Intellectual Warfare Todd William, 2018-02-09 A hundred-thousand years ago one of the biggest differences between humans and the rest of the animal kingdom was that we were better at catching them than they were at catching us. Today things have changed...somewhat. Thinking is easy. Anyone can think. What's important is thinking intelligently. The problem is that a battle for our minds is taking place, and most people don't even notice. We're influenced from the news, social gatherings, what we read, what we are told,

and what everyone else is thinking. Salespeople, marketers, and politicians know thousands of ways to push our minds in one direction or another. The result is that society is littered with people who retain beliefs they cannot explain for reasons they do not know. What you think matters. People fight for their beliefs, defend them, and in some cases even die for them. Lesser minds might be content with easy answers and poorly thought out explanations. But if you seek a strong mind, you first must ensure that you are capable of overcoming the elements that influence the way you think. Intellectual Warfare is designed to equip you with the tools necessary to win the battle for your mind. The book spans a host of topics ranging from the human ego, natural biases, cognitive illusions, and an entire section on the weapons of persuasion constantly attacking your thought process. Aimed at anyone seeking to improve their intellect, this book will ensure you are making the most of your mind.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Pseudoscience and the Paranormal Terence Hines, 2010-09-30 Television, the movies, and computer games fill the minds of their viewers with a daily staple of fantasy, from tales of UFO landings, haunted houses, and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine. The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary, or they never learn to make the distinction in the first place. In this thorough review of pseudoscience and the paranormal in contemporary life, psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence. Hines devotes separate chapters to psychics;

life after death; parapsychology; astrology; UFOs; ancient astronauts, cosmic collisions, and the Bermuda Triangle; faith healing; and more. New to this second edition are extended sections on psychoanalysis and pseudopsychologies, especially recovered memory therapy, satanic ritual abuse, facilitated communication, and other questionable psychotherapies. There are also new chapters on alternative medicine, which is now marketed in our drug stores, and on environmental pseudoscience, with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer. Finally, Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary. This valuable, highly interesting, and completely accessible analysis critiques the whole range of current paranormal claims.

In coming to terms with her decision to publicly out her mother, Gail changed how she looks at race and heritage. The Beach Alex Garland, 1998-02-01 The irresistible novel that was adapted into a major motion picture starring Leonardo DiCaprio. The Khao San Road, Bangkok -- first stop for the hordes of rootless young Westerners traveling in Southeast Asia. On Richard's first night there, in a low-budget guest house, a fellow traveler slashes his wrists, bequeathing to Richard a meticulously drawn map to the Beach. The Beach, as Richard has come to learn, is the subject of a legend among young travelers in Asia: a lagoon hidden from the sea, with white sand and coral gardens, freshwater falls surrounded by jungle, plants untouched for a thousand years. There, it is rumored, a carefully selected international few have settled in a communal Eden. Haunted by the figure of Mr. Duck -- the name by which the Thai police have identified the dead man -- and his own obsession with Vietnam movies, Richard sets off with a young French couple to an island hidden away in an archipelago forbidden to tourists. They discover the Beach, and it is as beautiful and idyllic as it is reputed to be. Yet over time it becomes clear that Beach culture, as Richard calls it, has troubling, even deadly,

undercurrents. Spellbinding and hallucinogenic, *The Beach* by Alex Garland -- both a national bestseller and his debut -- is a highly accomplished and suspenseful novel that fixates on a generation in their twenties, who, burdened with the legacy of the preceding generation and saturated by popular culture, long for an unruined landscape, but find it difficult to experience the world firsthand.
