Intellectual Property Law in New Zealand Anna Kingsbury,2017-02-24 Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning intellectual property rights in New Zealand. It covers every type of intellectual property right in depth – copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in New Zealand will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law.

AA Road Atlas New Zealand New Zealand Automobile Association,AA Guides Limited,2008-01 During its 30 years in circulation, the AA Road Atlas has been constantly revised and updated. Demand has been so great that it has been reprinted over 20 times. What hasn't changed is the attention to detail; an accuracy that motorists can rely on. This 2007 edition is easy to read and easy to use. It includes a location index, distance charts, time charts, road rules and driving advice. Atlas maps include: Main highways, mountains, historic buildings, walkways, secondary roads, thermal areas, airports, forest parks, distances, national parks, golf courses, rivers, motor camps, ski fields and picnic areas. Town maps include: One-way streets, hospitals, toilets, police, car parks, and information offices. The first road map published by the Automobile Association, a hand-drawn sketch of Auckland, was issued to Members in 1924. Fifty years later, the Association published the first AA Road Atlas of New Zealand. Today, the Association's mapping techniques have advanced considerably. From pen and ink to photolithographic techniques, cartographers now draw on state-of-the-art technology to create detailed definition. Terrain detail is created via enhancements such as computer-generated hill shading. This gives the motorist a realistic impression of the topography they will encounter along the road.

Position, Navigation, and Timing Technologies in the 21st Century Y. Jade Morton, Frank van Diggelen, James J. Spilker, Jr., Bradford W.

Parkinson, Sherman Lo, Grace Gao,2020-12-17 Covers the latest developments in PNT technologies, including integrated satellite navigation, sensor systems, and civil applications. Featuring sixty-four chapters that are divided into six parts, this two-volume work provides comprehensive coverage of the state-of-the-art in satellite-based position, navigation, and timing (PNT) technologies and civilian applications. It also examines alternative navigation technologies based on other signals-of-opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications. Volume 1 of Position, Navigation, and Timing Technologies in the 21st Century: Integrated Satellite Navigation, Sensor Systems, and Civil Applications contains three parts and focuses on the satellite navigation systems, technologies, and engineering and scientific applications. It starts with a historical perspective of GPS development and other related PNT development. Current global and regional navigation satellite systems (GNSS and RNSS), their inter-operability, signal quality monitoring, satellite orbit and time synchronization, and ground- and satellite-based augmentation systems are examined. Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath-rich urban environment, in handling spoofing and interference, and in ensuring PNT integrity are addressed. A section on satellite navigation for engineering and scientific applications finishes off the volume. Volume 2 of Position, Navigation, and Timing Technologies in the 21st Century: Integrated Satellite Navigation, Sensor Systems, and Civil Applications consists of three parts and addresses PNT using alternative signals and sensors and integrated PNT technologies for consumer and commercial applications. It looks at PNT using various radio signals-of-opportunity, atomic clock, optical, laser, magnetic field, celestial, MEMS and inertial sensors, as well as the concept of navigation from Low-Earth Orbiting (LEO) satellites. GNSS-INS integration, neuroscience of navigation, and animal navigation are also covered. The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping, precision agriculture, wearable systems, automated driving, train control, commercial unmanned aircraft systems, aviation, and navigation in the unique Arctic environment. In addition, this text: Serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects. Includes chapters that focus on the latest developments in GNSS and other navigation sensors, techniques, and applications. Illustrates interconnecting relationships between various types of technologies in order to assure more protected, tough, and accurate PNT. Position, Navigation, and Timing Technologies in the 21st Century: Integrated Satellite Navigation, Sensor Systems, and Civil Applications will appeal to all industry professionals, researchers, and academics involved with the science, engineering, and applications of position, navigation, and timing technologies. pnt21book.com

Beyond Mobility Robert Cervero, Erick Guerra, Stefan Al,2017-12-05 Beyond Mobility also seeks to rethink how projects are planned and designed in cities and suburbs at multiple geographic scales, from micro-designs such as parklets to corridors and city-regions. The book closes with a reflection on the opportunities and challenges in moving beyond mobility, with attention to emerging technologies such as self-driving cars and ride-hailing services and social equity topics such as accessibility, livability, and affordability.

Economic and Environmental Cost of Traffic Congestion in India Vijayalakshmi S S, Krishna Raj,2023-12-12 This book explores one of the most prevailing problems of the contemporary urban world, i.e. traffic congestion and its economic, environmental, and health implications. Generally viewed as an urban menace, the problem of traffic congestion has huge economic implications, which are often overlooked by urban planners. This book examines and quantifies the costs and adverse consequences of traffic congestion, which include emissions, loss of productive hours, fuel wastage, and the adverse effects on the health of commuters, among others. It provides a comprehensive and scientific understanding of the

underlying problems of traffic gridlocks by analyzing empirical evidence from Bengaluru, a city in South India. It also offers solutions and highlights innovative measures that draw from both economic and engineering perspectives to counter and reduce the tangible and intangible costs of traffic congestion. This book will be of interest to both academic and non-academic readers of economics, environmental economics and econometrics, transport economics, urban planning, transport geography, as well as planners and policy makers.

Trademark Dilution Amir Friedman,2022-05-31 The world has changed materially since the foundation of traditional trademark laws, according to which the purpose of a trademark was to serve as a differentiating source indicator, preventing source confusion in the marketplace. Traditionally, trademarks protected the public from likelihood of confusion, assisted in consumer decisions and reduced search costs. The need to award a special scope of protection to famous trademarks from use on non-competing goods was first discussed in Kodak in 1898, holding that the use of the word Kodak for a bicycle company does not mislead consumers but takes unfair advantage of reputation. However, the most significant point in the evolution of dilution, in its early stages, was the case of Odol decided in 1924, which was the first to acknowledge the need to protect the advertising power of trademarks from being diluted, even in the absence of a likelihood of confusion. This book will provide that dilution is a ‘sui generis’ brand remedy applicable to reputed trademarks in accordance to their aggregated inherent and acquired strength. The book will address the non-harmonised nature of dilution, which reflects a problem in an age of borderless trade and cyber commerce and emphasises the need to answer the question: To what extent should reputed trademarks be protected by dilution beyond the traditional trademark protection from likelihood of confusion? The book includes a proposal for an operative legal framework based on conclusions and distinctions derived from the comparison of dilution, as adopted and interpreted in different areas of the world, comparative case studies and comparison with neighbouring legal rights, such as Tort Law, Unfair Competition, Moral Rights, Equitable Rights, Publicity Rights and Unlawful Enrichment.
