Biology of the Uterus Ralph Wynn,2013-06-29 In the decade following the publication of the first edition of *Cellular Biology of the Uterus*, advances in this field have been so rapid as to require not merely a revision of the earlier text but an essentially new volume. Even the title of the book has been changed, to *Biology of the Uterus*, to reflect the incorporation of more material based on classical anatomy and physiology. This histological and embryological information provides a necessary, though often lacking, background for the protein chemist and molecular biologist, and a bridge between biochemistry and biophysics, on the one hand, and clinical medicine, on the other. Thus, major practical problems in human reproduction, such as the mode of action of contraceptive agents and the cause of the initiation of labor, may be approached on a firm scientific footing. This text deals primarily with the biology of the uterus itself (comparative and human) rather than with placentation or pregnancy, and as such is a synthesis of data derived from many techniques, conventional and modern. Inasmuch as it is clearly beyond the competence of anyone scientist to prepare such a text on the basis of personal knowledge and experience, the aid of distinguished biologists from this country and abroad was enlisted. All of these authors, acknowledged experts in their respective fields, agreed to extensive revision of their chapters or preparation of entirely new contributions.

Sensory Assessment of Water Quality B. C. J. Zoeteman,2015-12-04 Environmental Science, Volume 2: *Sensory Assessment of Water Quality* presents the methods for sensory water quality assessment. This book discusses the various aspects of the problem of impaired taste and odor of water. Organized into seven chapters, this volume begins with an overview of the significance attributed to sensory assessment of water quality. This text then examines the results obtained on sensory water quality assessment and on general water quality appraisal. Other chapters describe the 20 types of drinking water and consider the effects of the sensory water quality assessment factors on water consumption. This book discusses as well the types of chemical compounds present and their relation to water taste. The final chapter deals with the number of applications and recommendations to assess sensory water quality aspects at least weekly in the case of surface water supplies by making an inquiry among the consumers located in the area served. This book is a valuable resource for chemists.

Advanced Data Mining and Applications Gao Cong,Wen-Chih Peng,Wei Emma Zhang,Chengliang Li,Aixin Sun,2017-10-30 This book constitutes the refereed proceedings of the 13th International Conference on Advanced Data Mining and Applications, ADMA 2017, held in Singapore in November 2017. The 20 full and 38 short papers presented in this volume were carefully reviewed and selected from 118 submissions. The papers were organized in topical sections named: database and distributed machine learning; recommender system; social network and social media; machine learning; classification and clustering methods; behavior modeling and user profiling; bioinformatics and medical data analysis; spatio-temporal data; natural language processing and text mining; data mining applications; applications; and demos.

Immunoassay and Other Bioanalytical Techniques Jeanette M. van Emon,2016-04-19 Taking an interdisciplinary approach that emphasizes the adaptability of immunochemical and related bioanalytical methods to a variety of matrices, *Immunoassay and Other Bioanalytical Techniques* describes the strength and the versatility of these methods in a wide range of environmental and biological measurement applications. The Pharmacology of Sleep Anthony Kales,2012-12-06 A review of the current state of the clinical and basic science of the pharmacology of sleep. The information provided ranges from a historical perspective to current concepts of sleep mechanisms, including the interaction between pharmacology and sleep-wake regulation and between chronopahrmacology and sleep-wake rhythms. For the first time in one single volume, both the basic mechanisms of sleep, and the basic and clinical aspects of the pharmacology of sleep are dealt with in a thorough, comprehensive and authoritative manner. The chapters, written by the foremost scientific authorities in this field, integrate the latest information on the basic mechanisms of drugs as they relate to their effects on sleep.

Translational Medicine Joy A. Cavagnaro, Mary Ellen Cosenza, 2021-11-26 Translational Medicine: Optimizing Preclinical Safety Evaluation of Biopharmaceuticals provides scientists responsible for the translation of novel biopharmaceuticals into clinical trials with a better understanding of how to navigate the obstacles that keep innovative medical research discoveries from becoming new therapies or even making it to clinical trials. The book includes sections on protein-based therapeutics, modified proteins, oligonucleotide-based therapies, monoclonal antibodies, antibody-drug conjugates, gene and cell-based therapies, gene-modified cell-based therapies, combination products, and therapeutic vaccines. Best practices are defined for efficient discovery research to facilitate a science-based, efficient, and predictive preclinical development program to ensure clinical efficacy and safety. Key Features: Defines best practices for leveraging of discovery research to facilitate a development program Includes general principles, animal models, biomarkers, preclinical toxicology testing paradigms, and practical applications Discusses rare diseases Discusses What-Why-When-How highlighting different considerations based upon product attributes. Includes special considerations for rare diseases About the Editors Joy A. Cavagnaro is an internationally recognized expert in preclinical development and regulatory strategy with an emphasis on genetic medicines.. Her 40-year career spans academia, government (FDA), and the CRO and biotech industries. She was awarded the 2019 Arnold J Lehman Award from the Society of Toxicology for introducing the concept of science-based, case-by-case approach to preclinical safety evaluation, which became the foundation of ICH S6. She currently serves on scientific advisory boards for advocacy groups and companies and consults and lectures in the area of preclinical development of novel therapies. Mary Ellen Cosenza is a regulatory toxicology consultant with over 30 years of senior leadership experience in the biopharmaceutical industry in the U.S., Europe, and emerging markets. She has held leadership position in both the American College of Toxicology (ACT) and the International Union of Toxicology (IUTOX) and is also an adjunct assistant professor at the University of Southern California where she teaches graduate-level courses in toxicology and regulation of biologics.
