Virtual Reality als gemeinsames Erlebnis. Entwicklung einer interaktiven Anwendung zur Echtzeitsynchronisation mobiler Endgeräte Christian Bleser, 2017-01-01 Virtual Reality Anwendungen erlauben es dem Benutzer, sich in eine virtuelle Welt zu versetzen und mit ihr zu interagieren. Wird dabei als Ausgabemedium ein Head-Mounted Display verwendet, kann der Benutzer komplett in die virtuelle Welt eintauchen. Damit diese virtuelle Welt für mehrere Benutzer erlebbar wird, muss eine Synchronisation der Anwendungen erfolgen. In diesem Buch wird eine Anwendung entwickelt, die grundlegende Funktionen für die Synchronisation von Aktionen in der virtuellen Welt und Interaktionen zwischen den Benutzern bereitstellt. Dazu werden die Grundlagen erörtert und die zur Verfügung stehenden Technologien analysiert und bewertet. Es wird definiert, welche Bedingungen eingehalten werden müssen, damit eine hohe Immersion erreicht werden kann. Mithilfe der ausgewählten Hard-

und Software wird ein Prototyp entwickelt, mit dem untersucht werden kann, welche Latenzen bei der Synchronisation über das Netzwerk auftreten. Dabei stellt sich heraus, dass bei der Synchronisation von bis zu drei Benutzern eine mit 40 ms sehr geringe Latenz eingehalten werden kann. Ein Anstieg der Latenzen ist auch bei einer höheren Benutzeranzahl nicht zu erwarten.

Fifty Things that Made the Modern Economy Tim

Harford, 2017-07-06 Based on the series produced for the BBC World Service Who thought up paper money? How did the contraceptive pill change the face of the legal profession? Why was the horse collar as important for human progress as the steam engine? How did the humble spreadsheet turn the world of finance upside-down? The world economy defies comprehension. A continuously-changing system of immense complexity, it offers over ten billion distinct products and services, doubles in size every fifteen years, and links almost every one of the planet's seven billion people. It delivers astonishing luxury to hundreds of millions. It also leaves hundreds of millions behind, puts tremendous strains on the ecosystem, and has an alarming habit

of stalling. Nobody is in charge of it. Indeed, no individual understands more than a fraction of what's going on. How can we make sense of this bewildering system on which our lives depend? From the tally-stick to Bitcoin, the canal lock to the jumbo jet, each invention in Tim Harford's fascinating new book has its own curious, surprising and memorable story, a vignette against a grand backdrop. Step by step, readers will start to understand where we are, how we got here, and where we might be going next. Hidden connections will be laid bare: how the barcode undermined family corner shops; why the gramophone widened inequality; how barbed wire shaped America. We'll meet the characters who developed some of these inventions, profited from them, or were ruined by them. We'll trace the economic principles that help to explain their transformative effects. And we'll ask what lessons we can learn to make wise use of future inventions, in a world where the pace of innovation will only accelerate.

Speaking of Race Celeste Headlee, 2021-11-02 A Boston Globe Most Anticipated Fall Book In this urgently needed guide, the PBS host, award-winning journalist, and author of *We Need to Talk* teaches us how to have productive conversations about race, offering insights, advice, and support. A self-described “light-skinned Black Jew,” Celeste Headlee has been forced to speak about race—including having to defend or define her own—since childhood. In her career as a journalist for public media, she’s made it a priority to talk about race proactively. She’s discovered, however, that those exchanges have rarely been productive. While many people say they want to talk about race, the reality is, they want to talk about race with people who agree with them. The subject makes us uncomfortable; it’s often not considered polite or appropriate. To avoid these painful discussions, we stay in our bubbles, reinforcing our own sense of righteousness as well as our division. Yet we gain nothing by not engaging with those we disagree with; empathy does not develop in a vacuum and racism won’t just fade away. If we are to effect meaningful change as a society, Headlee argues, we have to be able to talk about what that change looks like without fear of losing friends and jobs, or being ostracized. In *Speaking of Race*, Headlee draws from her experiences as a journalist, and the latest research on bias, communication, and neuroscience to provide practical advice and insight for talking about race that will facilitate better conversations that can actually bring us closer together. This is the book for people who have tried to debate and educate and argue and got nowhere; it is the book for those who have stopped talking to a neighbor or dread Thanksgiving dinner. It is an essential and timely book for all of us.
