Raspberry Pi for Secret Agents Stefan

Sjögelid, 2013-04-25 A playful, informal approach to using the Raspberry Pi for mischief! Raspberry Pi for Secret Agents is for all mischievous Raspberry Pi owners who'd like to see their computer transform into a neat spy gadget to be used in a series of practical pranks and projects. No previous skills are required to follow along and if you're completely new to Linux, you'll pick up much of the basics for free. Apart from the Raspberry Pi board itself, a USB microphone and/or a webcam is required for most of the audio/video topics and a Wi-Fi dongle is recommended for the networking examples. A Windows/Mac OS X/Linux computer (or second Raspberry Pi) is also recommended for remote network access.

Truth and Transparency Alan K. Chen, Justin

Marceau, 2023-08-31 Undercover investigators have been celebrated as critical conduits of political speech and essential protectors of transparency. They have also been derided as intrusive and spy-like, inconsistent with private property rights, and morally or ethically questionable. In Truth and Transparency, Alan K. Chen and Justin Marceau rigorously examine this duality and seek to

provide a socio-legal context for understanding these varying views. The book concretely defines undercover investigations, distinguishes the practice from investigative journalism and whistleblowing, and provides a comprehensive legal history. Chapters explore the public need for investigations and the rights of investigators, paying close attention to the types of investigations that fall beyond the scope of constitutional protection. The book also provides concrete empirical evidence of the broad, bipartisan support for undercover investigations and champions the practice as an essential component of the transparency our democracy needs to thrive.

Miss Reversal and Mister Improbability Lotus Light, 2023-06-05 A tale of sweet affection, romance, and ceaseless twists! His destiny is to constantly encounter peculiar incidents. One day, he falls in love with his childhood friend, who possesses the extraordinary ability to alter fate with a mere sneeze. I was a late talker. At the age of four, I couldn't even complete a sentence. My family was anxious and took me to see many famous doctors, but to no avail. Later, Isaac Rogers stood in front of me and smiled sweetly. He was only as tall as a table at the time, but his eyes already had stars in them. I thought the stars were really pretty. So, I said my first word ever - brother. After that, I learned my first sentence in life. I said, I like Isaac brother. After saying that, I sneezed heavily. For the next decade of my life, I fell into a strange cycle. Whenever I sneezed, my life would take a reverse turn and develop in the opposite direction. One second it was sunny, and the next second it could be pouring rain. Sometimes I think that up to now, the only sentence I've said that hasn't caused a reversal is - I like Isaac brother. Isaac, I was a late talker, but I loved you early. --Daisy Russell

Daddy, Mummy is a Spy Sun Yuxin, 2019-12-10 He pursed his lips and smiled contemptuously. It would be difficult for a model to survive in this circle if they weren't taken care of. She raised her eyebrows and sneered. So? He said the words that had been brewing for a long time, Become my woman. She said coldly, I don't want to get married. He sneered and pinched her chin, forcing her to look him in the eye. You want me to marry you with your broken body? She said confidently, I'm not going to be Little San. He stared at her for a while, then slowly said, It's just an engagement. I'll give you your freedom when I get married. For the sake of that illusory freedom, she had become an affair of his. She knew that she couldn't defeat him, because this was a man that was even scarier than the devil ...

Secret Lives of Children in the Digital Age Linda Laidlaw, Joanne O'Mara, Suzanna Wong, 2021-12-27 *Secret Lives of Children in the Digital Age: Disruptive Devices and Resourceful Learners* offers an examination of the impact on children, their families and their teachers, as digital technologies and new literacy practices

have rapidly transformed how children learn, play and communicate. While ease of access to enormous knowledge bases presents many benefits and advantages, mobile screen technologies are often perceived by parents and teachers as disruptive and worrisome. Developed from a wide range of the authors' research over the past decade to an examination of remote learning during the COVID 19 pandemic, this book posits that while teachers, parents and governments are focused on protecting children, what is often neglected is children's own agency and capacity to engage with mobile technologies in ways that support them in pursuing their own interests, pleasures and learning. This text works to disrupt boundaries in research, policy and practice, between home and school, and across virtual and actual worlds, positioning children as both users of media texts and coproducers of digitally mediated knowledge, with peers, family and teachers. *Secret Lives of Children in the Digital Age* brings together over a decade of shared research, conversations, writing and friendships across diverse geographies. Over the past decade, digital technologies have rapidly transformed how children learn, play and communicate. Tablet devices such as iPads are now ubiquitous in the lives of many children. Such devices are easy to use and provide multimodal options (i.e. operable via touch, speech, and icons, as well as conventional text). Users do not need to be conventionally literate to have access to powerful search engines, social media platforms, a range of 'apps' and games, or to be able to share their own creations on publication

venues such as YouTube, TikTok and more. While such ease of access can present many benefits and advantages when positioned in relation to children's use, but this access is not without concern, since mobile screen technologies are often perceived by parents and teachers as disruptive and worrisome, with popular media ramping up fears via publication of sensational articles. *Secret Lives of Children in the Digital Age* contributes to research on digital literacies, and offers a pedagogical examination of digital possibilities for bringing playfulness and innovation into learning. Perfect for courses such as: Introduction to Literacy Research | Qualitative Research Methods | Early Literacy | Research Methods in Language and Literacy | Introduction to Qualitative Research | New and Digital Literacies | Digital Media Education | Theories of Language and Literacy

Hawker's Secret Cold War Airfield Christopher Budgen, 2020-11-23 In 1948, Hawker Aircraft, faced with new jet projects that could not use their existing airfield at Langley, began the process of searching for alternative accommodation for their flight-testing requirements. It would, however, take three hard years before Dunsfold Aerodrome would be made available by a reluctant Air Ministry and the company was able to launch its first jet aircraft design – the Sea Hawk – into series production for the Royal Navy, closely followed by the superlative Hunter. Hawker Aircraft would go on to produce nearly 2,000 Hunters before other projects came to the fore. As Hunter production continued in the late 1950s, the company looked to its successor – the Mach 2 capable air superiority fighter designated P.1121, though this would stall before flight in the wake of serious national financial shortfalls. With the loss of its premier project, the company came upon a radical new engine proposal and schemed an aircraft around it capable of vertical take-off and landing. While many decried the proposal, claiming it would never amount to anything, the Harrier would go on to prove the nay-sayers wrong as it came into its own during the Falklands War. Following the Harrier, Hawker Siddeley stepped into the competitive trainer aircraft market with the Hawk for the RAF. After completion of the RAF requirement, Hawk was sold into air arms across

the world, including the US Navy, an incredible achievement for a UK design. British Aerospace then brought forth the Harrier GR.5, the UK version of the US AV-8B, a completely upgraded and improved Harrier. One might expect that this prolific output was the result of some massive industrial plant in the Midlands rather than an isolated aerodrome tucked in the rural hinterland of south Surrey. Surrounded for most of its existence by secrecy, due to the nature of its work, Dunsfold has largely escaped the notice of the general public. This work shines a light on the remarkable work carried out there.
