The Story of the Selma Voting Rights Marches in Photographs David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Dava Shastri's Last Day Kirthana Ramisetti,2021-11-30 In this novel full of music, magnetism, and familial obligation (Emma Straub, author of *All Adults Here*) a dying billionaire matriarch leaks news of her death early so she can examine her legacy—a decision that horrifies her children and inadvertently exposes secrets she has spent a lifetime keeping. Dava Shastri, one of the world's wealthiest women, has always lived with her sterling reputation in mind. A brain cancer diagnosis at the age of seventy, however, changes everything, and Dava decides to take her death—like all matters of her life—into her own hands. Summoning her four adult children to her private island, she discloses shocking news: in addition to having a terminal illness, she has arranged for the news of her death to break early, so she can read her obituaries. As someone who dedicated her life to the arts and the empowerment of women, Dava expects to read articles lauding her philanthropic work. Instead, her death reveals two devastating secrets, truths she thought she had buried forever. And now the whole world knows, including her children. In the time she has left, Dava must come to terms with the decisions that have led to this moment—and make peace with those closest to her before it's too late. Compassionately written and chock-full of humor and heart, this powerful novel examines public versus private legacy, the complexities of love, and the never-ending joys—and frustrations—of family. After Geoengineering Holly Jean Buck,2019-10-01 Climate engineering is a dystopian project. But as the human species hurtles ever faster towards its own extinction, geoengineering as a temporary fix, to buy time for carbon removal, is a seductive idea. We are right to fear that geoengineering will be used to maintain the status quo, but is there another possible future after geoengineering? Can these technologies and practices be used to bring carbon levels back down to pre-industrial levels? Are there possibilities for massive intentional intervention in the climate that are democratic, decentralised, or participatory? These questions are provocative, because they go against a binary that has become common sense: geoengineering is assumed to be on the side of industrial agriculture, inequality and ecomodernism, in opposition to degrowth, renewable energy, sustainable agriculture and climate justice. After Geoengineering rejects this binary, to ask: what if the people seized the means of climate production? Both critical and utopian, the book examines the possible futures after geoengineering. Rejecting the idea that geoengineering is some kind of easy work-around, Holly Buck outlines the kind of social transformation that would be necessary to enact a programme of geoengineering in the first place.
