One Road to Riches? Haakon Gjerløw, Carl Henrik Knutsen, Tore Wig, Matthew Charles Wilson, 2022-04-07
Building effective state institutions before introducing democracy is widely presumed to improve different development outcomes. Conversely, proponents of this “stateness-first” argument anticipate that democratization before state building yields poor development outcomes. In this Element, we discuss several strong assumptions that (different versions of) this argument rests upon and critically evaluate the existing evidence base. In extension, we specify various observable implications. We then subject the stateness-first argument to multiple tests, focusing on economic growth as an outcome. First, we conduct historical case studies of two countries with different institutional sequencing histories, Denmark and Greece, and assess the stateness-first argument (e.g., by using a synthetic control approach). Thereafter, we draw on an extensive global sample of about 180 countries, measured across 1789–2019 and leverage panel regressions, preparametric matching, and sequence analysis to test a number of observable implications. Overall, we find little evidence to support the stateness-first argument.

A road to riches or a road to ruin? Sijbren de Jong, Willem Th. Oosterveld, Michel Roelen, Katharine Klacansky, Agne Silekaite, Rianne Siebenga, 2017-08-15
China’s One Belt One Road (OBOR) project was formally introduced by Chinese President Xi Jinping in 2013. The project, aimed at integrating trade and investment in

Eurasia, encompasses over \$900 billion in planned investments of infrastructure across Central and South Asia, the Middle East, and Central and Eastern Europe (CEE). A dedicated forum for cooperation with CEE countries has been around now for several years. Originally created in April 2012, 'the so-called '16+1' framework constitutes a platform which brings heads of state together annually to strengthen dialogue and cooperation between China and the CEE region. Chinese investment interests within the CEE region appear strongly related to privatization opportunities, including large scale infrastructure projects and public procurement opportunities. China's interest in the CEE region, and the creation of the '16+1' format in particular, also gives rise to concerns that China is attempting to use the region as a medium through which to influence the EU from within. This influence manifests itself primarily in the form of initiatives which aim to persuade and/or pressure CEE countries to adopt favorable policies vis-à-vis China. These concerns stem from two directions. First, there is a fear that some deals concluded with China may not comply with EU rules on public procurement, or other regulations and guidelines. Second, there is a fear of political influencing, which some see exhibited by the EU in avoiding direct references or statements towards China's legal defeat over the South China Sea after the objection by some member states China's engagement in the Middle East is arguably the most important component of the OBOR initiative as far as its strategic objectives are concerned. Beijing enunciates a clear interest in developing strong structural ties within the region, particularly with fossil fuel exports being the centerpiece, at least for the initial stage. This also means of course that China will almost inevitably get embroiled in political matters, and thus pose a challenge to the interests of other key players

such as Russia, the US and the EU. While China seeks to avoid becoming yet another outside power that meddles in the region's affairs, it does already show signs of being prepared to become politically engaged. In its engagement in the Middle East, China's policy is banked on the hopes of being the newish entrant in the region, which absolves it from any imperialist or interventionist baggage. This notwithstanding, regional players, are going to be tempted to play the China card when dealing with the other major (outside) powers, which will effectively pull China into the region's political vortices. Given OBOR's unprecedented scale, this new study by The Hague Centre for Strategic Studies (HCSS) investigates the extent to which 'Belt and Road' related investments in CEE and the greater Middle East bring sufficient economic weight to both regions that at the same time can be turned into political influence. If this is indeed the case, a pertinent question to ask is whether China is prepared and willing to play a greater political (and/or security) role in CEE and the Middle East in the first place? In addition, the paper seeks to understand whether China's role can be judged as positive or negative for regional security, as seen from the viewpoint of Europe and the Netherlands.

YIKES! Ever heard of a green fashion and beauty monster, Wicked Witch of All things East, who lives at the end of The Great Rainbow? Who flies a turbo broomstick with a sidecar and who hasn't past her broomstick test? Well, believe it or not, unfortunately there is one of those that exists.

Hollywood's Road to Riches David

Waterman, 2009-06-30 Combining historical and economic

analysis, this book shows how, beginning in the 1950s, a largely predictable business has been transformed into a volatile and complex multimedia enterprise now commanding over 80 percent of the world's film business. At the same time, the book asks how the economic forces leading to this success--the forces of audience demand, technology, and high risk--have combined to change the kinds of movies Hollywood produces.

The Road to Riches Suzanne Schroeder,2021-02-04
TBD About the Author Suzanne spent over 40 years working in the medical community and raising her four children, including 15 years of home schooling. After she and her husband Rich retired, there was always plenty to do keeping up with her sewing, paper crafting and 18 grandchildren. However, she found that the book she had imagined for years just needed to be written. While *The Road to Riches* is a total work of fiction, it covers topics that are close to her heart. She is looking forward to completing her second book, *The Boulevard to Beauty*, which covers another topic that has been a life-long burden to Suzanne.

Milton's Italy Catherine Martin,2016-12-01 This book joins a growing trend toward transnational literary studies and revives a venerable tradition of Anglo-Italian scholarship centering on John Milton. Correcting misperceptions that have diminished the international dimensions of his life and work, it broadly surveys Milton's Italianate studies, travels, poetics, politics, and religious convictions. While his debts to Machiavelli and other classical republicans are often noted, few contemporary critics have explored the Italian sources of his anti-papal, anti-episcopal, and anti-formalist religious outlook. Relying on Milton's own testimony, this book explores its roots in Dante, Petrarch, Ariosto, and that great Venetian enemy of

the pope, Paolo Sarpi, thereby correcting a recent tendency to make native English contexts dominate his development. This tendency is partly due to a mistaken belief that Italy was in steep decline during and after Milton's travels of 1638-1639, the period immediately before he produced his prose critiques of the English Church, its canon law, and its censorship. Yet these were also fundamentally Italian issues that he skillfully adapted to meet contemporary English needs, a practice enabled by his extraordinarily positive experience of the Italian language, cities, academies, and music, the latter of which ultimately influenced Milton's operatic drama, *Samson Agonistes*. Besides republicanism and theology (radical doctrines of free grace and free will), equally strong influences treated here include Italian Neoplatonism, cosmology, and romance epic. By making these traditions his own, Milton became what John Steadman once described as an Italianate Englishman whose classical literary tastes and critical orientation...were...to a considerable extent molded by Italian critics (1976), a view that is fully credited and updated here.
