CALL Dimensions Mike Levy,Glenn Stockwell,2013-04-15 This volume gives language teachers, software designers, and researchers who wish to use technology in second or foreign language education the information they need to absorb what has been achieved so far and to make sense of it. It is designed to enable the kind of critical reading of a substantial literature that leads to a balanced and detailed knowledge of the field. Chapter by chapter, the book builds, through description, analysis, examples, and discussion, a detailed picture of modern CALL. In this book, the label "CALL" is interpreted broadly to include technology-enhanced language learning, Web-enhanced language learning, and information and

communication technologies for language learning. The work is distinguished by its attention to a range of languages rather than just English. The authors first set the scene and introduce major areas of interest and growth in CALL, and then look in depth at seven important dimensions: design, evaluation, computer-mediated communication, theory, research, practice, and technology. Chapters on each of these topics include a description that reviews the recent literature, identifies themes, and presents representative projects that illustrate the dimension, followed by a discussion that provides in-depth analysis, and a conclusion offering suggestions for further work. Detailed references and links connect the description and discussion with original works and primary sources so the reader can follow up easily on areas of personal interest. Two concluding chapters discuss how the various dimensions might be brought together, the first from a practical point of view, the second with a view to the development of CALL as a whole.

Migration and New Media Mirca Madianou, Daniel Miller, 2013-03-01 How do parents and children care for each other when they are separated because of migration? The way in which transnational families maintain long-distance relationships has been revolutionised by the emergence of new media such as email, instant messaging, social networking sites, webcam and texting. A migrant mother can now call and text her left-behind children several times a day, peruse social networking sites and leave the webcam for 12 hours achieving a sense of co-presence. Drawing on a long-term ethnographic study of prolonged separation between migrant mothers and their children who remain in the Philippines, this book develops groundbreaking theory for understanding both new media and the nature of mediated relationships. It brings together the perspectives of both the mothers and children and shows how the very nature of family relationships is changing. New media, understood as an emerging environment of polymedia, have become integral to the way family relationships are enacted and experienced. The theory of polymedia extends beyond the poignant case study and is developed as a major contribution for understanding the interconnections between digital media and interpersonal relationships.

Course in Miracles: Includes Text, Workbook for Students, Manual for Teachers) (H) Helen Schucman, 2008-10 The great classic work, A Course in Miracles, is devoted to teachings about who we are, our relationships to God and with each other, and the actually mental nature of our bodies and the world. There are three constituent parts to the Course: The Text, a Workbook for Students, and the Manual for Teachers. The Text lays out the theoretical foundation for the metaphysical system of the Course. The Workbook contains a series of 365 Lessons to be practiced daily for the purpose of retraining the mind and healing our perception. Finally, the Manual contains information for and about advanced teachers of God. A Course in Miracles is also about miracles, which students understand to be, in part, a shift in perception to healed vision. But miracles are more than a shift in perception, because the shift has consequences in the world as we see it. The conversational tone of this Original Edition invites the novice student into conversation with the Author, and even advanced students of A Course in Miracles have found a new clarity and a deeper understanding from their study of the Original Edition of the Course. The restoration of the previously lost material and presentation of the text in its original sequence enlivens the conversation with the Author and gives him a presence that some feel is lacking in the later editions. When encountering Schucman and Thetford's original edition, students frequently find fresh clarity as they read its wording or new understanding. Surely study of the Original Edition is essential to your curriculum.
