*Slides for Students* Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

*Practical Image and Video Processing Using MATLAB* Oge Marques,2011-08-04 UP-TO-DATE, TECHNICALLY ACCURATE COVERAGE OF ESSENTIAL TOPICS IN IMAGE AND VIDEO PROCESSING This is the first book to combine image and video processing with a practical MATLAB®-oriented approach in order to demonstrate the most important image and video techniques and algorithms. Utilizing minimal math, the contents are presented in a clear, objective manner, emphasizing and encouraging experimentation. The book has been organized into two parts. Part I: Image Processing begins with an overview of the field, then introduces the fundamental concepts, notation, and terminology associated with image representation and basic image processing operations. Next, it discusses MATLAB® and its Image Processing Toolbox with the start of a series of chapters with hands-on activities and step-by-step tutorials. *Designing Inclusive Futures* P. Langdon,P. John Clarkson,P. Robinson,2008-03-07 “Designing Inclusive Futures” reflects the need to explore, in a coherent way, the issues and practicalities that lie behind design that is intended to extend our active future lives. This encompasses design for inclusion in daily life at home but also extends to the workplace and for products within these contexts. For example, given trends in employment sector growth, skills requirements, labour supply and demographic change, there is a need to predict the critical areas where individual capabilities are mismatched with the physical, social and organisational demands of work. This mismatch, which can be addressed within the domain of inclusive design, is pervasively linked to real artefacts in workspaces and their intersection with the health factors that relate to ageing. This book is the result of the fourth CWUAAT workshop held in Cambridge, England in April 2008.

*The Story of the Selma Voting Rights Marches in Photographs* David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans

from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

*Teaching and Learning at a Distance* Michael Simonson,Susan Zvacek,2024-01-01

*Teaching and Learning at a Distance* is written for introductory distance education courses for preservice or in-service teachers, and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to design courses, evaluate programs, and identify issues and trends affecting the field. In this text we take the following themes: The first theme is the definition of distance education. Before we started writing the first edition of *Teaching and Learning at a Distance* we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan, but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica. The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance. The best practices presented in *Teaching and Learning at a Distance* are validated by scientific evidence. Certainly there are “rules of thumb,” but we have always attempted to only include recommendations that can be supported by research. The third theme of *Teaching and Learning at a Distance* is derived from Richard Clark’s famous quote published in the *Review of Educational Research* asserting that media are mere vehicles that do not directly influence achievement. Clark’s controversial work is discussed in the book, but is also fundamental to the book’s advocacy for distance education—in other words, we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn. Distance delivered instruction is not a magical approach that makes learners achieve more. Equivalency theory is the fourth theme of the book. Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The final theme for *Teaching and Learning at a Distance* is the idea that the book should be comprehensive—that it should cover as much of the various ways instruction is made available to distant learners as is possible. It can serve as a stand-alone source of information.

**Ichishkiin Sinwit Yakama / Yakima Sahaptin Dictionary** Virginia R.

Beavert, Sharon L. Hargus, 2018-03 Sahaptin, or Ichishkiin Sinwit (literally, this language), is a Plateau Penutian language spoken in south-central Washington and northern Oregon. This dictionary documents the dialect of Sahaptin that is spoken by the Yakama people. *Ichishkiin Sinwit Yakama / Yakima Sahaptin Dictionary* is the first modern published dictionary of any Sahaptin dialect. The dictionary is divided into three sections: a Sahaptin-English section; an English-Sahaptin section; and a section listing roots used in the formation of Sahaptin words. The Sahaptin-English section contains approximately 3,500 headwords, over 4,500 example sentences, more than 100 images, and over 9,200 sound files available online. Copious cross-references alert readers to related words elsewhere in the Sahaptin-English section. The English-Sahaptin and roots sections serve as indices to the Sahaptin-English section. In the English-Sahaptin section, users can look up the Sahaptin equivalents of English words. In the root section, users can see words from different parts of the dictionary that share the same component of

meaning. The dictionary also contains essays by noted Plateau linguist Bruce Rigsby (professor emeritus, University of Queensland) on the histories and current usage of the terms Sahaptin and Yakima / Yakama.

**Multilingual Digital Storytelling** Jim Anderson, Vicky Macleroy, 2016-03-02

Classrooms are increasingly multicultural in their social composition, and students are increasingly connected, through digital media, to local and global networks. However, pedagogy has failed to take full advantage of the opportunities these resources represent. *Multilingual Digital Storytelling* draws attention to the interfaces between learner engagement, creativity and critical digital literacy, as well as addressing the multilingual within the multiliteracies framework. Addressing a significant gap in the field of multiliteracies by focusing on multilingualism, this book explores new digital spaces for language learning and methods of extending understandings of youth literacy in an increasingly interconnected world. Drawing on innovative and multi-site research projects based in mainstream and community schools in London and overseas, this book discusses how young people become engaged creatively and critically with literacy by demonstrating how digital storytelling can be used as a tool for language development. The book begins by considering linguistic, cultural, cognitive and social dimensions of language learning from a theoretical perspective, whilst the second part focuses on practical case studies that reflect and illustrate these theoretical principles. Offering a powerful new perspective on multiliteracies pedagogy, *Multilingual Digital Storytelling* will appeal to researchers and academics in the fields of education, applied linguistics, sociology and youth and community studies. It will also be an invaluable resource for teachers, teacher educators, curriculum planners and policymakers.

*Multimedia Information Retrieval* Stefan Rueger, 2022-05-31

At its very core multimedia information retrieval means the process of searching for and finding multimedia documents; the corresponding research field is concerned with building the best possible multimedia search engines. The intriguing bit here is that the query itself can be a multimedia excerpt: For example, when you walk around in an unknown place and stumble across an interesting landmark, would it not be great if you could just take a picture with your mobile phone and send it to a service that finds a similar picture in a

database and tells you more about the building -- and about its significance, for that matter? This book goes further by examining the full matrix of a variety of query modes versus document types. How do you retrieve a music piece by humming? What if you want to find news video clips on forest fires using a still image? The text discusses underlying techniques and common approaches to facilitate multimedia search engines from metadata driven retrieval, via piggy-back text retrieval where automated processes create text surrogates for multimedia, automated image annotation and content-based retrieval. The latter is studied in great depth looking at features and distances, and how to effectively combine them for efficient retrieval, to a point where the readers have the ingredients and recipe in their hands for building their own multimedia search engines. Supporting users in their resource discovery mission when hunting for multimedia material is not a technological indexing problem alone. We look at interactive ways of engaging with repositories through browsing and relevance feedback, roping in geographical context, and providing visual summaries for videos. The book concludes with an overview of state-of-the-art research projects in the area of multimedia information retrieval, which gives an indication of the research and development trends and, thereby, a glimpse of the future world.
