**Artificial Intelligence and Soft Computing** Leszek Rutkowski, Marcin Korytkowski, Rafał Scherer, Ryszard Tadeusiewicz, Lotfi A. Zadeh, Jacek M. Zurada, 2014-05-22 The two-volume set LNAI 8467 and LNAI 8468 constitutes the refereed proceedings of the 13th International Conference on Artificial Intelligence and Soft Computing, ICAISC 2014, held in Zakopane, Poland in June 2014. The 139 revised full papers presented in the volumes, were carefully reviewed and selected from 331 submissions. The 69 papers included in the first volume are focused on the following topical sections: Neural Networks and Their Applications, Fuzzy Systems and Their Applications, Evolutionary Algorithms and Their Applications, Classification and Estimation, Computer Vision, Image and Speech Analysis and Special Session 3: Intelligent Methods in Databases. The 71 papers in the second volume are organized in the following subjects: Data Mining, Bioinformatics, Biometrics and Medical Applications, Agent Systems, Robotics and Control, Artificial Intelligence in Modeling and Simulation, Various Problems of Artificial Intelligence, Special Session 2: Machine Learning for Visual Information Analysis and Security, Special Session 1: Applications and Properties of Fuzzy Reasoning and Calculus and Clustering.

**Arms Trade and Nonproliferation: March 13, 1992** United States. Congress. Joint Economic Committee. Subcommittee on Technology and National Security, 1992

**Arms Watch** Edward J. Laurance, Siemon T. Wezeman, Herbert Wulf, 1993 This report documents the government submissions to the UN on the transfer of arms in seven weapons categories in 1992 and compares this data with information published by SIPRI in its arms trade register. It assesses the results of the UN register and the prospects for improving it in 1994.

**Alternative Farming Systems - Economic Aspects, Bibliography** K. Schnieder, 1994-05 This bibliographic listing covers all aspects of economics in relation to any type of alternative farming system. Entries include books, journal articles, & audiovisuals in any language. Citations are from the National Agricultural Library's AGRICOLA database & include, where applicable: title, author, publisher, date & place of publication, NAL call number, volume & issue, no. of pages, media format, length, & description. Many entries contain abstracts. Indexed by author & subject.

**Building Energy Efficiency**, 1992

**T-90 Standard Tank** Steven J. Zaloga, 2018-02-22 A highly illustrated study of the T-90, the backbone of the armoured units of Putin's Russia. In the wake of the T-72 tank's poor performance in the 1991 Gulf War, the Kremlin instructed the Russian tank industry to drop the discredited T-72 designation in favour of the T-90 Vladimir. The T-90 was in fact a further evolution of the T-72 family, but the name change represented an important break in Russian/Soviet tank design history. The T-90 has become the principal export tank of Russia, and is in service in large numbers in many countries including Algeria, India, and many of the former Soviet republics. Using detailed illustrations and full colour artwork, this book also describes the evolution of the T-90's many failed successors including the little known Bokser, Molot, and T-95, as well as its likely successor, the new T-14 Armata, and the wide range of specialized vehicles based on the T-90 chassis such as the formidable Terminator tank support vehicle.

**Issues in Underground Storage Tank Management UST Closure and Financial Assurance** Janet E. Robinson, Paul S. Thompson, W. David Conn, L. Leon Geyer, 1993-02-22 Issues in Underground Storage Tank Management presents a comprehensive description of the many complex facets of hazardous waste management, tank closure, and site assessment. It is also the only book to cover financial assurance of UST remediation. Part I discusses UST closure including regulation, closure techniques, site assessment methods and data interpretation, waste disposal, contracting, and health and safety. The book's site assessment section covers such issues as field screening, analytical techniques, sample collection, and equipment decontamination. Part 2 covers financial assurance addressing UST financial responsibility, EPA financial responsibility regulations, use of insurance, use of state funds, and litigation and common law. Non-technical language is used throughout the book to present information in an easy-to-understand, readable fashion. Issues in Underground Storage Tank Management is an essential guide for UST owners, facility managers, environmental and hazardous waste consultants, federal and state environmental regulatory personnel, groundwater professionals, pollution engineers. It also has useful information for anyone involved in petroleum contamination assessment.

**Preliminary References to the European Court of Justice** Morten Broberg, Niels Fenger, 2014-03-06 This fully updated and revised second edition of Preliminary References to the European Court of Justice provides a meticulous and yet easily accessible examination of all aspects of the preliminary reference procedure. Since the first edition there have been significant changes to the European Union's legal foundations. First and foremost of those being the signing of the Lisbon Treaty, which has had both direct and indirect consequences for the preliminary reference procedure. In addition, the authors have taken into account amendments to the Rules of Procedure of the Court of Justice and the Court's amended Statute, they have added expanded treatment of the acte clair doctrine and the Court's Cartesio ruling and a more general revision of the text bringing it up to date by taking into account new case law and new legal writings. In addition to these important updates, the authors have also revised the structure of the book. With backgrounds as both practitioners and academics the two authors have produced a book that caters for the needs of both practitioners and academics.

**Current Industrial Reports**, 1984

**Truck Trailer Production**, 1991

**The Tank Debate** John Stone, 2018-12-07 In The Tank Debate, John Stone highlights the equivocal position that armour has traditionally occupied in Anglo-American thought, and explains why - despite frequent predictions to the contrary - the tank has remained an important instrument of war. This book provides a timely and provocative study of the tank's developmental history, against the changing background of Anglo-American military thought.

**Annual Report of the State Corporation Commission of Virginia** Virginia. State Corporation Commission, 1914

**Preliminary References to the European Court of Justice** Morten P. Broberg, Niels Fenger, 2010 Analysis of the Court of Justice's practice, and the book is extensively referenced throughout with all the most relevant sources reproduced in the annexes. Readership: Advocates, Judges, and legal academics with an interest in EU law.

**Models of Neural Networks** Eytan Domany, J. Leo van Hemmen, Klaus Schulten, 2013-11-11 Since the appearance of Vol. 1 of Models of Neural Networks in 1991, the theory of neural nets has focused on two paradigms: information coding through coherent firing of the neurons and functional feedback. Information coding through coherent neuronal

firing exploits time as a cardinal degree of freedom. This capacity of a neural network rests on the fact that the neuronal action potential is a short, say 1 ms, spike, localized in space and time. Spatial as well as temporal correlations of activity may represent different states of a network. In particular, temporal correlations of activity may express that neurons process the same object of, for example, a visual scene by spiking at the very same time. The traditional description of a neural network through a firing rate, the famous S-shaped curve, presupposes a wide time window of, say, at least 100 ms. It thus fails to exploit the capacity to bind sets of coherently firing neurons for the purpose of both scene segmentation and figure-ground segregation. Feedback is a dominant feature of the structural organization of the brain. Recurrent neural networks have been studied extensively in the physical literature, starting with the ground breaking work of John Hopfield (1982).

**Brain Mapping**, 2015-02-14 Brain Mapping: A Comprehensive Reference offers foundational information for students and researchers across neuroscience. With over 300 articles and a media rich environment, this resource provides exhaustive coverage of the methods and systems involved in brain mapping, fully links the data to disease (presenting side by side maps of healthy and diseased brains for direct comparisons), and offers data sets and fully annotated color images. Each entry is built on a layered approach of the content – basic information for those new to the area and more detailed material for experienced readers. Edited and authored by the leading experts in the field, this work offers the most reputable, easily searchable content with cross referencing across articles, a one-stop reference for students, researchers and teaching faculty. Broad overview of neuroimaging concepts with applications across the neurosciences and biomedical research Fully annotated color images and videos for best comprehension of concepts Layered content for readers of different levels of expertise Easily searchable entries for quick access of reputable information Live reference links to ScienceDirect, Scopus and PubMed

**War on Land** Britannica Educational Publishing, 2011-11-01 Long before they took to the sea and air, warring factions engaged in land-based conflicts that involved close-range combat with rudimentary defenses and weapons. As civilizations have advanced, so too have their military strategies, tactics, and weaponry. Eventually this led to the development of sophisticated land fortifications, arms, artillery, and missile systems in use today by ground troops. This insightful volume examines the evolution of warfare on land around the world, as well as the impact of new technologies on the nature of war.

*The Computational Brain, 25th Anniversary Edition* Patricia S. Churchland, Terrence J. Sejnowski, 2016-10-28 An anniversary edition of the classic work that influenced a generation of neuroscientists and cognitive neuroscientists. Before *The Computational Brain* was published in 1992, conceptual frameworks for brain function were based on the behavior of single neurons, applied globally. In *The Computational Brain*, Patricia Churchland and Terrence Sejnowski developed a different conceptual framework, based on large populations of neurons. They did this by showing that patterns of activities among the units in trained artificial neural network models had properties that resembled those recorded from populations of neurons recorded one at a time. It is one of the first books to bring together computational concepts and behavioral data within a neurobiological framework. Aimed at a broad audience of neuroscientists, computer scientists, cognitive scientists, and philosophers, *The Computational Brain* is written for both expert and novice. This anniversary edition offers a new preface by the authors that puts the book in the context of current research. This approach influenced a generation of researchers. Even today, when neuroscientists can routinely record from hundreds of neurons using optics rather than electricity, and the 2013 White House BRAIN initiative heralded a new era in innovative neurotechnologies, the main message of *The Computational Brain* is still relevant.

Representations of Vision Andrei Gorea, 1991-04-26 This stimulating volume on vision extends well beyond the traditional areas of vision research and places the subject in a much broader philosophical context. The emphasis throughout is to integrate and illuminate the visual process. The first three parts of the volume provide authoritative overviews on computational vision and neural networks, on the neurophysiology of visual cortex processing, and on eye-movement research. Each of these parts illustrates how different research perspectives may jointly solve fundamental problems related to the efficiency of visual perception, to the relationship between vision and eye-movements and to the neurophysiological 'codes' underlying our visual perceptions. In the fourth part, leading vision scientists introduce the reader to some major philosophical problems in vision research such as the nature of 'ultimate' codes for perceptual events, the duality of psycho-physics, the bases of visual recognition and the paradigmatic foundations of computer-vision research.

**Code-type models for concrete behaviour** fib Fédération internationale du béton, 2013-11-01 fib Model Code 2010 represents the state-of-the-art of code-type models for structural behaviour of concrete. It comprises constitutive relations and material models together with the most important explanatory notes. However the underlying normative work, i.e. the fundamental data as well as the considerations and discussions behind the formulas could not be given within the Model Code text. Based on various experiences gained after the publication of Model Code 1990 this lacking background information will lead in the following to numerous questions arising from Model Code users. Consequently the present bulletin claims to conquer this general weakness of codes in a way to guard against any future misunderstandings of the Model Code 2010 related to its chapter 5.1 (Concrete). It discusses the given formulas in connection with experimental data and the most important international literature. The constitutive relations or material models, being included in MC1990 and forming the basis and point of origin of the Task Group's work, were critically evaluated, if necessary and possible adjusted, or replaced by completely new approaches. Major criteria have been the physical and thermodynamical soundness as well as practical considerations like simplicity and operability. This state-of-the-art report is intended for practicing engineers as well as for researchers and represents a comprehensible summary of the relevant knowledge available to the members of the fib Task Group 8.7 at the time of its drafting. Besides the fact that the bulletin is a background document for Chapter 5.1 of MC2010, it will provide an important foundation for the development of future generations of code-type models related to the characteristics and the behaviour of structural concrete. Further it will offer insights into the complexity of the normative work related to concrete modelling, leading to a better understanding and adequate appreciation of MC2010.

This Engaging World of E-book Books: A Thorough Guide Revealing the Benefits of Kindle Books: A Realm of Ease and Versatility E-book books, with their inherent mobility and ease of availability, have freed readers from the constraints of physical books.
