1200 Update Ways of the World with Sources for the AP® Modern Course Robert W. Strayer, Eric W. Nelson, 2019-09-23 If you plan to begin your course at 1200 C.E., we have a Ways of the World for you! This brand new brief edition combines the thorough examination of significant historical trends, themes, and developments that Strayer/Nelson is known for, but opens with an entirely new “Part One” written specifically for this new course. By first setting the stage of world history at 1200 C.E., Strayer and Nelson provide a thoughtful and insightful commentary that helps students see the big picture of the 1200 start date and models historical thinking and writing throughout. Like the complete fourth edition, this briefer volume is even more focused on the needs of AP® students, with AP® Skills Workshops, DBQ-aligned Working with Evidence features, and more opportunities for students to hone their AP® skills and practice for the exam. Whether you move to a 1200 start date or continue to teach the full course, we have the market-leading book for you!

Frontier Applications of Nature Inspired Computation Mahdi Khosravy, Neeraj Gupta, Nilesh Patel, Tomonobu Senjyu, 2020-03-11 This book addresses the frontier advances in the theory and application of nature-inspired optimization techniques, including solving the quadratic assignment problem, prediction in nature-inspired dynamic optimization, the lion algorithm and its applications, optimizing the operation scheduling of microgrids, PID controllers for two-legged robots, optimizing crane operating times, planning electrical energy distribution systems, automatic design and evaluation of classification pipelines, and optimizing wind-energy power generation plants. The book also presents a variety of nature-inspired methods and illustrates methods of adapting these to said applications. Nature-inspired computation, developed by mimicking natural phenomena, makes a significant contribution toward the solution of non-convex optimization problems that normal mathematical optimizers fail to solve. As such, a wide range of nature-inspired computing approaches has been used in multidisciplinary engineering applications. Written by researchers and

developers from a variety of fields, this book presents the latest findings, novel techniques and pioneering applications.

Advanced Information Networking and Applications Leonard Barolli,Farookh Hussain,Tomoya Enokido,2022-03-30 This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book “Advanced Information Networking and Applications” is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.
