Merger Control John Davies, 2017-10-04 Merger Control is your comprehensive guide to this complex and fast evolving area, providing crucial insight into merger control regimes worldwide. Throughout this edition, and following the unique Getting the Deal Through format, the same key questions are answered by leading practitioners in each of the 71 jurisdictions featured. Edited by John Davies of Freshfields Bruckhaus Deringer, Merger Control provides in-depth comparative study of the topic from the perspective of leading experts in 71 jurisdictions and also features editorial chapters covering COMESA; the ICN in 2016-2017; recent economic applications in EU merger control: UPP and beyond; and the growing document burden: coordinating discovery in cross-border merger reviews. "The comprehensive range of guides produced by GTDT provides practitioners with an extremely useful resource when seeking an overview of key areas of law and policy in practice areas or jurisdictions which they may otherwise be unfamiliar with." Gareth Webster, Centrica Energy E&P

Mergers & Acquisitions Review Mark Zerdin, 2017-10-31 The Mergers & Acquisitions Review, edited by Mark Zerdin of Slaughter and May, seeks to provide a richer understanding of the shape of M&A in the global markets, together with the challenges and opportunities facing market participants. This comes at a time when the international market has seen a boom in dealmaking, with many markets reaching post-crisis peaks and some recording all-time highs. Mega-deals have been at the heart of the expanding market, with companies tapping into cash piles and cheap debt to fund transformational deals. Looking behind the headline figures, however, a number of factors suggest dealmaking may not continue to grow as rapidly as it has done recently. This book examines this topic and more across over 55 jurisdictions, as well as providing more general interest chapters covering the European Union, European Private Equity, M&A Litigation, and Offshore Private Equity. Contributors include: Didier Marti, Bredin Prat; Heinrich Knepper, Hengeler Mueller; Javier Ruiz-Camara Bayo, Uria Menendez.

Nature's Place (Routledge Revivals) William M. Adams, 2014-05-01 Nature conservation has become increasingly important in Britain over the last three decades. This title, first published in 1986, deals with the critical issues surrounding nature conservation and wildlife protection. The book is broad in scope, with a focus on the 1981 Wildlife and Countryside Act and its provisions for the protection of wildlife habitats in Sites of Special Scientific Interest (SSSIs). This follows an historical account of habitat loss over the past 200 years and the origins of conservation and site-protection policy. This reissue will be of particular value to professionals, voluntary workers and students with an interest in the origins, developments and practice of nature conservation.

Research Handbook on Global Merger Control Ioannis Kokkoris, Nicholas Levy, 2023-05-09 Over the past 30 years, merger control has become well-established around the world with broad consensus around its ambit and objectives. That consensus has fractured in recent years. Enforcement today is at a critical juncture, facing an array of challenges and calls for reform unprecedented in their scope and intensity. Authored by leading legal practitioners, economists, enforcers and jurists, this timely Research Handbook on Global Merger Control discusses those challenges and predicts how merger control is likely to evolve.

Day-to-Day Competition Law Patrick Hubert, Marie Leppard, Olivier Lécroart, 2014-06-05 Companies today must consider and comply with competition law in their daily business management. The financial and reputational risks for breaching such rules are severe and the success of many merger and acquisition projects depends very much on it. While competition law rules become increasingly sophisticated, business people are still expected to comply with it. Rather than giving a theoretical approach that can be found in a typical practitioner's book or textbook, «Day-to-Day competition law: a practical

guide for businesses» is genuinely a practical book. The interaction between theory and practice is the main feature of the book. Major competition law issues are explained in a jargon-free manner and summarized in a nutshell at the end of each chapter. Not only will the reader gain an understanding of competition law rules, but also will gain a better understanding on how a company can behave and what to do if it is subject to an investigation by the competition authorities. This practical guidance may serve as a platform for designing internal in-house rules governing behaviour in relation to competition law, and may also trigger a revision of such rules in light of some of the issues raised by the authors. While a particular focus is drawn on the EU – as the EU competition law system is replicated in a large number of countries around the world – reference to differing rules and other key jurisdictions such as the United States is also made. This book is written to appeal to business people, as well as non-specialized in-house lawyers, and all those who wish to understand competition law in a clear and practical way. The authors' experience in the field of competition law ranges from leading investigations on behalf of competition authorities to applying competition law in a major global company in its daily activities, and advising multinational clients of one of the world's leading law firms. It is this professional insight which provides the reader with an invaluable inside view of all aspects of competition law, from the way authorities think to the impacts competition law has on businesses.

Criminal Law & Forensic Psychiatry D. J. Power, Patrick Curran, J. M. Hughes, 1996 Taking as its starting point a definition of crime itself, this book proceeds to explore the psychological and sociological factors which influence the criminal mind, covering diverse topics within this broad brief

Merger Control Review Ilene Knable Gotts, 2017-09-20 The Merger Control Review, edited by Ilene Knable Gotts of Wachtell, Lipton, Rosen & Katz, provides an overview of the process in 38 jurisdictions, as well as a discussion of recent decisions, strategic considerations and likely upcoming developments in Merger Control. Given the ability of most competition agencies with pre-merger notification laws to delay, and even block, a transaction, it is imperative to take each jurisdiction - small or large, new or mature - seriously. It is, therefore, imperative that counsel for such a transaction develops a comprehensive plan prior to, or immediately upon, execution of an agreement concerning where and when to file notification with competition authorities regarding such a transaction. The intended readership of this book comprises both in-house and outside counsel who may be involved in the competition review of cross-border transactions. In our endeavour to keep our readers well informed, we have expanded the jurisdictions covered by this book to include the newer regimes as well with several special chapters covering US, EU and Chinese Merger Control in Media and Pharmaceutical sectors. Contributors include: Susan Ning, King & Wood Mallesons; James Langenfeld, Navigant; Goenenc Guerkeynak, ELIG; Mr Jordan Ellison, Slaughter and May. "Each country section provides an informative overview of recent and expected enforcement trends... A very useful book!" - Jean-Yves Art, Associate General Counsel, Microsoft, Belgium

An Introduction to System Safety Engineering Nancy G. Leveson, 2023-11-14 A comprehensive, up-to-date introduction to the foundations of classical safety engineering, with an emphasis on preparing for future challenges. Systems today are orders of magnitude more complex than in the past, and their complexity is increasing exponentially. Preventing accidents and losses in such systems requires a holistic perspective that can accommodate unprecedented types of technology and design. This textbook teaches the foundations of classical safety engineering while incorporating the principles of systems thinking and systems theory. Beginning with the framing and lessons of her classic text,

Safeware, Nancy Leveson builds on established knowledge and brings the field up to date, challenging old approaches and introducing new ones. This essential book provides the core information required to build safety-critical systems today and in the future, including coverage of the historical and legal frameworks in which the field operates as well as discussions of risk, ethics, and policy implications. Presents cutting-edge concepts anticipating the safety challenges of the future alongside thorough treatment of historical practices and ideas Provides a comprehensive introduction to the foundations of safety engineering Covers accident analysis, hazard analysis, design for safety, human factors, management, and operations Incorporates extensive examples of real-world accidents and applications Ideal for students new to safety engineering as well as professionals looking to keep pace with a rapidly changing field

Mastering Prometheus William Hegedus,2024-04-19 Learn how to effectively implement, manage, and optimize Prometheus for monitoring your systems Key Features Achieve high availability with Prometheus by using Thanos Integrate Prometheus into your broader observability stack with OpenTelemetry Tweak, tune, and debug Prometheus to reliably scale without limits Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionWith an increased focus on observability and reliability, establishing a scalable and reliable monitoring environment is more important than ever. Over the last decade, Prometheus has emerged as the leading open-source, time-series based monitoring software catering to this demand. This book is your guide to scaling, operating, and extending Prometheus from small on-premises workloads to multi-cloud globally distributed workloads and everything in between. Starting with an introduction to Prometheus and its role in observability, the book provides a walkthrough of its deployment. You'll explore Prometheus's query language and TSDB data model, followed by dynamic service discovery for monitoring targets and refining alerting through custom templates and formatting. The book then demonstrates horizontal scaling of Prometheus via sharding and federation, while equipping you with debugging techniques and strategies to fine-tune data ingestion. Advancing through the chapters, you'll manage Prometheus at scale through CI validations and templating with Jsonnet, and integrate Prometheus with other projects such as OpenTelemetry, Thanos, VictoriaMetrics, and Mimir. By the end of this book, you'll have practical knowledge of Prometheus and its ecosystem, which will help you discern when, why, and how to scale it to meet your ever-growing needs.What you will learn Deploy Prometheus and Node Exporter to public clouds and Kubernetes Gain in-depth knowledge of how Prometheus's underlying code works Build your own custom service-discovery providers for Prometheus Debug Prometheus performance issues to identify cardinality issues in your environment Use VictoriaMetrics and/or Grafana Mimir for remote storage of Prometheus data Define and implement SLO-based alerting Who this book is for The book is for site reliability engineers (SREs), developers, and platform engineers involved in the monitoring and observability of their team or company's systems. A background in Prometheus is assumed, so the book dedicates minimal time to the basics of getting Prometheus up and running. Whether you aim to expand monitoring capabilities, streamline configuration management, or enhance integration with existing tools, this book will help you maximize the potential of your Prometheus monitoring stack.

Remedies in EU Competition Law Damien Gerard, Assimakis Komninos, 2020-07-10
By their nature, remedies are central to competition law enforcement and represent the yardstick against which the efficiency of the overall system can be measured. Yet very rarely have remedies been treated in a horizontal and comprehensive manner from the combined perspectives of substance, process and policy. The present volume, developed in partnership with the College of Europe's Global Competition Law Centre (GCLC), provides coherent, practical, and authoritative commentaries by leading experts from the GCLC's incomparable network. The contributions – originally presented at the 2019 GCLC annual conference – examine remedies to assess the overall effectiveness of competition law enforcement in merger, antitrust and State aid matters. The overall topic is presented under five headings: objectives and limitations of remedies; types of remedies in competition law enforcement; implementation and process; ex post assessment of remedies and policy lessons; and national and international approaches. The high-profile and wide-ranging group of authors includes the Director-General of the European Commission's competition department, lawyers from major international firms, and well-known economists and academics specialising in competition law. With a sharp focus on how to make competition rules work well in today's digital environment, this systematic and coherent analysis illuminates an issue that we need to fully grasp and understand in order to make sense of competition policy, law and enforcement in the years and decades to come.
