The workshop goals were to examine (a) the action items included in the section on Transportation and Borders in the May 2006 National Pandemic Plan that directly or indirectly affect air transportation, (b) the current state of the practice for pandemic planning by airports and airlines, (c) coordination among various agencies and the aviation sector to implement these plans, and (d) potential areas for public private sector cooperation in pandemic planning. To plan the workshop, TRB assembled a committee appointed by the National Research Council to organize and develop the workshop program.

Business Process Management John Jeston,2014-01-21 Business Process

Management, a huge bestseller, has helped thousands of leaders and BPM practitioners successfully implement BPM projects, enabling them to add measurable value to their organizations. The book's runaway success can be attributed partly to its overview of all major useful frameworks (such as LEAN and Six Sigma) without over-investment in one over another, and a unique emphasis on BPM's interrelationship with organizational management, culture and leadership—BPM is about people as much as processes. Its common-sense approach teaches how BPM must be well-integrated across an entire business if it's to be successful: augmented and aligned with other management disciplines. This highly anticipated third edition brings Jeston and Nelis' practicable frameworks and solutions up-to-date with the latest developments in BPM, including the application of the frameworks to value-driven BPM. This thoroughly revised and updated new edition includes: • Enhanced pedagogy to help students learn and tutors use the book for their classes: now includes learning outcomes, chapter topics, learning objectives, highlighted key points, chapter summaries, critical discussion points and self-test questions • New and revised case studies throughout • New chapters on questions that have become more crucial since the second edition's publication: How should we start—top-down or bottom-up? Should we be customercentric? How does BPM link to today's most pertinent management and technology issues? What are the critical success factors? • Due to popular demand, a new and expanded section on IT in BPM • A brand new companion website including slides and assignment

Language Assessment Literacy for In-Service Teachers Giraldo, Frank,2024-02-08 In the field of language testing, there is a growing interest regarding pedagogical approaches to problematize and foster teachers' Language Assessment Literacy (LAL). Although relevant LAL research studies report on the contents and teaching methodologies of assessment courses, few report on their entire design, implemen- tation, and evaluation stages. In Language Assessment Literacy for In-Service Teachers: Online

Course Planning and Implementation, the author describes and discusses a systematic approach to plan, teach, and evaluate an online language assessment course for English language teachers in the coffee region of Colombia. In particular, the book explores the following LAL issues: • A discussion of LAL and teachers' professional development, with an emphasis on proposed pedagogies for fostering LAL. • An empirical approach to drawing these teachers' LAL, designing the online course and accompanying materials, implementing the course, and evaluating it. • Ideas for teaching assessment to language teachers and assessing their LAL. in online environments. • Numerous tasks for teacher educators to problematize their own courses for teachers' LAL. • Sample data collection instruments and pedagogical materials to elicit and activate teachers' LAL. Throughout the book, the author constantly invites teacher educators to analyze his proposed approach, while highlighting the challenges and implications inher ent in the enterprise of developing online courses to cultivate teachers' LAL. In conclusion, this book offers conceptual, pedagogical, and research insights into LAL pedagogies involving in-service language teachers

The Star Gate Archives Edwin C. May,Sonali Bhatt Marwaha,2019-07-29 Star Gate is the largest funded program in the history of psi research receiving about $19.933 million in funding from 1972 to 1995. Researchers from SRI International, and later at Science Applications International Corporation, in association with various U.S. intelligence agencies participated in this program. Using the remote viewing method, research focused on understanding the applicability and nature of psi in general but mostly upon informational psi. Volume 1: Remote Viewing (1972-1984) and Volume 2: Remote Viewing (1985-1995) include all aspects of RV including laboratory trials and several operational results. Volume 3: Psychokinesis focuses on laboratory investigations. Volume 4: Operational Remote Viewing: Government Memorandums and Reports includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind the scenes activities of Star Gate. In a total of 504 separate missions from 1972 to 1995, remote viewing produced actionable intelligence prompting 89 percent of the customers to return with additional missions. The Star Gate data indicate that informational psi is a valid phenomenon. These data have led to the

development of a physics and neuroscience based testable model for the underlying mechanism, which considers informational psi as a normal, albeit atypical, phenomenon. The Star Gate data found insufficient evidence to support the causal psi (psychokinesis) hypothesis.
