The Chinese Typewriter Thomas S. Mullaney, 2017-08-08 Incompatible with modernity -- Puzzling Chinese -- Radical machines -- What do you call a typewriter with no keys? -- Controlling the Kanjisphere -- QWERTY is dead! Long live QWERTY! Lin Yutang and the birth of input -- The typing rebellion

The Chinese Typewriter Thomas S. Mullaney, 2018-10-09 How Chinese characters triumphed over the QWERTY keyboard and laid the foundation for China's information technology successes today. Chinese writing is character based, the one major world script that is neither alphabetic nor syllabic. Through the years, the Chinese written language encountered presumed alphabetic universalism in the form of Morse Code, Braille, stenography, Linotype, punch cards, word processing, and other systems developed with the Latin alphabet in mind. This book is about those encounters—in particular thousands of Chinese characters versus the typewriter and its QWERTY keyboard. Thomas Mullaney describes a fascinating series of experiments, prototypes, failures, and successes in the century-long quest for a workable Chinese typewriter. The earliest Chinese typewriters, Mullaney tells us, were figments of popular imagination, sensational accounts of twelve-foot keyboards with 5,000 keys. One of the first Chinese typewriters actually constructed was invented by a Christian missionary, who organized characters by common usage (but promoted the less-common characters for “Jesus to the common usage level). Later came typewriters manufactured for use in Chinese offices, and typewriting schools that turned out trained “typewriter girls” and “typewriter boys.” Still later was the “Double Pigeon” typewriter produced by the Shanghai Calculator and Typewriter Factory, the typewriter of choice under Mao. Clerks and secretaries in this era experimented with alternative ways of organizing characters on their tray

beds, inventing an input method that was the first instance of “predictive text.” Today, after more than a century of resistance against the alphabetic, not only have Chinese characters prevailed, they form the linguistic substrate of the vibrant world of Chinese information technology. The Chinese Typewriter, not just an “object history” but grappling with broad questions of technological change and global communication, shows how this happened. Reading in Chinese as an Additional Language Liu Li, Dongbo Zhang, 2022-12-29 Reading in Chinese as an Additional Language focuses on Chinese literacy acquisition, which has been considered most difficult by both learners and teachers of Chinese as an additional language (CAL).

Three major areas are covered: (1) acquisition of Chinese characters; (2) reading comprehension subskills and reader's identity; (3) reading instruction and assessment. The first part delves into the foundation of Chinese literacy development—how to learn and teach Chinese characters. The second part examines various learners' reading comprehension subskills, as well as the evolution of learners' literacy identity. The third part explores effective instructional methods and assessment practices for CAL reading development. Theoretically, this book provides frameworks and evidence from both cognitive and sociocultural perspectives on the nature of CAL reading development. Pedagogically, the book showcases how to teach and assess CAL reading skills. Methodologically, this book includes empirical studies using both qualitative and quantitative methods. In terms of scope, the book covers a much broader spectrum of issues about CAL reading research and classroom teaching than has previously been available. Writing is also discussed in several chapters. In terms of technology, the book includes discussion on how the use of computers, the Internet, and social media impacts students' Chinese literacy acquisition. This book will help CAL researchers and educators better understand the nature of CAL reading development and become well informed about CAL classroom teaching and assessment, including the application of interactive approaches to teaching and assessing diverse reading skills.

Language Policy in the People's Republic of China Minglang Zhou, Hongkai Sun, 2006-04-11 Language matters in China. It is about power, identity, opportunities, and, above all, passion and nationalism. During the past five decades China's language engineering projects transformed its linguistic landscape, affecting over one billion people's lives, including both the majority and

minority populations. The Han majority have been juggling between their home vernaculars and the official speech, Putonghua - a speech of no native speakers - and reading their way through a labyrinth of the traditional, simplified, and Pinyin (Roman) scripts. Moreover, the various minority groups have been struggling between their native languages and Chinese, maintaining the former for their heritages and identities and learning the latter for quality education and socioeconomic advancement. The contributors of this volume provide the first comprehensive scrutiny of this sweeping linguistic revolution from three unique perspectives. First, outside scholars critically question the parities between constitutional rights and actual practices and between policies and outcomes. Second, inside policy practitioners review their own project involvements and inside politics, pondering over missteps, undergoing soul-searching, and theorizing their personal experiences. Third, scholars of minority origin give inside views of policy implementations and challenges in their home communities. The volume sheds light on the complexity of language policy making and implementing as well as on the politics and ideology of language in contemporary China.
