The Humanities Computing Yearbook 1989-1990 Ian Lancashire, 1991 This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities. Like its predecessor, this volume provides a taxonomy of the field and an annotated survey of publications, research centers, text archives and termbanks, electronic communications, software, and hardware relevant to the humanities. It also includes special larger entries for important software that offer up-to-date information, and practical help in applying that information to research projects and instruction in colleges and universities. For the 1989-1990 edition, Lancashire has, for the first time, appointed an international advisory board of specialists to assist in discovering, assembling, and evaluating materials for inclusion; and, to keep up with the rapidly developing nature of the field and its international constituency, Lancashire has included many completely new or revised sections, including a major new chapter on computing in Law. A monumental work of current and enduring value, The Humanities Computing Yearbook will prove invaluable to a wide range of students, teachers, and researchers in humanities and social sciences, computational linguistics, and related fields in computer science.

Single-Word Reading Elena L. Grigorenko, Adam J. Naples, 2012-09-10 As the first title in the new series, New Directions in Communication Disorders Research: Integrative Approaches, this volume discusses a unique phenomenon in cognitive science, single-word reading, which is an essential element in successful reading competence. Single-word reading is an interdisciplinary area of research that incorporates phonological, orthographic, graphemic, and semantic information in the representations suitable for the task demands of reading. Editors Elena L. Grigorenko and Adam J. Naples have organized a collection of essays written by an outstanding group of scholars in order to systematically sample research on this important topic, as well as to describe the research within different experimental paradigms. Single-Word Reading provides an introduction to unfamiliar areas of research, and is an inspiration for future study. The introductory chapter sets up a contextual stage for connections between spoken and written word processing, the stage-based nature of their development, and the role of education. Succeeding chapters address visual word processing; the role of morphology in word recognition; the role of lexical representation; the biological bases of single-word reading and related processes; and more. Reading researchers will take interest in this substantial book, as will professionals and practitioners linked to the teaching of reading in the departments of school psychology, special education, communication disorders, neuroscience, cognitive science, linguistics, and reading.

Approaching Dialogue Per Linell, 1998 Approaching Dialogue has its primary focus on the theoretical understanding and empirical analysis of talk-in-interaction. It deals with conversation in general as well as talk within institutions against a backdrop of Conversation Analysis, context-based discourse analysis, social pragmatics, socio-cultural theory and interdisciplinary dialogue analysis. People's communicative projects, and the

structures and functions of talk-in-interaction, are analyzed from the most local sequences to the comprehensive communicative activity types and genres. A second aim of the book is to explore the possibilities and limitations of dialogism as a general epistemology for cognition and communication. On this point, it portrays the dialogical approach as a major alternative to the mainstream theories of cognition as individually-based information processing, communication as information transfer, and language as a code. Stressing aspects of interaction, joint construction and cultural embeddedness, and drawing upon extensive theoretical and empirical research carried out in different traditions, this book aims at an integrating synthesis. It is largely interdisciplinary in nature, and has been written in such a way that it can be used at advanced undergraduate courses in linguistics, sociopragmatics of language, communication studies, sociology, social psychology and cognitive science. About the author: Per Linell holds a Ph.D. in linguistics and has been professor within the interdisciplinary graduate program of Communication Studies at the University of Linköping, Sweden, since 1981. He has published widely in the fields of discourse studies and social pragmatics of language.

The Crow-Girl Bodil Bredsdorff, 2015-05-05 A timeless novel about the kindness of strangers Near a little cove where a brook runs out to the sea live a girl and her grandmother. All alone with no neighbors at all, the two lead a peaceful existence. They have a house, dine on sea kale and mussels and sand snails, and build fires from driftwood. But the grandmother is very old. When the time comes that the girl must bury the woman, she makes up a funeral song about the birds she is watching: Two crows never fly alone, and death is never, ever past. The next day the same crows seem to beckon her, and so the Crow-Girl begins her journey, one in which she will meet people both warm and cold, hurt and hurtful. And the Crow-Girl, before she knows it, has the makings before her of a new family . . . This lyrical story, with its characters' moments of darkness always overcome through incredible humanity, introduces a strong new voice for American readers.

Violent Non-State Actors in Africa Caroline Varin, Dauda Abubakar, 2017-04-24 This book explores the rise and impact of violent non-state actors in contemporary Africa and the implications for the sovereignty and security of African states. Each chapter tackles a unique angle on violent organizations on the continent with the view of highlighting the conditions that lead to the rise and radicalization of these groups. The chapters further examine the ways in which governments have responded to the challenge and the national, regional and international strategies that they have adopted as a result. Chapter contributors to this volume examine the emergence of Islamist terrorists in Nigeria, Mali and Libya; rebels in DR Congo, Central African Republic, Ethiopia and Rwanda; and warlords and pirates in Somalia, Uganda and Sierra Leone.

Women Composers of Classical Music Mary F. McVicker, 2011-02-14 As early as the 1500s, a surprising number of women have composed classical music. Many were successful, finding venues for both publishing and performing their music; others found the social barriers for women impossible to overcome. This book provides access to these composers, both well known and obscure.

Arranged chronologically by era, the profiles are further divided into countries. For each female composer within a country, a brief biographical sketch is provided, as well as a description of her body of work. This text also includes an extensive timeline of operatic works by female composers.

Teaching Word Meanings Steven A. Stahl, William E. Nagy, 2007-07-10 Learning new words is foundational to success in school and life. Researchers have known for years that how many word meanings a student knows is one of the strongest predictors of how well that student will understand text and be able to communicate through writing. This book is about how children learn the meanings of new words (and the concepts they convey) and how teachers can be strategic in deciding which words to teach, how to teach them, and which words not to teach at all. This book offers a comprehensive approach to vocabulary instruction. It offers not just practical classroom activities for teaching words (though plenty of those are included), but ways that teachers can make the entire curriculum more effective at promoting students' vocabulary growth. It covers the 'why to' and 'when to' as well as the 'how to' of teaching word meanings. Key features of this exciting new book include: *A variety of vocabulary activities. Activities for teaching different kinds of words such as high frequency words, high utility words, and new concepts, are explained and illustrated. *Guidelines for choosing words. A chart provides a simple framework built around seven basic categories of words that helps teachers decide which words to teach and how to teach them. *Word learning strategies. Strategies are offered that will help students use context, word parts, and dictionaries more effectively. *Developing Word Consciousness. Although specific vocabulary instruction is fully covered, the primary goal of this book is to develop students' independent interest in words and their motivation to learn them. *Integrated Vocabulary Instruction. Teachers are encouraged to improve the reading vocabularies of their students by looking for opportunities to integrate vocabulary learning into activities that are undertaken for other purposes.

The Birds Tarjei Vesaas, 2016-05-24 Set in the Norwegian countryside over the course of one summer, *The Birds* tells the story of forty-year-old Mattis, who has mental disabilities and lives in a small house near a lake with his sister Hege, who ekes out a modest living knitting sweaters. From time to time Hege encourages her brother to find work to ease their financial burdens, but Mattis's attempts to work at the surrounding farms always end in failure and disgrace. Mattis is keenly aware of the distance between himself and the world around him, which often feels hostile; the villagers call him Simple Simon. Profoundly sensitive to his surroundings, Mattis spends much of his time in the forest, reading its signs and symbols: A woodcock begins a daily flight over their house, a beautiful bird is waiting for him on the path one day when he returns from the store, and one afternoon lightning strikes one of the two withered aspen trees outside the house -- trees known in the village as Mattis-and-Hege. When Mattis decides to employ himself as a ferryman, the only passenger he manages to bring across the lake is a lumberjack, Jørgen. When Jørgen and Hege become lovers, Mattis finds he cannot adjust to this new situation. Wholly reliant on Hege and terrified of losing her, he clings to the familiar and does everything in his power to make Jørgen leave. Simultaneously, he struggles to find a place for himself in a world that does not seem to want him. With spare simplicity, Vesaas's straightforward prose subtly reveals Mattis's perspective and readers will find themselves shifting irrevocably from observers of his experience to participants in it. Written by one of Norway's most celebrated and beloved authors, *The Birds* is a deeply nuanced examination of identity and responsibility, with abundant narrative suspense and hauntingly beautiful writing besides.

Sociology and Military Studies Joseph Soeters, 2018-03-14 This book examines the connection between sociology and the challenges faced by the modern military. Military sociology has received little attention in the broader academic world, and is mostly focused on civil-military relations. This book seeks to address this gap and combines ideas, theories and insights from sociology's founding authors, with each chapter focusing on a specific thinker. There are chapters on Max Weber, Emile Durkheim, Karl Marx, Georg Simmel, Jane Addams, W. E. B. Du Bois, Erving Goffman, Michel Foucault, Morris Janowitz, Norbert Elias, Cornelis Lammers, Arlie Russell Hochschild, Cynthia Enloe and Bruno Latour, and each essay discusses their ideas and theories in relation to topics that are of concern in and around the military today. Military studies are taken in a broad sense here, so the volume encompasses a wide range of issues, including civil-military relations, military-political affairs, performance and outcomes of military operations, and organizational arrangements including technology and the composition, performance and well-being of personnel. The book intends to provide views and insights that will help the military to innovate their organizations and practices, not necessarily in the usual functional way of innovating (i.e. faster, more precise, etc.) but in a broader way. This book will be of great interest to students of sociology, military studies, civil-military relations, war and conflict studies, and IR in general.
