**The Ocean of Churn** Sanjeev Sanyal,2016-08-10 Much of human history has played itself out along the rim of the Indian Ocean. In a first-of-its-kind attempt, bestselling author Sanjeev Sanyal tells the history of this significant region, which stretches across East Africa, the Middle East and the Indian subcontinent to South East Asia and Australia. He narrates a fascinating tale about the earliest human migrations out of Africa and the great cities of Angkor and Vijayanagar; medieval Arab empires and Chinese 'treasure fleets'; the rivalries of European colonial powers and a new dawn. Sanjeev explores remote archaeological sites, ancient inscriptions, maritime trading networks and half-forgotten oral histories, to make exciting revelations. In his inimitable style, he draws upon existing and new evidence to challenge well-established claims about famous historical characters and the flow of history. Adventurers, merchants, explorers, monks, swashbuckling pirates, revolutionaries and warrior princesses populate this colourful and multifaceted narrative. The Ocean of Churn takes the reader on an amazing journey through medieval geopolitics and eyewitness accounts of long-lost cities to the latest genetic discoveries about human origins, bringing alive a region that has defined civilization from the very beginning.

*This Life At Play* Girish Karnad,2021-05-19 Girish Karnad was one of modern India's greatest cultural figures: an accomplished actor, a path-breaking director, an innovative administrator, a clear-headed and erudite thinker, a public intellectual with an unwavering moral compass, and above all, the most extraordinarily gifted playwright of his times. This Life at Play, translated from the Kannada in part by Karnad himself and in part by Srinath Perur, covers the first half of his remarkable life – from his childhood in Sirsi and his early engagement with local theatre, his education in Dharwad, Bombay and Oxford, to his career in publishing, his successes and travails in the film industry, and his personal and writerly life. Moving and humorous, insightful and candid, these memoirs provide an unforgettable glimpse into the life-shaping experiences of a towering genius, and a unique window into the India in which he lived and worked.

Uncharted Colette Baron-Reid,2016 In Uncharted, internationally acclaimed intuitive counselor and spiritual cartographer Colette Baron Reid, whose best-selling books include The Map and Messages from Spirit, shows us that in the new normal of uncertainty, we can overcome the challenge of feeling disoriented, scared, and helpless and chart a path to new possibilities. It's in the places unfamiliar to us--the uncharted places--where magic lies. Here we can claim our innate power to give birth to an extraordinary life and become who we are called to become. Colette explains, When we're lost, we all want a map--but maps can only tell us where we've been. All of us, personally and collectively, are headed somewhere new, to a future that has not yet been imagined, and we're creating it as we go. With her trademark compassionate candor and reassuring humor, as well as input from a wise, loving consciousness who call themselves Fred, Colette guides us on a journey of co-creation through five interconnected realms--the Realms of Spirit, Mind, Light, and Energy, Form. Whatever we wish to experience and manifest, if we start in the realm of Form, trying to fix our lives and think our way out of our problems, we end up living inauthentically and feeling disappointed. But if we orient ourselves in the Realm of Spirit first, a magical process of transformation begins within, from which we can manifest a new reality far better than we might ever have imagined. Following this path, we get to experience what we came to create in the Realm of Form, and watch as our fear gives way to a deep sense of purpose and enthusiasm for participating in the co-creative process. Throughout Uncharted are fresh and exciting exercises drawn from Colette's trademarked energy psychology process, IN-Vizion

50 Years of Green Revolution M. S. Swaminathan,2017-03-14 The green revolution in India about 50 years ago transformed India's image then as begging bowl to bread basket. This transformation during the 1960s took just about 4 years. The yield increases achieved in wheat and then in rice which occurred in just about half decade is far in excess of the yield increases during the preceding 4000 years. This remarkable feat was achieved with the leadership of the author using the dwarf wheat types which had been produced by Norman Borlaug in Mexico. The research and development of green revolution of wheat and rice at the Indian Agricultural Research Institute, New Delhi was led by the author along with his team of students and co-workers. He has published over 100 papers on green revolution and the ever-green revolution which is a refinement of the former. This book is a compilation of just about 40 of his numerous research papers, monographs and books published by him on this subject. The papers in this book bring out the scientific basis of the modification of the plant type so as to be responsive to exogenous addition of chemical fertilizers and irrigation. The ideal plant type enables capture of adequate sunlight and using the chemical fertilizers added to the soil, produce substantial photosynthetic starch. And because the plants have short and thick culm, they are able to withstand enormous amounts of grains in their ears. This indeed was the basis of breaking the yield barriers associated with native varieties. The book also brings out that green revolution had established the food security at the national level but not at the individual household levels of millions of resource-poor rural small and marginal farming, fishing and landless families. Further green revolution was commodity-centric and the manner of its practice led to environmental degradation and social inequities. This author realized as early as 1972 that system of agriculture in India should be designed to fight both the famines of food and rural livelihoods. In pursuit of it, this author further designed an evergreen revolution with systems approach. What this means is providing concurrent attention to ecological foundations of agriculture and the livelihoods of the rural people. The book also brings out that green revolution was a team effort involving scientists, policy makers, administrators, farmers and students. This book is an outstanding example of green revolution providing a breathing space by putting the cereal grain production rate ahead of the population growth rate and then when food security has been adequately established, the system is changed to achieve productivity in perpetuity without causing environmental and social harm.
