Computer Analysis of Images and Patterns André Gagalowicz, 2005-08-30 This volume presents the proceedings of the 11th International Conference on Computer Analysis of Images and Patterns (CAIP 2005). This conference series started about 20 years ago in Berlin. Initially, the conference served as a forum for meetings between scientists from Western and Eastern-block countries. Nowadays, the conference attracts participants from all over the world. The conference gives equal weight to posters and oral presentations, and the selected presentation mode is based on the most appropriate communication medium. The program follows a single-track format, rather than parallel sessions. Non-overlapping oral and poster sessions ensure that all attendees have the opportunity to interact personally with presenters. As for the numbers, we received a total of 185 submissions. All papers were reviewed by two to four members of the Program Committee. The final selection was carried out by the Conference Chairs. Out of the 185 papers, 65 were selected for oral presentation and 43 as posters. CAIP is becoming well recognized internationally, and this year's presentations came from 26 different countries. South Korea proved to be the most active scientifically with a total of 16 accepted papers. At this point, we wish to thank the Program Committee and additional referees for their timely and high-quality reviews. The paper submission and review procedure was carried out electronically. We also thank the invited speakers Reinhardt Koch and Thomas Vetter for kindly accepting to present invited papers.

Comparative Reflections on Persons and Selves Pavel Stankov, Michael Dufresne, 2023-06-14 What matters in personal survival? What makes self-awareness possible? If there is no permanent self, should we be altruistic? These and other questions were tackled by the international participants in the 2018 Uehiro Graduate Student Philosophy Conference at University of Hawai'i at Mānoa. Their responses explore the subject of subjecthood from interdisciplinary and comparative perspectives. Some approach it from an analytic point of view, others from a historical, and as many as five draw from non-Western traditions to argue their points. We have selected seven of the 21 papers presented at the conference. Given their comparative scope, they provide a slightly unusual sample of the discussions in philosophy of self and personhood today. The collection would be of interest not only to graduate students and professional philosophers, but also to anyone curious about the comparative methods used to investigate the self in philosophy.

Computational Science and Its Applications - ICCSA 2004 Antonio Laganà, Marina L. Gavrilova, Vipin Kumar, Youngsong Mun, C.J. Kenneth Tan, Osvaldo Gervasi, 2004-04-29 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems. For this reason Computational Science, though originating from the need to solve the most challenging problems in science and engineering (computational science is the key player in the fight to gain fundamental advances in astronomy, biology, chemistry, environmental science, physics and several other scientific and engineering disciplines) is increasingly turning its attention to all fields of human activity. In all activities, in fact, intensive computation, information handling, knowledge synthesis, the use of ad-hoc devices, etc. increasingly need to be exploited and coordinated regardless of the location of both the users and the (various and heterogeneous) computing platforms. As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications (ICCSA 2004) held in Assisi, Italy, May 14–17, 2004.

Image Analysis and Recognition Aurélio Campilho, Mohamed Kamel, 2004-09-14 ICIAR 2004, the International Conference on Image Analysis and Recognition, was the first ICIAR conference, and was held in Porto, Portugal. ICIAR will be organized annually, and will alternate between Europe and North America. ICIAR 2005 will take place in Toronto, Ontario, Canada. The idea of offering these conferences came as a result of discussion between researchers in Portugal and Canada to encourage collaboration and exchange, mainly between these two countries, but also with the open participation of other countries, addressing recent advances in theory, methodology and applications. The response to the call for papers for ICIAR 2004 was very positive. From 316 full papers submitted, 210 were accepted (97 oral presentations, and 113 posters). The review process was carried out by the Program Committee members and other reviewers; all are experts in various image analysis and recognition areas. Each paper was reviewed by at least two reviewing parties. The high quality of the papers in these proceedings is attributed first to the authors, and second to the quality of the reviews provided by the experts. We would like to thank the authors for responding to our call, and we wholeheartedly thank the reviewers for their excellent work in such a short amount of time. We are especially indebted to the Program Committee for their efforts that allowed us to set up this publication. We were very pleased to be able to include in the conference, Prof. Murat Kunt from the Swiss Federal Institute of Technology, and Prof. Mário Figueiredo, of the Instituto Superior Técnico, in Portugal.

Articulated Motion and Deformable Objects Francisco J. Perales, Robert B. Fisher, 2006-07-18 This book constitutes the refereed proceedings of the 4th International Conference on Articulated Motion and Deformable Objects, AMDO 2006, held in Port d'Andratx, Mallorca, Spain, in July 2006. Presents 53 carefully selected and revised full papers on topics including geometric and physical deformable models, motion analysis, articulated models and animation, modelling and visualisation of deformable models, deformable models applications, motion analysis applications, single or multiple human motion analysis and synthesis, and more.

Living on Centauri Donald Krueger, 2019-11-26 The story begins some 300 years ago when the planet Centauri sent a tiny spaceship to Earth. The saga began from a discovery that the two planets, were created identically. This book is the final chapter evolving from the first three in the storyline. Background would be revealed by reading the first three, i.e.: "Hush Sisters Hush", "Music for Centauri", and "The Search for Tesla". All of which are available in eBooks and paperbacks. This book is a continuation with all the same characters. This story is about adapting to living on a new planet, since circumstances on Earth gave grave concern for remaining. The 40 times lightspeed spacecraft made the two-month journey in a luxury comparable to a cruise ship. Now they fit in nicely and live in the mansion of the woman who started it all. They are now among a populous with life expectancies approaching 1000 years. Physical appearances have no identifiers that are discernable, except the slow growth of children. On Centauri there is but one culture and no religions. The global population is 150 million and has but one language. So, now with interest in Earth waning, the Council of Centauri wants to utilize this marvelous spacecraft to search the galaxy for life beyond what has before been limited to sub-lightspeed vehicles. They decided on a ten-year expedition with a crew of seven only to find that the cosmos has little to offer except months of boredom.

Latin American Science Fiction M. Ginway, J. Brown, 2012-12-05 Combining work by critics from Latin America, the USA, and Europe, Latin American Science Fiction: Theory and Practice is the first anthology of articles in English to examine science fiction in all of Latin America, from Mexico and the Caribbean to Brazil and the Southern Cone. Using a variety of sophisticated theoretical approaches, the book explores not merely the development of a science fiction tradition in the region, but more importantly, the intricate ways in which this tradition has engaged with the most important cultural and literary debates of recent years.

Steak Diana Ross David McVay, 2013-04-19 For those of us who came from the Seventies, it should be obligatory reading. But younger folk should take a look too, for it beautifully captures a bygone era - Brian Viner, The Independent There is a rough edge to his diary that reinforces its immediacy and credibility... a funny and fascinating document - Michael Parkinson, The Daily Telegraph

Magic Compositions Leoni Robens, 2024-01-11 The book contains a selection of 40 amazing poems about fairy folks. It guarantees to fill your moments with promise and quench your thirst for quirky and enjoyable stanzas of poetry! Poems like Creepy Addam's Family come from Eden's ancestors The Mermaid's Red Umbrella, The Conch Sea Shell Wife, The Doll House in the Attic, The Walrus and the

Carpenter, Cowboy Django, The Hoarders, The Spider and the Fly weaving his many webs of enticing romance, The Monkey and the Groundnut, Snye the Ghost Potter, his divine wraith spectre pots and the headless Pumpkin King of Halloween, Twenty Five High Rise Storey The Baobab Tree and its ghastly residents Short poetries like The Halloween Moon, Sanyasi Pigeon and Brahmi the Star, Princess Gravity and Prince Light, The Dragon and the Gingerbread Man, Voodoo Doll, The Little Mermaid Cries, 'The Bandra Fair' and many more to mystify and amaze you! Enjoy!

Advances in Multimedia Information Processing - PCM 2005 Yo-Sung Ho, Hyoung Joong Kim, 2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

The Blues Come to Texas, 2019-02-28 From October 1959 until the mid-1970s, Paul Oliver and Mack McCormick collaborated on what they hoped to be a definitive history and analysis of the blues in Texas. Both were prominent scholars and researchers—Oliver had already established an impressive record of publications, and McCormick was building a sprawling collection of primary materials that included field recordings and interviews with blues musicians from all over Texas and the greater South. Despite being eagerly awaited by blues fans, folklorists, historians, and ethnomusicologists who knew about the Oliver-McCormick collaboration, the intended manuscript was never completed. In 1996, Alan Govenar, a respected writer, folklorist, photographer, and filmmaker, began a conversation with Oliver about the unfinished book on Texas blues. Subsequently, Oliver invited Govenar to assist him, and when Oliver became ill, Govenar enlisted folklorist and ethnomusicologist Kip Lornell to help him contextualize and document the existing manuscript for publication. *The Blues Come to Texas: Paul Oliver and Mack McCormick's Unfinished Book* presents an unparalleled view into the minds and methods of two pioneering blues scholars.

Xerox Ferox John Szpunar, 2013-10-08 A scene that influenced generations of writers, filmmakers and fans, XEROX FEROX is the first book to cover the horror film fanzine and the culture it spawned. From Famous Monsters of Filmland to Fangoria and everything in between, XEROX FEROX is much more than a book about monster magazines. It examines the home-grown DIY fanzines that dared to dig deeper than the slick and shiny newsstand mags ever would... or indeed even could. The titles are as lurid as the films that they covered. Gore Gazette. Deep Red. Sleazoid Express. Before message boards, before blogs, before the Internet itself, the fanzine reigned as the chief source of news and information for horror fans worldwide. Often printed on the cheap and sold for the price of postage, madcap and irreverent mags like Slimetime, Subhuman and Shock Xpress travelled the globe, creating a thriving network of fans and professionals alike. XEROX FEROX traces the rise of the horror film fanzine, from the Famous Monster-starved kids of the 1960s to the splatter-crazed gorehounds that followed. Featuring in-depth interviews with fifty writers, editors, and industry pros, XEROX FEROX is the final word on an era that changed the world of fandom forever.

La casa dei segreti Chris Columbus, Ned Vizzini, 2013-10-21 T00:00:00+02:00 Una casa stregata. Uno scrittore svitato. Tre fratelli intrappolati nelle pagine di un libro spaventoso e fantastico.

Critters from Outer Space Mary Jean Gasper, 2012-10-09 On the night of Halloween the Junebugs thought it would be fun to stay out pass midnight.

Steak Diana Ross II David McVay, 2017-01-19 The sequel to David McVay's highly-acclaimed Steak Diana Ross: Diary of a Football Nobody, has been delivered with all the alacrity of the author's prodigious goalscoring acumen: one every 14 years or so. Titled as creatively as his midfield passes, Steak Diana Ross II: Further diaries of a Football Nobody sees the former Notts County player revisit the 1970s in Nottingham a little later in the decade that discovered prog rock but discarded style while Jimmy Sirrel has returned to Notts County for a second spell with the Magpies rooted in the Division Two relegation zone... and though little has altered at the club in many respects, by the end of the book, the winds of change are about to blow through the domestic game. Britain would be welcoming its first AGBP1million footballer and its first woman Prime Minister. Things could never be the same again.

Busby's Last Crusade Jeff Connor, 2020-12-01 A pictorial history of Manchester United's rise from the 1958 Munich air disaster to a European Cup win ten years later, and the manager who led them there. With words from best-selling author Jeff Connor and over 200 images, many of them new to the public, this is one man's search for his personal Holy Grail, and his determination to get there. This is not a eulogy for Sir Matt Busby. As Connor points out, his roles as a club director after 1968 will always be questioned and that King Arthur would never have succeeded without his knights: Duncan Edwards, Roger Byrne, Bobby Charlton, George Best, Denis Law and, above all, Jimmy Murphy. All of these, and others, lighten the pages of a book certain to be seen by fans everywhere as a permanent memoir of an unforgettable era.

Citadel: First Colony Kevin Tumlinson, 2010-02-22 Crashing is the easy part. Book One of the Citadel Series It's been more than a century since humanity escaped the overpopulation of Earth, expanding out among the stars. We've faced and overcome war with an alien race. We've survived terrorist attacks meant to end colonization. We've thrived despite unregulated class distinctions, separating the wealthy from the working class. What comes next may be the end of it all. A lone colony of human castaways, led by a former alien enemy, find themselves at the mercy of a saboteur and a plot to end humanity's unrestricted travel among the stars. This could be the finale of the colonies and the end of a species. Everything depends on how smart - and how forgiving - humanity can actually be. This series is like LOST meets Andy Weir's 'The Martian.' Funny. Action packed. Full of mystery and packed with characters you love from page one. Groundbreaking work, ready for the science fiction hall of fame! Praise for Citadel: First Colony There was something so fascinating about this story and the cast of characters he put together. - Leah Petersen, Author of Fighting Gravity This well written science fiction story will capture your interest on page one and won't let go until you finish. The characters are mysterious, fascinating, and likable. - James Chalk, Author of Meat Market Tumlinson managed to inject quirkiness and humor that was both unexpected and gave the characters even more depth. - JoAnn Takasaki, Author of Luau Like a Local: The Easy Way" It has all the humor, complexity and charm of books by Andy Weir and Hugh Howey — a rich scifi landscape that constantly surprises and keeps you turning page after page.
