Networked Control Systems for Connected and Automated Vehicles Alexander Guda,2022-11-15 This book is a collection of the latest research findings in such areas as networked multi-agent systems, co-design of communication and control,

distributed control strategies that can cope with asynchrony between local loops, event-triggered control, modelling of network infrastructure, novel concepts of distributed control for networked and cyber-physical systems. The book contains the result of the latest research in the field of communication and control system design to support networked control systems with stringent real-time requirements. It introduces readers to research in the field of joint design of the control and communication protocol and presents the latest developments in the area of novel optimal control and scheduling designs under resource constraints. The book also covers the issues of creating emerging information and communication technologies for traffic estimation and control, connected and autonomous technology applications and modelling for commercial and shared vehicle operations. The reader will find information on emerging cyber-physical systems, networked multi-agent systems, large-scale distributed energy systems, as well as on real-time systems, safety and security systems. A significant block of studies is devoted to the topic of transitions towards electrification and automation of vehicles. Modern concepts of road infrastructure construction are described in detail in the presented research papers. Automotive industry professionals will be particularly interested in the sections on the novel mechanisms for medium access in multi-hop wireless networks with real-time requirements, optimal layering architecture and co-design for wireless communication. The book will be

incredibly interesting for researchers interested in human-digital interfaces, industrial Internet of Things, artificial intelligence and machine learning.

Hacking Multifactor Authentication Roger A. Grimes, 2020-10-27 Protect your organization from scandalously easy-to-hack MFA security “solutions” Multi-Factor Authentication (MFA) is spreading like wildfire across digital environments. However, hundreds of millions of dollars have been stolen from MFA-protected online accounts. How? Most people who use multifactor authentication (MFA) have been told that it is far less hackable than other types of authentication, or even that it is unhackable. You might be shocked to learn that all MFA solutions are actually easy to hack. That’s right: there is no perfectly safe MFA solution. In fact, most can be hacked at least five different ways. **Hacking Multifactor Authentication** will show you how MFA works behind the scenes and how poorly linked multi-step authentication steps allows MFA to be hacked and compromised. This book covers over two dozen ways that various MFA solutions can be hacked, including the methods (and defenses) common to all MFA solutions. You’ll learn about the various types of MFA solutions, their strengths and weaknesses, and how to pick the best, most defensible MFA solution for your (or your customers') needs. Finally, this book reveals a simple method for quickly evaluating your existing MFA solutions. If using or developing a secure MFA solution is important to you, you need this book.

Learn how different types of multifactor authentication work behind the scenes See how easy it is to hack MFA security solutions—no matter how secure they seem Identify the strengths and weaknesses in your (or your customers') existing MFA security and how to mitigate Author Roger Grimes is an internationally known security expert whose work on hacking MFA has generated significant buzz in the security world. Read this book to learn what decisions and preparations your organization needs to take to prevent losses from MFA hacking.

Cybersecurity Crisis Management and Lessons Learned From the COVID-19 Pandemic Abassi, Ryma, Ben Chehida Douss, Aida, 2022-04-15 The COVID-19 pandemic has forced organizations and individuals to embrace new practices such as social distancing and remote working. During these unprecedented times, many have increasingly relied on the internet for work, shopping, and healthcare. However, while the world focuses on the health and economic threats posed by the COVID-19 pandemic, cyber criminals are capitalizing on this crisis as the world has become more digitally dependent and vulnerable than ever. *Cybersecurity Crisis Management and Lessons Learned From the COVID-19 Pandemic* provides cutting-edge research on the best guidelines for preventing, detecting, and responding to cyber threats within educational, business, health, and governmental organizations during the COVID-19 pandemic. It further highlights the importance of focusing on cybersecurity within organizational crisis

management. Covering topics such as privacy and healthcare, remote work, and personal health data, this premier reference source is an indispensable resource for startup companies, health and business executives, ICT procurement managers, IT professionals, libraries, students and educators of higher education, entrepreneurs, government officials, social media experts, researchers, and academicians.

Research Anthology on Securing Medical Systems and Records Management Association, Information Resources, 2022-06-03 With the influx of internet and mobile technology usage, many medical institutions—from doctor's offices to hospitals—have implemented new online technologies for the storage and access of health data as well as the monitoring of patient health. Telehealth was particularly useful during the COVID-19 pandemic, which monumentally increased its everyday usage. However, this transition of health data has increased privacy risks, and cyber criminals and hackers may have increased access to patient personal data. Medical staff and administrations must remain up to date on the new technologies and methods in securing these medical systems and records. The *Research Anthology on Securing Medical Systems and Records* discusses the emerging challenges in healthcare privacy as well as the technologies, methodologies, and emerging research in securing medical systems and enhancing patient privacy. It provides information on the implementation of these technologies as well as new avenues of medical security research. Covering topics such as biomedical imaging, internet of

things, and watermarking, this major reference work is a comprehensive resource for security analysts, data scientists, hospital administrators, leaders in healthcare, medical professionals, health information managers, medical professionals, mobile application developers, security professionals, technicians, students, libraries, researchers, and academicians.

Entrepreneurial Development and Innovation in Family Businesses and SMEs Masouras,

Andreas, Maris, Georgios, Kavoura,

Androniki, 2020-06-19 Entrepreneurship is very

important for both entrepreneurs and economic

development. It helps boost innovation and

competitiveness in every country and facilitates

the creation of new jobs and new opportunities,

especially for family businesses and small and

medium enterprises (SMEs). Both entrepreneurship

and innovation constitute a subject that is both

topical and timeless, since institutions and the

various institutional processes have always

affected a country's sustainability.

Entrepreneurial Development and Innovation in

Family Businesses and SMEs is an essential

scholarly publication that contributes to the

understanding, improving and strengthening of

entrepreneurial development, and innovation's role

in family businesses and SMEs by providing both

theoretical and applied knowledge in order to find

how and why entrepreneurship and innovation can

produce inefficient and dysfunctional outcomes.

Featuring a wide range of topics such as women

entrepreneurship, internationalization, and

organizational learning, this book is ideal for researchers, policymakers, entrepreneurs, executives, managers, academicians, and students.

Guide on digital agricultural extension and advisory services Food and Agriculture

Organization of the United Nations, 2023-03-30

Digital agricultural extension and advisory services (AEAS) have a great potential to enhance accessibility, delivery, transparency, scope and impacts of information and services for smallholder farmers. However, this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident, widening digital divide between rural and urban areas, gender, and different social groups both within and among regions. Due to low-level e-literacy and digital skills, particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS. Considering the above-mentioned benefits of digital AEAS, their poor uptake by smallholder farmers, and the importance of digital empowerment of smallholder farmers in particular, this guide, targeting smallholder farmers in need of digital AEAS as its principal users, provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools, methods of access to digital AEAS, methods of access to e-commerce, and capacity building.

Cyber Defence in the Age of AI, Smart Societies and Augmented Humanity Hamid Jahankhani, Stefan

Kendzierskyj, Nishan Chelvachandran, Jaime

Ibarra, 2020-04-06 This publication highlights the

fast-moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored, together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase, but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind, such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles, interactions with Critical National Infrastructure (CNI) and the Command, Control, Communications and Intelligence (C3I) decision-making framework. A detailed view of the cyber-attack landscape will be garnered; touching on the tactics, techniques and procedures used, red and blue teaming initiatives, cyber resilience and the protection of larger scale systems. The integration of AI, smart societies, the human-centric approach and Augmented Humanity is discernible in the exponential growth, collection and use of [big] data; concepts woven throughout the diversity of topics covered in this publication; which also discusses the privacy and transparency of data ownership, and the potential dangers of exploitation through social media. As humans are become ever more interconnected, with the prolificacy of smart wearable devices and wearable body area networks, the availability of

and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership, privacy and situational awareness are now at the forefront in this new age.

New Opportunities for Sentiment Analysis and Information Processing Sharaff, Aakanksha, Sinha, G. R., Bhatia, Surbhi, 2021-06-25 Multinational organizations have begun to realize that sentiment mining plays an important role for decision making and market strategy. The revolutionary growth of digital marketing not only changes the market game, but also brings forth new opportunities for skilled professionals and expertise. Currently, the technologies are rapidly changing, and artificial intelligence (AI) and machine learning are contributing as game-changing technologies. These are not only trending but are also increasingly popular among data scientists and data analysts. *New Opportunities for Sentiment*

Analysis and Information Processing provides interdisciplinary research in information retrieval and sentiment analysis including studies on extracting sentiments from textual data, sentiment visualization-based dimensionality reduction for multiple features, and deep learning-based multi-domain sentiment extraction. The book also optimizes techniques used for sentiment identification and examines applications of sentiment analysis and emotion detection. Covering such topics as communication networks, natural language processing, and semantic analysis, this book is essential for data scientists, data analysts, IT specialists, scientists, researchers, academicians, and students.

College Academic Writing A Genre-Based Perspective Dr. I Wy. Dirgeyasa, M.Hum.,2017-01-02
The College Academic Writing: A Genre-Based Perspective course book is organized based on genre perspective. It teaches and trains the students about the writing process and content writing. It also guides them to identify to whom the writing is, for what purpose it is, and to what context it is used. It is commonly understood that in teaching writing to students with low entry level of English proficiency, there is always the risk of sacrificing creativity in order to achieve accuracy, or vice versa. College Academic Writing: A Genre- Based Perspective is designed to guide and help students about the process of writing and the product of the writing itself in such a way that the final work of writing is not only expressive and rich in content but also clear and accurate, as well as relevant to their needs. Handbook of Research on Deception, Fake News, and Misinformation Online Chilawa, Innocent E., Samoilenko, Sergei A., 2019-06-28 The growing amount of false and misleading information on the internet has generated new concerns and quests for research regarding the study of deception and deception detection. Innovative methods that involve catching these fraudulent scams are constantly being perfected, but more material addressing these concerns is needed. The Handbook of Research on Deception, Fake News, and Misinformation Online provides broad perspectives, practices, and case studies on online deception. It also offers deception-detection methods on how to address the challenges of the various aspects of deceptive online communication and cyber fraud. While highlighting topics such as behavior analysis, cyber terrorism, and network security, this publication explores various aspects of deceptive behavior and deceptive communication on social media, as well as new methods examining the concepts of fake news and misinformation, character assassination, and political deception. This book is ideally designed for academicians, students, researchers, media specialists, and professionals involved in media and communications, cyber security, psychology, forensic linguistics, and information technology.

Internet Security Fundamentals Nick Ioannou, 2014-01-14 An easy to understand guide of the most commonly faced security threats any computer user is likely to come across via email, social media and online shopping. This is not aimed at people studying Internet Security or

CISSP, but general users, though still helpful to both. Antivirus software is now incredibly advanced, but the problem of viruses is worse than ever! This is because many viruses trick the user into installing them. The same way that the most sophisticated alarm system and door security is not much use if you open the door from the inside to let someone in. This book explains in easy to understand terms, why you cannot just rely on antivirus, but also need to be aware of the various scams and tricks used by criminals.
