Computational Logic: Logic Programming and Beyond

Antonis C. Kakas, Fariba Sadri, 2003-08-02 Alan Robinson This set of essays pays tribute to Bob Kowalski on his 60th birthday, an anniversary which gives his friends and colleagues an excuse to celebrate his career as an original thinker, a charismatic communicator, and a forceful intellectual leader. The logic programming community hereby and herein conveys its respect and thanks to him for his pivotal role in creating and fostering the conceptual paradigm which is its *raison d'Être*. The diversity of interests covered here reflects the variety of Bob's concerns. Read on. It is an intellectual feast. Before you begin, permit me to send him a brief personal, but public, message: Bob, how right you were, and how wrong I was. I should explain. When Bob arrived in Edinburgh in 1967 resolution was as yet fairly new, having taken several years to become at all widely known. Research groups to investigate various aspects of resolution sprang up at several institutions, the one organized by Bernard Meltzer at Edinburgh University being among the first. For the half-dozen years that Bob was a leading member of Bernard's group, I was a frequent visitor to it, and I saw a lot of him. We had many discussions about logic, computation, and language.

Designing Smart Homes Juan Carlos Augusto, 2006-06-29

The area of smart homes is fast developing as an emergent area which attracts the synergy of several areas of science. This volume offers a collection of contributions addressing how artificial intelligence (AI), one of the core areas of computer science, can bring the growing area of smart homes to a higher level of functionality where homes can truly realize the long standing dream of proactively helping their inhabitants in an intelligent way. After an introductory section to describe a smart home scenario and to provide some basic terminology, the following 9 sections turn special attention to a particular exemplar application scenario (provision of healthcare and safety related services to

increase the quality of life) exploring the application of specific areas of AI to this scenario.

MICAI 2007: Advances in Artificial Intelligence Alexander Gelbukh, Ángel Fernando Kuri Morales, 2007-10-24 This book constitutes the refereed proceedings of the 6th Mexican International Conference on Artificial Intelligence, MICAI 2007, held in Aguascalientes, Mexico, in November 2007. The 116 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book. The papers are organized in sections on topics that include computational intelligence, neural networks, knowledge representation and reasoning, agents and multiagent systems.

Logics in Artificial Intelligence Michael Fisher, Wiebe van der Hoek, Boris Konev, Alexei Lisitsa, 2006-09-14 This book constitutes the refereed proceedings of the 10th European Conference on Logics in Artificial Intelligence, JELIA 2006. The 34 revised full papers and 12 revised tool description papers presented together with 3 invited talks were carefully reviewed and selected from 96 submissions. The papers cover a range of topics within the remit of the Conference, such as logic programming, description logics, non-monotonic reasoning, agent theories, automated reasoning, and machine learning.

Intelligence, Creativity and Fantasy Mário S. Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2019-09-30 The texts presented in *Proportion Harmonies and Identities (PHI)* - INTELLIGENCE, CREATIVITY AND FANTASY were compiled with the intent to establish a multidisciplinary platform for the presentation, interaction and dissemination of research. The aim is also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture, Arts and Humanities, Design, Engineering, Social and Natural Sciences, and their importance and benefits for the sense of both individual and community identity. The idea of modernity has been a significant motor for development since the Western

Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

Twenty-First Century Arab and African Diasporas in Spain, Portugal and Latin America Cristián H. Ricci, 2022-12-30 This volume considers the Arabic and African diasporas through the underexplored Afro-Hispanic, Luso-Africans, and Mahjari (South American and Mexican authors of Arab descent) experiences in Spain, Portugal, and Latin America. Utilizing both established and emerging approaches, the authors explore the ways in which individual writers and artists negotiate the geographical, cultural, and historical parameters of their own diasporic trajectories influenced by their particular locations at home and elsewhere. At the same time, this volume sheds light on issues related to Spain, Portugal, and Latin American racial, ethnic, and sexual boundaries; the appeal of images of the Middle East and Africa in the contemporary marketplace; and the role of Spanish, Portuguese, and Latin American economic crunches in shaping attitudes towards immigration. This collection of thought-provoking chapters extends the concepts of diaspora and transnationalism, forcing the reader to reassess their present limitations as interpretive tools. In the process, Afro-Hispanic, Afro-Portuguese, and Mahjaris are rendered visible as national actors and transnational citizens.

Friderich Von H-sen: Introduction, Text, Commentary and Glossary D. G. Mowatt, Friderich Von Hûsen, Friedrich (von Hausen), 1971-01-02 Professor Mowatt's edition of Friderich von H-sen's poetry comprises a reprint of the two Middle High German manuscripts in which it is preserved, together with introduction, commentary and glossary. Von H-sen, twelfth-century Minnesinger, was a knight from Kreuznach in Rhine Franconia and died on a crusade to the Holy Land.

Tractates Ta'aniot, Megillah, Hagigah and Mo'ed Qatan (Mašqin) Heinrich W. Guggenheimer, 2015-04-24 The present volume is the seventeenth and last in this series of the Jerusalem Talmud. The four tractates of the Second Order - Ta'aniot, Megillah, Hagigah, Mo'ed Qatan (Mašqin) - deal with different fasts and holidays as well as with the pilgrimage to the Temple. The texts are accompanied by an English translation and presented with full use of existing Genizah texts and with an extensive commentary explaining the Rabbinic background.

ECAI 2016 G.A. Kaminka, M. Fox, P. Bouquet, 2016-08-24

Artificial Intelligence continues to be one of the most exciting and fast-developing fields of computer science. This book presents the 177 long papers and 123 short papers accepted for ECAI 2016, the latest edition of the biennial European Conference on Artificial Intelligence, Europe's premier venue for presenting scientific results in AI. The conference was held in The Hague, the Netherlands, from August 29 to September 2, 2016. ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems (PAIS) 2016, and the Starting AI Researcher Symposium (STAIRS). The papers from PAIS are included in this volume; the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications (FAIA) series. Organized by the European Association for Artificial Intelligence (EurAI) and the Benelux Association for Artificial Intelligence (BNVKI), the ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI. This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field.

Texts Reading Texts, Sacred and Secular Alison

Jack, 1999-05-01 The language, themes and imagery of the Bible have been rewritten into texts across time. In the Revelation of John, the Hebrew Bible echoes and is reinvented, just as in James Hogg's The Private Memoirs and Confessions of a Justified Sinner (1824) many explicit and implicit readings and interpretations of the Bible are offered. In Texts Reading Texts, these readings of the Bible, and the ways in which Revelation and Hogg's Confessions have themselves been read, are considered from the two postmodern perspectives of marginalization and deconstruction. By reading the two seemingly unrelated texts side by side from these perspectives, traditional readings of them both are disturbed and challenged.

Evolution in Action Matthias Glaubrech, 2010-07-24

Radiations, or Evolution in Action We have just celebrated the

“Darwin Year” with the double anniversary of his 200th birthday and 150th year of his masterpiece, “On the Origin of Species by means of Natural Selection”. In this work, Darwin established the factual evidence of biological evolution, that species change over time, and that new organisms arise by the splitting of ancestral forms into two or more descendant species. However, above all, Darwin provided the mechanisms by arguing convincingly that it is by natural selection – as well as by sexual selection (as he later added) – that organisms adapt to their environment. The many discoveries since then have essentially confirmed and strengthened Darwin’s central theses, with latest evidence, for example, from molecular genetics, revealing the evolutionary relationships of all life forms through one shared history of descent from a common ancestor. We have also come a long way to progressively understand more on how new species actually originate, i. e. on speciation which remained Darwin’s “mystery of matters”, as noted in one of his earliest transmutation notebooks. Since speciation is the underlying mechanism for radiations, it is the ultimate causation for the biological diversity of life that surrounds us.

Ingredients for Successful System Level Design

Methodology Hiren D. Patel, Sandeep Kumar Shukla, 2008-06-06
ESL or “Electronic System Level” is a buzz word these days, in the electronic design automation (EDA) industry, in design houses, and in the academia. Even though numerous trade magazine articles have been written, quite a few books have been published that have attempted to define ESL, it is still not clear what exactly it entails. However, what seems clear to every one is that the “Register Transfer Level” (RTL) languages are not adequate any more to be the design entry point for today’s and tomorrow’s complex electronic system design. There are multiple reasons for such thoughts. First, the continued progression of the miniaturization of the silicon technology has led to the ability of putting almost a billion transistors on a single chip. Second,

applications are becoming more and more complex, and integrated with communication, control, ubiquitous and pervasive computing, and hence the need for ever faster, ever more reliable, and more robust electronic systems is pushing designers towards a productivity demand that is not sustainable without a fundamental change in the design methodologies. Also, the hardware and software functionalities are getting interchangeable and ability to model and design both in the same manner is gaining importance. Given this context, we assume that any methodology that allows us to model an entire electronic system from a system perspective, rather than just hardware with discrete-event or cycle based semantics is an ESL methodology of some kind.
