Coloured Sheep Irina Böhme,Saskia Dittgen,2019-04-25 Some skill, some luck and lots of fun: sheep colour genetics is like a game of cards! This book explains the rules of the game. Assuming no previous knowledge, the book uses a game of cards to visualise the rules that govern colour genetics, introducing terminology on the way. What are genes and alleles? What is the phenotype of a sheep? What the genotype? The reader is introduced to agouti-pattern, base colour, and spotting and strategies are shown to identify them in the reader's own flock. This knowledge is expanded to show how it can be used to plan breeding for certain colours. More genes that influence colour are introduced later in the book and thought is given to preserving diversity within a breed while strategically increasing the presence of desirable traits in a flock. The book focuses on practical aspects. How to identify genotypes? Which animals should be used for test breeding? How can the knowledge be used for individual goals? Written by a molecular biologist and science communicator and co-written by a professional editor of scientific textbooks - both of them breeders of coloured sheep - this book uses an easily understandable approach to explaining colour genetics.

Shelby Sheep Marina Tito,2013-09-07 In Shelby Sheep in Color Me Happy, published by Good Puppy, Marina Tito and Lorenzo Di Alessandro draw up a little black sheep for a colorful educational tale. Shelby was the only black sheep in her herd, which made her friends jealous as they all wished to be unique. So, Shelby suggests they play with some paints to find their own colors. As the sheep jump into the paint buckets, they don't like what they become, orange like an orange, green as an olive or purple like a grape. It isn't easy to be different, what will mom say? So, Shelby suggests they jump into the third color to turn them all a dark brown. The sheep abide and love the results, since now they all match! No longer concerned with their coats, they all continue to search for their personal color, since mixing them has become their favorite game. Shelby Sheep in Color Me Happy is a guide to the simple magic of mixing colors, which launches a seekers' quest for beauty of divine inspiration, leaving the material focus of coats behind. Recommended for children, ages 3 to 7, or anyone wishing to learn to mix colors.

Sheep Production Adapting to Climate Change Veerasamy Sejian,Raghavendra Bhatta,John Gaughan,Pradeep Kumar Malik,S.M.K Naqvi,Rattan Lal,2017-06-20 This book presents a compilation of the latest findings from reputed researchers around the globe, covering in detail climate change and its effects on sheep production. In the current global climate change scenario, information related to its impact on livestock agriculture is lacking. The negative impacts of climate change are already being felt by all livestock species. Further, the mitigation and amelioration strategies that are applicable for one species may not hold true for another. As such, concerted research efforts are needed to identify species-specific strategies for mitigation and adaptation. With that goal in mind, this book is the first of its kind to gather comprehensive information pertaining to the impact of climate change on various aspects of sheep production. It also sheds light on the role of sheep with regard to the global greenhouse gas pool. The book highlights the status quo of sheep production from climate change perspectives and projects the significance of adapting future sheep production to the challenges posed by climate change. It addresses in detail the various adaptations, methane mitigation and amelioration strategies needed to sustain sheep production in the future. In addition, the book presents development plans and policies that will allow the sheep industry to cope with current climate changes and strategies that will lessen future impacts. Bringing together essential information prepared by world-class researchers hailing from different agro-ecological zones, this book offers a unique resource for all researchers, teachers and students associated with sustaining the sheep production in the face of global change.
