

# The Cost Of Dying

Pat McNees

**The Cost of Dying and what You Can Do about it** Raymond Paavo Arvio,1974

**The High Cost of Dying** Gregory W. Young,2011-03-04 This important volume offers a comprehensive overview of the funeral home business and provides valuable inside information needed by thoughtful consumers, legal advisors, trust officers, and even clergy - all those who must confront the hard, practical questions that surround one of life's most trying and emotion-filled experiences. How does one select a funeral home? What obligations and functions are properly the family's and which should be expected of a funeral home? Who is financially responsible for the funeral? What funeral options are available and which are best? Is it possible to arrange a dignified, yet affordable funeral? Is it crass to be concerned about costs? These are just some of the questions addressed by former funeral home director Gregory W. Young in this easy-to-read reference guide that aids consumers in arranging a funeral and avoiding unnecessary charges. Young's compassion for the grief-stricken and his in-depth understanding of funeral preparation combine to provide a unique perspective on the history and psychology of the American funeral. Each chapter of this information-packed book covers an important aspect of the contemporary funeral: the need for consumerism, the funeral in history, how the funeral director can help survivors, making the choice between burial and cremation, the importance of the funeral arrangement conference, outlining the funeral contract, describing common funeral rip-offs, how to pre-arrange a funeral, answering frequently asked consumer questions, and much more. Of vital importance are the special features of this remarkable volume: the handy funeral arrangement checklist that helps consumers determine their needs, and a discussion of price ranges for specific services, caskets, burial vaults and miscellaneous expenses. Never before has so much valuable information been compiled by such a noted authority on a topic that will inevitably touch us all.

**The High Cost of Dying** Ruth Mulvey Harmer,1963

Dying in America Institute of Medicine,Committee on Approaching Death: Addressing Key End-of-Life Issues,2015-03-19 For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist

policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

**Approaching Death** Committee on Care at the End of Life, Institute of Medicine, 1997-10-30 When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an overtreated dying is feared, untreated pain or emotional abandonment are equally frightening. *Approaching Death* reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. *Approaching Death* considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom nothing can be done.

**The Kids' Book about Death and Dying** Eric E. Rofes, 1985 Fourteen children offer facts and advice to give young readers a better understanding of death.

**Values at the End of Life** Roi Livne, 2019-06-10 Once defiant of death—or even in denial—many American families and health care professionals are embracing the notion that a life consumed by suffering may not be worth living. Sociologist Roi Livne documents the rise and effectiveness of hospice and palliative care, and the growing acceptance that less treatment may be better near the end of life.

*Dying* Pat McNees, 1998-08-01 In this treasury of life-affirming passages, more than 40 celebrated writers, thinkers, and religious figures from various faiths speak eloquently on the nature of dying and provide words of comfort for those left behind.

*Things I've Learned from Dying* David R. Dow, 2014-01-07 Every life is different, but every death is the same. We live with others. We die alone. In his riveting, artfully written memoir *The Autobiography of an Execution*, David Dow enraptured readers with a searing and frank exploration of his work defending inmates on death row. But when Dow's father-in-law receives his own death sentence in the form of terminal cancer, and his gentle dog Winona suffers acute liver failure, the author is forced to reconcile with death in a far more personal way, both as a son and as a father. Told through the disparate lenses of the legal battles he's spent a career fighting, and the intimate confrontations with death each family faces at home, *THINGS I'VE LEARNED FROM DYING* offers a poignant and lyrical account of how illness and loss can ravage a family. Full of grace and intelligence, Dow offers readers

hope without cliché and reaffirms our basic human needs for acceptance and love by giving voice to the anguish we all face--as parents, as children, as partners, as friends--when our loved ones die tragically, and far too soon.

*The American Way of Death* Jessica Mitford, 1963 An expose on America's multimillion-dollar burial policy.

**A Social History of Dying** Allan Kellehear, 2007-02-12 Our experiences of dying have been shaped by ancient ideas about death and social responsibility at the end of life. From Stone Age ideas about dying as otherworld journey to the contemporary Cosmopolitan Age of dying in nursing homes, Allan Kellehear takes the reader on a 2 million year journey of discovery that covers the major challenges we will all eventually face: anticipating, preparing, taming and timing for our eventual deaths. This book, first published in 2007, is a major review of the human and clinical sciences literature about human dying conduct. The historical approach of this book places our recent images of cancer dying and medical care in broader historical, epidemiological and global context. Professor Kellehear argues that we are witnessing a rise in shameful forms of dying. It is not cancer, heart disease or medical science that presents modern dying conduct with its greatest moral tests, but rather poverty, ageing and social exclusion.

*No Place for Dying* Helen Stanton Chapple, 2010-04-14 This book shows how dying is a management problem for hospitals, occupying space but few billable encounters and of little interest to medical practice or quality control. An anthropologist and bioethicist with two decades of professional nursing experience, Helen Chapple goes beyond current work on hospital care to present fine-grained accounts of the clinicians, patients, and families who navigate this uncharted, untidy, and unpredictable territory between the highly choreographed project of rescue and the clinical culmination of death.

**The Art of Dying Well** Katy Butler, 2020-02-11 This "comforting...thoughtful" (The Washington Post) guide to maintaining a high quality of life—from resilient old age to the first inklings of a serious illness to the final breath—by the New York Times bestselling author of *Knocking on Heaven's Door* is a "roadmap to the end that combines medical, practical, and spiritual guidance" (The Boston Globe). "A common sense path to define what a 'good' death looks like" (USA TODAY), *The Art of Dying Well* is about living as well as possible for as long as possible and adapting successfully to change. Packed with extraordinarily helpful insights and inspiring true stories, award-winning journalist Katy Butler shows how to thrive in later life (even when coping with a chronic medical condition), how to get the best from our health system, and how to make your own "good death" more likely. Butler explains how to successfully age in place, why to pick a younger doctor and how to have an honest conversation with them, when not to call 911, and how to make your death a sacred rite of passage rather than a medical event. This handbook of preparations—practical, communal, physical, and spiritual—will help you make the most of your remaining time, be it decades, years, or months. Based on Butler's experience caring for aging parents, and hundreds of interviews with people who have successfully navigated our fragmented health system and helped their loved ones have good deaths, *The Art of Dying Well* also draws on the expertise of national leaders in family medicine, palliative care, geriatrics, oncology, and hospice. This "empowering guide clearly outlines the steps necessary to prepare for a beautiful death without fear" (Shelf Awareness).

**The Cost of Dying** Peter Brandvold, 2019-07-30 Of all the legends of the Old West, few are as stained with ink, blood, and bullets as the violent days of bounty hunter Lou Prophet. But what happens when the hunter becomes the hunted? Heaven knows there'll be hell to pay . . . THE DEVIL RIDES AGAIN After a hard night with his sometime lover Louisa Bonaventure—"the Vengeance Queen"—Lou Prophet decides to cool his heels at a local honky tonk. Things heat up fast when he defends one of the girls from a sadistic brute who also happens to be the deputy sheriff. And now Prophet is running for his life . . . WITH A BOUNTY ON HIS HEAD Heading south of the border to Mexico, Prophet isn't the only man marked for death. The young red-headed pistolero Colter Farrow has made an awful lot of enemies, too—and now practically every bounter hunter south of the Rio Grande is gunning for blood. For money. For fun. And, now, for Lou Prophet . . . "Here's a writer with hot, fast violence and the guts to write what he wants." —Tom McNulty, *Dispatches from the Last Outlaw*

**Deaths of Despair and the Future of Capitalism** Anne Case, Angus Deaton, 2021-03-02 A New York Times Bestseller A Wall Street Journal Bestseller A New York Times Notable Book of 2020 A New York Times Book Review Editors' Choice Shortlisted for the Financial Times and McKinsey Business Book of the Year A New Statesman Book to Read From economist Anne Case and Nobel Prize winner Angus Deaton, a groundbreaking account of how the flaws in capitalism are fatal for America's working class Deaths of despair from suicide, drug overdose, and alcoholism are rising dramatically in the United States, claiming hundreds of thousands of American lives. Anne Case and Angus Deaton explain the overwhelming surge in these deaths and shed light on the social and economic forces that are making life harder for the working class. As the college educated become healthier and wealthier, adults without a degree are literally dying from pain and despair. Case and Deaton tie the crisis to the weakening position of labor, the growing power of corporations, and a rapacious health-care sector that redistributes working-class wages into the pockets of the wealthy. This critically important book paints a troubling portrait of the American dream in decline, and provides solutions that can rein in capitalism's excesses and make it work for everyone.

**Dying of Whiteness** Jonathan M. Metzl, 2019-03-05 A physician's provocative (Boston Globe) and timely (Ibram X. Kendi, New York Times Book Review) account of how right-wing backlash policies have deadly consequences -- even for the white voters they promise to help. In election after election, conservative white Americans have embraced politicians who pledge to make their lives great again. But as physician Jonathan M. Metzl shows in *Dying of Whiteness*, the policies that result actually place white Americans at ever-greater risk of sickness and death. Interviewing a range of everyday Americans, Metzl examines how racial resentment has fueled pro-gun laws in Missouri, resistance to the Affordable Care Act in Tennessee, and cuts to schools and social services in Kansas. He shows these policies' costs: increasing deaths by gun suicide, falling life expectancies, and rising dropout rates. Now updated with a new afterword, *Dying of Whiteness* demonstrates how much white America would benefit by emphasizing cooperation rather than chasing false promises of supremacy. Winner of the Robert F. Kennedy Book Award

**In Defiance of Death** Kenneth A. Fisher, Lindsay E. Rockwell, Missy Scott, 2008-03-30 Death is a natural part of life. But it has become a

painful, protracted, humiliating process that is often inappropriate for the healthcare patient, puts an undue financial and emotional burden on the family, and provides a model of improper care for physicians in training. And it's expensive—about 22 percent of all medical expenditures are for people in the last year of their lives. Further, while studies show that 90 percent of all people would prefer to die at home surrounded by family and friends, the reality is that more than 70 percent die in institutions. As Dr. Ken Fisher argues so passionately in this book, it's time for a change. End-of-life care in the U.S. has evolved over the years into a nightmare for patients and family members, and it has created a near-crushing financial burden on the medical system that is not just excessive but unsustainable. It has driven the cost of healthcare out of reach for many people, and it is a large factor in preventing the creation of universal coverage. In *Defiance of Death* reviews the current state of end-of-life care and highlights its many problems from a variety of economic, political, and social perspectives. Fisher and Rockwell illuminate the ethical dilemmas we all face as technology allows us to prolong life—but at a huge human and financial cost. This book documents these problems and provides a historical perspective of how our medical system evolved. It argues that America's defiance of death is far too costly and recommend that all stakeholders—including the public, medical community, Congress, and business leaders—join together to create a system that improves end-of-life care for everyone involved. This book, with workable solutions to improve our medical system, helps point the way.

*Dying Well* Ira Byock, 1998-03-01 From Ira Byock, prominent palliative care physician and expert in end of life decisions, a lesson in *Dying Well*. Nobody should have to die in pain. Nobody should have to die alone. This is Ira Byock's dream, and he is dedicating his life to making it come true. *Dying Well* brings us to the homes and bedsides of families with whom Dr. Byock has worked, telling stories of love and reconciliation in the face of tragedy, pain, medical drama, and conflict. Through the true stories of patients, he shows us that a lot of important emotional work can be accomplished in the final months, weeks, and even days of life. It is a companion for families, showing them how to deal with doctors, how to talk to loved ones—and how to make the end of life as meaningful and enriching as the beginning. Ira Byock is also the author of *The Best Care Possible: A Physician's Quest to Transform Care Through the End of Life*.

*The Way We Die* David K. Dempsey, 1977-01-01 Examines the circumstances, study, and experience of death in the contemporary United States, surveying key medical, emotional, legal, social, and financial issues as they concern patients, physicians, and survivors

*R.I.P.: The Complete Book of Death and Dying* Constance Jones, 1997-02-05 Did you know that American burial traditions include aerial burial, in which the body is placed in tree branches? Have you ever wondered which religions believe in afterlife or reincarnation? Ever been curious about exactly what the embalming process entails? The answers all lie in *R.I.P.: The Complete Book of Death & Dying* by Constance Jones. Reminding us that almost no subject in the world elicits such universal fascination as death, Jones has masterfully collected information from diverse sources to explore, illuminate, demystify and enrich our understanding of the myriad issues related to death and dying. Publishers Weekly has praised Jones' approach as clear-sighted and fearlessly inquisitive and calls *R.I.P.: The Complete Book*

of Death & Dying invaluable and oddly uplifting. The book is divided into two parts and is equipped with a resource list of organizations, a bibliography and an index. Part One explores the cultural dimensions of death and dying, with chapters and sections on myths and legends explaining death, cultural traditions, the scientific study of death, demographic statistics, funerary customs, religious beliefs and historical anecdotes. Jones provides wide-ranging, informative, and occasionally humorous material that is thoughtfully and clearly organized. Topics covered include descriptions of the physiological changes at the moment of death, a history of cremation, and summaries of legal and ethical issues associated with death, such as capital punishment, euthanasia and suicide.
