and policy makers who wish to understand the current state of global energy production and where the industry may turn in the coming years.

Emerging Trends in Computing and Expert

Technology D. Jude Hemanth,V. D. Ambeth Kumar,S. Malathi,Oscar Castillo,Bogdan Patrut,2019-11-07 This book presents high-quality research papers that demonstrate how emerging technologies in the field of intelligent systems can be used to effectively meet global needs. Networks Sanjeev Goyal,2023-04-18 An accessible and comprehensive overview of the economic theory and the realities of networks written by a pioneering economics researcher. Networks are everywhere: the infrastructure that brings water into our homes, the social networks made up of our friends and families, the supply chains connecting cities, people, and goods. These interconnections contain economic trade-offs: for example, should an airline operate direct flights between cities or route all its flights through a hub? Viewing networks through an economics lens, this textbook considers the costs and benefits that govern their formation and functioning. Networks are central to an understanding of the production, consumption, and information that lie at the heart of economic activity. Sanjeev Goyal provides advanced undergraduate and graduate students with an accessible and comprehensive introduction to the economics research on networks of the past twenty-five years. Each chapter introduces a

theoretical model illustrated with the help of case studies and formal proofs. After introducing the theoretical concepts, Goyal examines economic networks, including infrastructure, security, market power, and financial networks. He then covers social networks, with chapters on coordinating activity, communication and learning, information networks, epidemics, and impersonal markets. Finally, Goyal locates social and economic networks in a broader context covering networked markets, economic development, trust, and group networks in their relation to markets and the state. First textbook to provide a broad and comprehensive overview of twenty-first-century economic theory of networks Features engaging case studies and accessible exercises Written by a pioneering economics researcher

Transportation Systems Sarbjeet Singh,Alberto

Martinetti,Arnab Majumdar,Leo A. M. van

Dongen,2019-08-20 This book explores the application of breakthrough technologies to improve transportation performance. Transportation systems represent the “blood vessels” of a society, in which people and goods travel. They also influence people’s lives and affect the liveability and sustainability of our cities. The book shows how emergent technologies are able to monitor the condition of the structure in real time in order to schedule the right moment for maintenance activities an so reduce the disturbance to users. This book is a valuable resource for those involved in research and development in this field. Part I discusses the context of transportation systems,

highlighting the major issues and challenges, the importance of understating human factors that could affect the maintenance operations and the main goals in terms of safety standards. Part II focuses on process-oriented innovations in transportation systems; this section stresses the importance of including design parameters in the planning, offering a comparison between risk-based and condition-based maintenance and, lastly, showing applications of emergent technologies. Part III goes on to reflect on the technical-oriented innovations, discussing the importance of studying the physical phenomena that are behind transportation system failures and problems. It then introduces the general trend of collecting and analyzing big data using real-world cases to evaluate the positive and negative aspects of adopting extensive smart sensors for gathering information on the health of the assets. The last part (IV) explores cultural and behavioural changes, and new knowledge management methods, proposing novel forms of maintenance and vocational training, and introduces the need for radical new visions in transportation for managing unexpected events. The continuous evolution of maintenance fields suggests that this compendium of “state-of-the-art” applications will not be the only one; the authors are planning a collection of cutting-edge examples of transportation systems that can assist researchers and practitioners as well as students in the process of understanding the complex and multidisciplinary environment of maintenance engineering applied to the transport sector.

Amsterdam Travel Guide 2024 T Turner, The Amsterdam Travel Guide is the most up-to-date, reliable and complete guide to this wonderful city. Travelers will find everything they need for an unforgettable visit presented in a convenient and easy-to-use format. Includes quick

information on planning a visit, navigating the city, experiencing Dutch culture and exploring the beauty of Amsterdam. Also includes a Dutch phrasebook to help you communicate with the locals. Amsterdam is the Netherlands' capital, known for its artistic heritage, elaborate canal system and narrow houses with gabled facades, legacies of the city's 17th-century Golden Age. Its Museum District houses the Van Gogh Museum, works by Rembrandt and Vermeer at the Rijksmuseum, and modern art at the Stedelijk. Cycling is key to the city's character, and there are numerous bike paths.

Reise Know-How CityTrip Groningen und Leeuwarden Ulrike Grafberger, 2024-01-15
Zwei ungleiche Schwestern prägen den Norden der Niederlande. In Groningen, Universitätsstadt seit alters her, brummt das Studentenleben. Die von Grachten gerahmte Altstadt rund um den alten Grauen – tagsüber uriges Shoppingareal – wird abends zur Ausgehmeile. Die Kaimauern am Fluss Aa bieten mit dümpelnden Segelbooten und historischen Lagerhäusern die perfekte Nordholland-Idylle. Leeuwarden ist die ruhigere der beiden Schwestern. An einem sternförmig angelegten Wasserlauf erstreckt sich ein wunderschöner Stadtpark und ausgerechnet der Blokhuispoort, ein ehemaliges Zuchthaus, hat sich zum Gastro-, Hotel- und Kreativspot gemausert. Dieser aktuelle Stadtführer ist der ideale Begleiter, um alle Seiten der beiden niederländischen Kulturstädte selbstständig zu entdecken: - Die wichtigsten Sehenswürdigkeiten und Museen sowie weniger bekannte Attraktionen und Viertel ausführlich vorgestellt und bewertet - Faszinierende

Gasland Louis Stiller, 2018-08-28 We wonen niet in
Nederland, we wonen in Gasland. Bevingen, schadeherstel
en versterkingen zijn de levens, woningen, het
landschap en de toekomst van honderdduizenden
Groningers, schetst journalist en essayist Louis Stiller,
inwoner van het Groningse Warffum. Maar Gasland kijkt
ook de toekomst van heel Nederland. Want nergens in
Europa wordt zo weinig duurzame energie geproduceerd als
hier, en nergens worden oplossingen zo ver naar de
toekomst doorgeschoven. Terwijl het twee voor twaalf is, op
energie- en klimaatgebied. In Gasland reist Stiller door het
fysieke en mentale landschap van de gaswinning, op zoek
naar antwoorden. Hij schetst glashelder de complexe aard

en achtergronden van de problematiek, probeert lessen te trekken uit zeventig jaar gasgeschiedenis en onderzoekt mogelijkheden om, net als na de vondst van het gas, snel en groots een weg uit het oude energiestelsel te vinden.

Emigreren uit aardbevingsgebied Elizabeth

Kranenburg, 2020-02-27 Coverttekst Elizabeth en Koos wonen met veel genoeg in een fraai gerestaureerde boerderij in Oost-Groningen. Totdat het dorp Huizinge in 2012 getroffen wordt door een zware aardbeving. Oorzaak: de gaswinning. Elizabeth en Koos belanden in een nachtmerrie. In 'Emigreren uit aardbevingsgebied' schrijft Elizabeth over de bedreiging van hun woongebied en de halsstarrigheid van overheid, multinationals, wetgeving en talloze onderzoeksbureaus. Maar ook over de pijn om steeds weer die littekens te moeten zien in hun geliefde boerderij. Elizabeth constateert dat mensenrechten in Nederland elke dag geschonden worden, omdat meer waarde wordt gehecht aan winstmaximalisatie op de korte termijn en aan de belangen van het bedrijfsleven. De onwil van de overheid om dit 'netjes' op te lossen, is - soms letterlijk - ziekmakend.
