Quartz Crystal Oscillator Circuits Design Handbook D. Firth,Magnavox Company. Government and Industrial Division,1965 The object of this handbook is to assemble a set of design methods for crystal oscillators in the frequency range of 1 KC to 200 MC with the aim of facilitating design, eliminating crystal unit misapplications, and reducing design costs. The handbook is not directed at the design of ultra-stable crystal oscillators, but rather at the non-temperature controlled, medium frequency stability oscillator commonly in use in many types of communications equipment. The handbook contains discussions of: (1) The electrical characteristics of crystal units, condition of usage, and methods of measurement. (2) Characteristics of tube and transistor amplifiers. (3) Characteristics of impedance transforming networks. (4) Detailed design information on series resonance and anti-resonance oscillators. (5) Design examples together with experimental evaluation data covering most of the 1 KC to 200 MC range. (Author).

The Law of Debtors and Creditors Elizabeth Warren,Jay Lawrence Westbrook,Katherine Porter,John Pottow,2020-11-01 One of the leading casebooks in the field, The Law of Debtors and Creditors features 39 problem sets with realistic questions a lawyer considers in managing a bankruptcy case. It also challenges the students with the major policy and theoretical questions in the field. The text features a functional organization as a bankruptcy case would unfold. The focus is on teaching through the realistic problems, complete with ethical difficulties embedded into the fact patterns. The presentation is lively and colloquial. Explanatory text throughout makes bankruptcy law accessible to students and easier to teach. Because it divides the subject between consumer and business bankruptcy, professors can select the depth of coverage for each subject in designing a two-, three-, or four-credit class. The authors—Senator Elizabeth Warren, Congresswoman Katie Porter, and Professors Pottow (Michigan) and Westbrook (Texas)—are among the most prominent in the field. Uniquely comprehensive Teacher's Manual—chock full of material on how to design class around the problem sets, citations to new cases and literature, and suggestions for steering class discussion. New to the Eighth Edition: The emergence of a whole new form of chapter 11 bankruptcy, the Small Business Reorganization Act in subchapter V, just as the Covid19 crisis exploded The impact of recent Supreme Court decisions, including Jevic, Merit Management, Midland Funding, and Wellness New cases and issues since the Seventh Edition Updated materials on § 363 sales Incorporation of discussion of ABI Commission on Consumer Bankruptcy Reform A number of interesting new problems Professors and students will benefit from: Separation of consumer bankruptcy from business bankruptcy—professors can select the depth of coverage for each subject Lively explanatory text—makes bankruptcy law accessible to students and easier to teach Engagement of current events and economic trends Discussion of many recent cases 39 problem sets—featuring the realistic questions a lawyer considers in applying the statutory provisions in a bankruptcy case Substantial discussion of the ethical questions that arise in bankruptcy practice, and including ethical issues in the problems students must solve Functional organization—as a bankruptcy case would unfold rather than using some artificial paradigm Chapters specifically devoted to bankruptcy theory (consumer and business), to international insolvencies, and to important ethics issue in the consumer and business contexts Problem sets designed to combine doctrinal, transactional, and theoretical issues

Population-Based Approaches to the Resource-Constrained and Discrete-Continuous Scheduling Ewa Ratajczak-Ropel,Aleksander Skakovski,2017-08-21 This book addresses two of the most difficult and computationally intractable classes of problems: discrete resource constrained scheduling, and discrete-continuous scheduling. The first part of the book discusses problems belonging to the first class, while the second part deals with problems belonging to the second class. Both parts together offer valuable insights into the possibility of implementing modern techniques and tools

with a view to obtaining high-quality solutions to practical and, at the same time, computationally difficult problems. It offers a valuable source of information for practitioners dealing with the real-world scheduling problems in industry, management and administration. The authors have been working on the respective problems for the last decade, gaining scientific recognition through publications and active participation in the international scientific conferences, and their results are obtained using population-based methods. Dr E. Ratajczk-Ropel explores multiple agent and A-Team concepts, while Dr A. Skakovski focuses on evolutionary algorithms with a particular focus on the population learning paradigm.

My Next Step Dave Liniger, 2013-04-23 *My Next Step* is a remarkable memoir of one man coming face to face with the darkest moments of his life and how, through his own drive and the unwavering support of family and friends, he never succumbed to despair. Dave Liniger had it all: four successful children, a lifetime filled with adventure, and a company he'd founded, RE/MAX, that became one of the most prominent real estate brands in the world and made him a success beyond his wildest dreams. He had served in the Vietnam War, parachuted out of planes, raced cars, and once even attempted to circumnavigate the world in a balloon. And then overnight his full and varied life almost came to an abrupt end. Doctors discovered he had a horrific staph infection along his spine that left him paralyzed from the neck down and in excruciating pain. *My Next Step* chronicles how Dave found reserves of strength to fight through his pain. He drew inspiration from his wife, Gail, who had shown incredible grace and courage during her recovery from a tragic airplane crash twenty-nine years earlier. His guiding light was the mantra, "Just 10 steps." If he could take 10 steps, he could take 20. If he could take 20, he could walk a mile. After three critical surgeries and six grueling months in the hospital, Dave finally returned home. He continues to heal, but is back running the company he loves and getting stronger every day. *My Next Step* will inspire those facing tragedy to find the courage to accept their situation and do what's necessary to take the next step toward a meaningful life.

Cosmic Rays in the Earth's Atmosphere and Underground Lev Dorman, 2013-03-19 The present monograph as well as the next one (Dorman, M2005) is a result of more than 50 years working in cosmic ray (CR) research. After graduation in December 1950 Moscow Lomonosov State University (Nuclear and Elementary Particle Physics Division, the Team of Theoretical Physics), my supervisor Professor D. I. Blokhintsev planned for me, as a winner of a Red Diploma, to continue my education as an aspirant (a graduate student) to prepare for Ph. D. in his very secret Object in the framework of what was in those times called the Atomic Problem. To my regret the KGB withheld permission, and I, together with other Jewish students who had graduated Nuclear Divisions of Moscow and Leningrad Universities and Institutes, were faced with a real prospect of being without any work. It was our good fortune that at that time there was being brought into being the new Cosmic Ray Project (what at that time was also very secret, but not as secret as the Atomic Problem), and after some time we were directed to work on this Project. It was organized and headed by Prof. S. N. Vernov (President of All-Union Section of Cosmic Rays) and Prof. N. V. Pushkov (Director of IZMIRAN); Prof. E. L. Feinberg headed the theoretical part of the Project.
