The City That Became Safe Franklin E. Zimring, 2013-11 Discusses many of the ways that New York City dropped its crime rate between the years of 1991 and 2000.

Urban Crime, Criminals, and Victims Per-Olof H. Wikström, 2012-12-06 Crime is largely an urban phenomenon, but the specifically urban and area dimensions of the social processes that are connected with crime have been seriously understated in much recent criminological work ... Such a claim could not have been made forty years ago. (Baldwin & Bottoms, 1976, p. 1). The above statement by Baldwin and Bottoms about the neglect in criminology of the urban dimension of crime was made in the mid-1970s. However, in the last decade there has been a significant upswing in theory and research on crime in the urban environment. Also, new areas of theory and research into urban crime have come into focus. (For overviews see Brantingham & Brantingham, 1984; Davidson, 1981.) One very good example of the increasing interest in urban crime is the recent volume of Crime and Justice entitled Communities and Crime (Reiss & Tonry, 1986), in which Reiss makes a strong argument for the importance of the study of crime in urban communities and for the linking of the ecological and individual traditions in theory and research on crime. A review of the literature on crime in urban environments shows, not unexpectedly, that Anglo-American research heavily dominates the scene (Wikström, 1982; 1987b). Hence, much of the experience we have on urban crime is based on North American and British research and theory.

Crime in the City Lesley Williams Reid, 2003 By exploring the political and economic histories of Atlanta, Boston, Detroit, and New Orleans, the author documents how each city experienced the demise of the industrial, welfare-state political economy and the rise of the post-industrial, absentee-state political economy and how these transformations have affected urban crime rates. In addition, those cities emphasizing criminal justice expenditures at the expense of social welfare expenditures have had more crime than those cities that did not. Political and economic conditions have influenced crime rates, in sometimes surprising ways, across the post-World War II urban landscape.

The Geography of Urban Crime David T. Herbert, 1982 This book introduces the geography of urban crime by integrating the concepts of criminology with the spatial perspective that geography brings to the study of criminal behaviour. The author begins with an examination of the sources of criminological data, and their spatial dimensions, then discusses the use of geographical approaches to study both offences and offenders in their local environment.

The Urban Fabric of Crime and Fear Vania Ceccato, 2012-06-21 How does the city's urban fabric relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

Research Methods Robert Grantham, 2023-08-14 Research Methods: Studying Urban Crime examines aspects of crime from a variety of perspectives and describes how researchers can conduct effective and valuable research in the discipline. Utilizing an urban context, the contributed chapters provide strategies for exploring various elements of crime and a solid knowledge base on crime-related topics. It also showcases methodological approaches to investigate the main topic of each chapter. Select chapters cover topics and methods using qualitative data while others employ quantitative data. Topics addressed include social attitudes toward sex offenders, the impact of incarceration on an individual's labor market prospects, studying tax cuts and links to crime in large cities, studying violence crime victims' satisfaction with the police, the feminization of urban crime, and more. Every chapter contains key terms, an introduction, a chapter summary, discussion questions, and references to enhance student comprehension and engagement. Featuring the scholarship of knowledgeable experts within the discipline, Research Methods is an ideal supplemental reader for courses that address research methods in criminal justice and criminology.

Urban Crime Prevention, Surveillance, and Restorative Justice Paul Knepper, Jonathan Doak, Joanna Shapland, 2009-01-15 Crime prevention, surveillance, and restorative justice have transformed the response to crime in recent years. Each has had a significant impact on policy, introducing new concepts and reassessing traditional aims and priorities. While such efforts attract a great deal of criminological interest, they tend to be discussed within separate and discrete literatures, rather than as part of a cohesive and concerted effort. Urban Crime Prevention, Surveillance, and Restorative Justice: Effects of Social Technologies examines these emerging trends which are increasingly being contemplated by police, courts, and corrections agencies, and explores how these three concepts are changing national and international policies concerning crime. Going beyond the conventional methods for crime reduction the book addresses these topics within a larger framework of social technology, defined as coordinated action derived from an organized field of knowledge to achieve a particular result. It focuses on efforts aimed at reducing and responding to crime without reliance on the conventional criminal justice practices of police and prisons. The contributors discuss diffusion of knowledge about crime through media and criminological research, surveillance technologies and their effect on crime, and finally, the concept of restorative justice, with an emphasis on juvenile justice and its relationship to social regulations in general. Comprising the contributions of numerous experts in the field of criminology, the book asks What is the interaction between knowledge, planning, and social repercussions? The answer to this question forms a valuable basis from which to evaluate proposals for social improvements related to crime.

Urban Crime and Social Disorganization in China Haiyan Xiong, 2015-10-19 The book selects Guangzhou, which has the highest crime rate in China, as a research site to study patterns of crime and social disorganization. It

combines methods of content analyses with ethnographic fieldwork. The research first selected 1422 crime cases reported by the influential Southern Metropolis Daily in 2013 to identify the general crime-distribution pattern. The findings suggest that both spatial and demographic-density distribution of criminal cases in Guangzhou show a gradient circle pattern from city center to suburb. Focusing on three selected typical communities, the thesis finds important patterns of crime and social disorganization that are very different from Western research. These findings are organized according to major correlates of social disorganization, including unemployment, marriage and family, residential stability, ethnic heterogeneity, social equality, social capital, social control, social isolation and social exclusion, community cohesion, trust and fear, traditions, morals and beliefs, language. These findings extend and elaborate Social Disorganization Theory in urban China. This book can be used as a textbook for college and Ph.D. students majoring in law and sociology, as well as a reference book for professionals in related fields. Although academic, this book is written in such a way that it will also appeal to a general audience.

Social Capital and Urban Crime Danielle Lively Neal, 2011 Social capital is often hailed as the solution to many of the problems present in America today, but Neal's work indicates that this belief may be misplaced. The literature suggests that the levels of social capital in a community affect the way members of the community interact with one another and may also impact the level of crime. To examine this connection, Neal examines levels of crime in U.S. cities over several years along with the levels of social capital. She finds that there is strong evidence of a correlation between social capital and crime; however it appears that a decrease in crime tends to precede increases in social capital rather than the other way around.

Bleeding Out Thomas Abt, 2019-06-25 From a Harvard scholar and former Obama official, a powerful proposal for curtailing violent crime in America Urban violence is one of the most divisive and allegedly intractable issues of our time. But as Harvard scholar Thomas Abt shows in *Bleeding Out*, we actually possess all the tools necessary to stem violence in our cities. Coupling the latest social science with firsthand experience as a crime-fighter, Abt proposes a relentless focus on violence itself -- not drugs, gangs, or guns. Because violence is sticky, clustering among small groups of people and places, it can be predicted and prevented using a series of smart-on-crime strategies that do not require new laws or big budgets. Bringing these strategies together, Abt offers a concrete, cost-effective plan to reduce homicides by over 50 percent in eight years, saving more than 12,000 lives nationally. Violence acts as a linchpin for urban poverty, so curbing such crime can unlock the untapped potential of our cities' most disadvantaged communities and help us to bridge the nation's larger economic and social divides. Urgent yet hopeful, *Bleeding Out* offers practical solutions to the national emergency of urban violence - and challenges readers to demand action.

Urban Crime Hernando Gómez Buendía, 1989 Aim of this study is the description and comparative assessment of strategies for the prevention and correction of ordinary crime in urban environments. It endeavours to analyse the accumulated cross national experience in order to help identify those strategies which appear best to combine respect for human rights.

The Mysteries of the Cities Stephen Knight, 2011-11-08 A popular crime genre in the nineteenth century, urban mysteries have largely been ignored ever since. This historical and critical text examines the origins of the innovative genre, which grappled with the rise of enormous, anonymous cities, beginning in France in 1842, then spreading rapidly across the continent and to America and Australia. Writers covered include Eugene Sue, George Reynolds, Paul Féval, George Lippard, Ned Buntline and Donald Cameron.
