Knowledge, Organizational Evolution, and Market Creation Gita Sud de Surie,2008-01-01

[Knowledge, Organizational Evolution, and Market Creation] presents an integrative framework for understanding organizational change in emerging economies. . . the book distills a tremendous amount of research relevant for understanding the culture of business in India. . . This book is important for its contribution to the literature on the rise of Indian business and economy. It has a wide reaching theoretical scope and makes significant linkages with cognitive, behavioral and cultural theories. . . Ms. Surie s research on Indian firms thus presents a rare glimpse into the organizational and economic forces that are globalizing Indian industry from steel to software. Dinesh Sharma, Far Eastern Economic Review An astute study that especially focuses on the invaluable qualities of entrepreneurship and distributive innovation. . . . Exhaustively researched, and featuring appendices packed with additional tables and statistics of hard data, Knowledge, Organizational Evolution, and Market Creation is especially recommended for college library business and economic studies shelves. Midwest Book Review The Economics Shelf India has become a global economic powerhouse and Sud de Surie offers in this book the first systematic analysis of the global spread of Indian businesses. She skillfully maps the foreign expansion of Indian firms in five different industries, from steel, automotive components and machinery to software and biotechnology, showing that economic, political and cultural factors need to be present in order for companies to internationalize successfully. This book sets a new standard for research on international business. It is essential reading for those interested in the increasing role of emerging companies in global competition. Mauro F. Guillén, University of Pennsylvania, US Where do new multinationals come from? How do firms in developing economies become global players? Gita Sud de Surie provides new perspectives on internationalization and the multinational corporation by focusing on firms in emerging markets rather

than established multinationals in industrialized economies. She shows that firms in developing countries are not passive recipients of technology; rather, the attempt to absorb new technologies builds capabilities and generates new aspirations propelling them from being adopters of technology to innovators and participants in the global knowledge economy. *Knowledge, Organizational Evolution, and Market Creation* documents the emergence of the Indian multinational by looking at data from firms in the old economy, such as those in manufacturing, steel-making, automotive components and heavy machinery and the new economy such as software and biotechnology. The author provides insights on knowledge transfer, innovation and capability building processes through in-depth case studies in these industries and suggests that both entrepreneurship and distributed innovation are critical for the growth of firms globally. This book will be valuable for scholars in international management, business policy and strategy, organization and management theory, economic sociology and history and technology and innovation management. Analysts, consultants and executives will find many useful insights in this book as well.

Platformization and Informality Aditi Surie, Ursula Huws, 2023-05-11 In this edited volume, scholars from Mumbai, Bengaluru, Jakarta, Cape Town, Sao Paulo and other cities of the global South explore the complex relationship between platformization and informality through a different lens. Drawing on extensive theoretical, quantitative and qualitative scholarship, they provide both a useful overview and insights into the lived realities of gig work for platforms covering a range of skills, working conditions, and forms of algorithmic management. Platform work has attracted considerable attention from scholars in the global North, who have tended to view it as a form of casualisation of work that was previously regulated. But what about the global South, where most employment, especially that of women and migrant workers was historically already informal? Beyond a focus on livelihoods, employment, and work, the authors show how labour platforms take on powers that bring about broader impacts, including those affecting identity and personal wellbeing. They also illustrate the impact of platformization on the governance of affected sectors by public agencies, thus affecting political power, and how public data infrastructures contribute to further platformization. The purpose of this pioneering work is to lay bare these interactions to then rebuild our understanding of platformization and its social, political, cultural and economic impacts. Its insights are attentive to gender and ethnic differences, as well as geographical ones.

China: Confucius in the Shadows ,2015-03-15 Earlier this decade a statue of Confucius appears suddenly in Tiananmen Square in Beijing. It is facing Chairman Mao's statue in front of the Forbidden

City. Mysteriously, it disappears a few days later. Why was it removed overnight? Where is it now?? No clear answers seem to have emerged. Most communist regimes have tried to make a break with the traditions of the past believing them to be the cause of all ills in society. But has the historical experience of Communist regimes shown that to be true? Today, Buddhist, Daoist and Confucian temples across cities and villages in China are crowded with people offering prayers. People swarm to pay their respects to their traditional sages. Like the warp and weft of a fabric, China has the mark of traditions and ancient ethos present in its society and this has come handed down over the centuries and across generations. Confucianism has been among the most well absorbed, best known and documented value systems in China. It was and still is a living tradition, a way of life and a philosophy. Propounded by Confucius (551-479 BC), this value system has had a lasting and deep seated influence on the Chinese. A philosopher and a thinker of the Spring and Autumn period, Confucius has been considered a wise and fair teacher and a shrewd strategist in war. In spite of the fact that Confucian values have been present beneath the surface in China along with Buddhist and Daoist beliefs for generations, it is interesting to study why Confucius is being talked about so much of late. Over the years in Communist China, Confucian thought had been swept under the carpet but resurrected in part depending on whether it suited the then current leadership. While Mao rejected Confucius's ideas, he did not hesitate to use them whenever it suited him. A study of Confucius and his value systems at this moment in time makes sense and is important for a number of reasons. In the evolving socio political milieu of China, interpreting Confucian philosophy as being non confrontationist, benevolent and with values such as filial piety and harmony could help the current political regime deal with such problems as corruption and rising inequalities. Not only is Confucius being used to present to the world a completely Chinese cultural icon but it may also provide the Party with a useful tool to temper the simmering discontent in its society.

Identification of High-risk Patients and Outcome in Chronic Thromboembolic Pulmonary

Hypertension Sulaiman Surie,2016 CTEPH is life threatening, but by means of PEA potentially a curable form of pulmonary hypertension. We studied whether the current detection strategies are sufficient to recognize CTEPH patients, or should a more extensive systematic search be adopted. We concluded that current detection strategies appear sufficient to recognize CTEPH patients. Early recognition of CTEPH is crucial, however the clinical presentation of CTEPH is characterized by non-specific symptoms. We described a diagnostic model, based on fast, simple and non-invasive tests that can safely rule out CTEPH in patients with an episode of PE. Using cardiac-imaging we studied RV stroke volume (RVSV) response, the extent of the restoration of the systolic and diastolic RV function and its time course. In CTEPH, exercise is limited due to a decreased RVSV. After a successful PEA the RVSV response to exercise improved as was the exercise capacity. RV afterload reduction caused an immediate improvement in RV dimension and overall function and resulted in the restoration of cardiac remodeling. The systolic and diastolic RV function showed a biphasic response. Mortality and morbidity after PEA are increased in high-risk CTEPH patients. We studied the effects of preoperative medical treatment on pulmonary hemodynamics, functional capacity and in a subset of patients on RV remodeling and RV function. Treatment with bosentan resulted in improvements on hemodynamics and functional capacity, and in RV remodeling and function. To predict outcome we used predetermined BNP cut-off levels, and were able to identify patients at high(er) risk for postoperative hemodynamic instability, progressive RV failure and death.--Samenvatting auteur.

On Division Goldie Goldbloom,2019-09-17 ** Winner of the 2020 Jewish Fiction Award ** “A novel of wisdom and uncertainty, of love in its greater and lesser forms, and of the struggle between how it should be and how it is. It is impossible not to be moved.” —Amy Bloom, author of *White Houses* This book brings the reader into the heart of a close-knit Jewish family and their joys, loves, and sorrows . . . A marvelous book by a masterful writer.” —Audrey Niffenegger, author of *Her Fearful Symmetry* and *The Time Traveler’s Wife* As beautiful as it is unexpected.” —Claire Messud, author of *The Burning Girl* Through one woman's life at a moment of surprising change, the award-winning author Goldie Goldbloom tells a deeply affecting, morally insightful story and offers a rare look inside Brooklyn's

Chasidic community On Division Avenue, just a block or two up from the East River in Williamsburg, Brooklyn, Surie Eckstein is soon to be a great-grandmother. Her ten children range in age from thirteen to thirty-nine. Her in-laws, postwar immigrants from Romania, live on the first floor of their house. Her daughter Tzila Ruchel lives on the second. She and Yidel, a scribe in such demand that he makes only a few Torah scrolls a year, live on the third. Wed when Surie was sixteen, they have a happy marriage and a full life, and, at the ages of fifty-seven and sixty-two, they are looking forward to some quiet time together. Into this life of counted blessings comes a surprise. Surie is pregnant. Pregnant at fifty-seven. It is a shock. And at her age, at this stage, it is an aberration, a shift in the proper order of things, and a public display of private life. She feels exposed, ashamed. She is unable to share the news, even with her husband. And so for the first time in her life, she has a secret—a secret that slowly separates her from the community. Echoes from Orchard's Glen Larry R. Pirkle,2017-07-18 There among the mist-enclosed foothills of the Blue Ridge Mountains, comes a sweeping, powerfully moving account about the enduring faith of a pioneer family, every bit as pure and simple as this enchanted countryside itself. The Farnsworths were widely recognized as survivors, with more grit and gumption than the black-bottomland soil they took their living from. During the demanding decades that followed their initial arrival, their descendants never lost their abiding faith in each other and in their Lord and Savior, Jesus Christ. Mrs. Sarah

Abigail Farnsworth Landrey, the fourth generation to reside on this land, had lived a Godly life. Extraordinary she had witnessed crop failures, droughts, floods, wars, tornados and personal heartbreak. Raising nine children while working the land along-side her parents and husband, today at ninety-five, she was preparing for still one more long awaited appointment. To be gathered unto her people. How did this matriarch realize that today was the day she was going home? Wellcause she had a visitor in the wee-hours of that morning. The morning of the tenth-day of March, in the year of our Lord, 1975. Here in the white-clapboard farmhouse her grandparents constructed, in the bed she was actually born in, she was awakened to a gentle sound that at first sent chills up her spine. Once she became aware of just who was in her bedroom, and why they were there.she would never feel more assured that this faith she had always clung too, would truly see her though this final journey. Believing that Everyone is born for some em, some purpose. Filled with humor and moments that will move you to tears, you will be transfixed as the descendants of Mrs. Landrey ponder on precious recollections that morning, still clinging to their unwavering relationship with the Lord.
