*LLVM Essentials* Suyog Sarada, Mayur Pandey, 2015-12-21 Become familiar with the LLVM infrastructure and start using LLVM libraries to design a compiler About This Book Learn to use the LLVM libraries to emit intermediate representation (IR) from high-level language Build your own optimization pass for better code generation Understand AST generation and use it in a meaningful way Who This Book Is For This book is intended for those who already know some of the concepts of compilers and want to quickly get familiar with the LLVM infrastructure and the rich set of libraries that it provides. What You Will Learn Get an introduction to LLVM modular design and LLVM tools Convert frontend code to LLVM IR Implement advanced LLVM IR paradigms Understand the LLVM IR Optimization Pass Manager infrastructure and write an optimization pass Absorb LLVM IR transformations Understand the steps involved in converting LLVM IR to Selection DAG Implement a custom target using the LLVM infrastructure Get a grasp of C's frontend clang, an AST dump, and static analysis In Detail LLVM is currently the point of interest for many firms, and has a very active open source community. It provides us with a compiler infrastructure that can be used to write a compiler for a language. It provides us with a set of reusable libraries that can be used to optimize code, and a target-independent code generator to generate code for different backends. It also provides us with a lot of other utility tools that can be easily integrated into compiler projects. This book details how you can use the LLVM compiler infrastructure libraries effectively, and will enable you to design your own custom compiler with LLVM in a snap. We start with the basics, where you'll get to know all about LLVM. We then cover how you can use LLVM library calls to emit intermediate representation (IR) of simple and complex high-level language paradigms. Moving on, we show you how to implement optimizations at different levels, write an optimization pass, generate code that is independent of a target, and then map the code generated to a backend. The book also walks you through CLANG, IR to IR transformations, advanced IR block transformations, and target machines. By the end of this book, you'll be able to easily utilize the LLVM libraries in your own projects. Style and approach This book deals with topics sequentially, increasing the difficulty level in a step-by-step approach. Each topic is explained with a detailed example, and screenshots are included to help you understand the examples.

**The Write Stride** Suyog Ketkar, 2017-06-13 Writing is never as hard as a writer shows it to be. But, it is not as easy and effortless as others think it is. Writing what you have in your mind is one of the most difficult things to do. The words must flow; the expressions must come the right way; the soul must remain intact over the edit iterations; the edits must contribute to the quality; and, the sequences must fall in place until the conclusion. If only all this was were so easy! That's why writing about writing makes even more sense. For most of us, the focus is on the sellability of the content. But, we forget to check whether the content helps relieve the pains of the readers. Does the content bring any value to the readers? Does the content make the readers' lives better? Does the content reduce their troubles? *The Write Stride: A Conversation with Your Writing Self* is an attempt to address such issues in writing. The book is a collection of the writing methodologies that I have designed to help me write clearly. And, I hope that they help you, too, do the same. To find out more about the methodologies, read the book.

*LLVM Cookbook* Mayur Pandey, Suyog Sarada, 2015-05-30 The book is for compiler programmers who are familiar with concepts of compilers and want to indulge in understanding, exploring, and using LLVM infrastructure in a meaningful way in their work. This book is also for programmers who are not directly involved in compiler projects but are often involved in development phases where they write thousands of lines of code. With knowledge of how compilers work, they will be able to code in an optimal way and improve performance with clean code.

*South Asian Borderlands* Farhana Ibrahim, Tanuja Kothiyal, 2021-10-31 This is an interdisciplinary volume exploring a range of historical, anthropological and literary ideas and issues in South Asian Borderlands. Going beyond the territorial and geo-political imaginaries of contemporary borderlands

in South Asia, chapters in this book engage with the questions of sovereignty, control, policing as well as continuing affections across politically divided borderlands. Modern conceptions of nationhood have created categories of legality and illegality among historically, socially, economically and emotionally connected residents of South Asian borderlands. This volume provides unique insights into the interconnected lives and histories of these borderland spaces and communities.

The Dogfight and the Lone Peacekeeper Suyog Ketkar,2021-11-09 In *The Dogfight and the Lone Peacekeeper*, Author Suyog Ketkar takes the reader through engaging, action-filled events, while also telling the liting love story of Shakuntala and Vasant Kale that are derived from the real-life events. Wing Commander Vasant Kale is training Junior Officers for flight manoeuvres, which are crucial for the Burma campaign of the British in the Second World War. In the run-up to the preparations, he notices some very unusual events in his squadron. One day, during his usual flight manoeuvres, his Hurricane is downed. But he must survive, as the life of the Squadron is at stake; and his presence is must for the Burma campaign to be success. Does he survive the Dogfights? What will he do to save his fellow warriors? Can be the lone peacekeeper amid dogfights?

*And the Shadow Began to Glow* Suyog,2018-09-18 From being a victim of injustice to spreading violence and spreading injustice; life takes us from one extreme to another... Often, what one hates the most, becomes that!! Opposites have a tremendous craving to meet in the form of coincidence... A negative charge can only be balanced by a positive charge... Extreme violence is expression of a mind who has lost its freedom and sanity to brutal abuse of his dignity; this can only be balanced by sustaining the dignity of the hurt soul, by affection and friendship... When hurt and burns of violence meet friendship and affection, the sanity dawns and the anger dissolves into peace and contentment... May the world find its due affection and friendship...

*Canvas of a Storyteller* Aniruddha Pathak,2016-08-30 In this rapidly changing world, we come across many people around us. These people have many shades, some bright...some dark. They might want to let their feelings out, but they find it difficult to do so – and we term them different from the population. The diverse personalities sometimes make us wonder, what is hidden under their veil? They show a happy face, while hiding an agony beneath their expression. Some want to scream with happiness, but their voices are suppressed even before they could speak about it. Stand by the people who mention their sorrows, happiness, pains, agonies, and much more. You could relate to it, and find them talking to you. Peep into people's diaries, their midnight loneliness, find them doing weird stuffs, read their confessions, hear to the conversations that they hold with me, and see them either rise up touching the sky or fall down to the ground. The people. Their stories. One storyteller.
