Only in Minnesota Berit Thorkelson, Roxanne Kjarum, Only in Minnesota is a pictorial tribute to all that makes the state unique. Combining the natural, historical, and cultural facets of life in Minnesota, it showcases the people and what they do for fun (the Uptown Art Fair, ice fishing), where they live (from the cities of Minneapolis, St. Paul, Duluth, and Rochester to smaller towns and rural regions in between), their favorite places (Mille Lacs, Split Rock Lighthouse), and more. More than 160 dazzling, four-color photographs, showing a variety of subjects--from farms and churches to tourist destinations and state parks; from nature scenes to city festivals and cultural events--are the focus of Only in Minnesota. These photographs are accented by lively captions and fun facts. The result is a homage to the Gopher state from a local author and photographer whose love for Minnesota comes through on every page. Roxanne Kjarum is a freelance photographer who shoots advertising for money and the natural world for love. Her first published work was in Sierra Club magazine in 1988; since then her photography has appeared in numerous publications, including MPLS.ST.PAUL Magazine, Lake Superior Magazine, and Metropolitan Home.

Applied Data Science in Tourism Roman Egger,2022-01-31 Access to large data sets has led to a paradigm shift in the tourism research landscape. Big data is enabling a new form of knowledge gain, while at the same time shaking the epistemological foundations and requiring new methods and analysis approaches. It allows for interdisciplinary cooperation between computer sciences and social and economic sciences, and complements

the traditional research approaches. This book provides a broad basis for the practical application of data science approaches such as machine learning, text mining, social network analysis, and many more, which are essential for interdisciplinary tourism research. Each method is presented in principle, viewed analytically, and its advantages and disadvantages are weighed up and typical fields of application are presented. The correct methodical application is presented with a how-to approach, together with code examples, allowing a wider reader base including researchers, practitioners, and students entering the field. The book is a very well-structured introduction to data science – not only in tourism – and its methodological foundations, accompanied by well-chosen practical cases. It underlines an important insight: data are only representations of reality, you need methodological skills and domain background to derive knowledge from them - Hannes Werthner, Vienna University of Technology Roman Egger has accomplished a difficult but necessary task: make clear how data science can practically support and foster travel and tourism research and applications. The book offers a well-taught collection of chapters giving a comprehensive and deep account of AI and data science for tourism - Francesco Ricci, Free University of Bozen-Bolzano This well-structured and easy-to-read book provides a comprehensive overview of data science in tourism. It contributes largely to the methodological repository beyond traditional methods. - Rob Law, University of Macau
