It describes the operational scenarios and emerging multimedia and data-centric applications in demand and discusses the main techno-economic drivers that are believed to be pivotal for an efficient and cost-effective delivery of mobile broadband PPDR communications. The capabilities and features of the LTE standard for improved support of mission-critical communications (e.g., proximity services, group communications) are covered in detail. Also, different network implementation options to deliver mobile broadband PPDR communications services over dedicated or commercial LTE-based networks are discussed, including the applicability of the Mobile Virtual Network Operator (MVNO) model and other hybrid models. Radio spectrum matters are also discussed in depth, outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for PPDR communications and suitable dynamic spectrum sharing solutions in PPDR communications. Explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics.

Light, Bright and Polite Josh Ochs, 2015-01-03 Here's what you'll learn in this book: Ch 1 How social media can hurt your kid's future Ch 2 Common social media mistakes made Ch 3 What social media posts and strategies impress colleges Ch 4 What social media posts and strategies impress future employers Ch 5 Social networks that help you shine online Ch 6 How and when to privatize your image Ch 7 How to talk to your kids Ch 8 How to make a plan together Ch 9 Case studies from successful students making a difference Over the past several years, I have had the great opportunity to work with some of the world's best brands. My staff and I developed and implemented techniques to help these companies shine online. And they have! By employing a few social media strategies, these great companies are finding the customers they want and deserve. It quickly came to my attention that my techniques would be valuable to families who are preparing their kids for college. Many kids have no idea how their digital footprint might be viewed by others and how others' perceptions can hold them back. During a 2013 Kaplan telephone questionnaire, 31% of college admissions officers said that they did visit applicants Facebook and other social media pages to gain more information on the student. 30% said that they had encountered information on social media that had a negative influence on an applicant's chance of being accepted. This goes to show that anything we put online, no matter how long ago, can be brought up on the first page of Google results and we need to be vigilant on what we allow others to see.¹ In this book, you will receive the same strategies I've used to help many successful companies, but tailored to students and future leaders, to help them impress colleges and future employers. As I've traveled the country for the past year and spoken to over 20,000 students, the feedback has been clear: these methods work, helping kids convey their best selves online. These methods employed keep their online images and communications Light, Bright and Polite(r), which allows colleges and employers find the best people to represent their campus upon graduation. Your kid can be among them. It's a competitive market out there, so let's not be disqualified from something to which you're aspiring without ever having a real chance at interviewing for the opportunity! It is never too early to start planning ahead. Your kids may not be thinking about it, but certainly you understand from

experience that what you do now can have lasting effects. At the very least, what you do now lays the foundation for the habits that you will have years from now. Even if your children are not on social media yet, their reputation online starts as soon as their friends are online and posting photos of them, tagging them. So, there's a lot to consider! Since parents have limited time, this book isn't designed to teach everything about social media. I'm not here to give you a list of 100 things not to do on social media. Instead, my goal is to have students and parents skim through this book and be able to pick up one or two helpful tips that can make all the difference. What accomplishments does your kid want to have in the next five years? Getting into college Full ride scholarship Varsity sports team Study abroad opportunity Leadership award Community service Getting into a prestigious private high school Getting the perfect internship that launches their career If any of these apply, then you need to pay attention to all of the messages that your child sends out on social media. There's a good chance that 50% of their tweets might not be helping them to reach their goals. They need to be vigilant. Josh Ochs @JoshOchs

Military Communications Christopher H. Sterling,2007-10-16 An alphabetically organized encyclopedia that provides both a history of military communications and an assessment of current methods and applications. Military Communications: From Ancient Times to the 21st Century is the first comprehensive reference work on the applications of communications technology to military tactics and strategy—a field that is just now coming into its own as a focus of historical study. Ranging from ancient times to the war in Iraq, it offers over 300 alphabetically organized entries covering many methods and modes of transmitting communication through the centuries, as well as key personalities, organizations, strategic applications, and more. Military Communications includes examples from armed forces around the world, with a focus on the United States, where many of the most dramatic advances in communications technology and techniques were realized. A number of entries focus on specific battles where communications superiority helped turn the tide, including Tsushima (1905), Tannenberg and the Marne (both 1914), Jutland (1916), and Midway (1942). The book also addresses a range of related topics such as codebreaking, propaganda, and the development of civilian telecommunications.

Certain to Win Chet Richards,2004-06-24 • Advance reviews of *Certain to Win* • Annotated Table of Contents The book is both an excellent primer for those new to Boyd and a catalyst to those with business experience trying to internalize the relevance of Boyd's thinking. Chuck Leader, LtCol USMC (Ret.) and information technology company CEO; A Winning Combination, Marine Corps Gazette, March 2005. *Certain to Win* [Sun Tzu's prognosis for generals who follow his advice] develops the strategy of the late US Air Force Colonel John R. Boyd for the world of business. The success of Robert Coram's monumental biography, *Boyd, the Fighter Pilot Who Changed the Art of War*, rekindled interest in this obscure pilot and documented his influence on military matters ranging from his early work on fighter tactics to the USMC's maneuver warfare doctrine to the planning for Operation Desert Storm. Unfortunately Boyd's written legacy, consisting of a single paper and a four-set cycle of briefings, addresses strategy only in war. [All of Boyd's briefings are available on Defense and the National Interest.] Boyd and Business Boyd did study business. He read everything he could find on the Toyota Production System and came to consider it as an implementation of ideas similar to his own. He took business into account when he formulated the final version of his "OODA loop" and in his last major briefing, *Conceptual Spiral*, on science and technology. He read and commented on early drafts of this manuscript, but he never wrote on how business could operate more profitably by using his ideas. Other writers and business strategists have taken up the challenge, introducing Boyd's concepts and suggesting applications to business. Keith Hammonds, in the magazine *Fast Company*, George Stalk and Tom Hout in *Competing Against Time*, and Tom Peters most recently in *Re-imagine!* have described the OODA loop and its effects on competitors. They made significant contributions. Successful businesses, though, don't concentrate on affecting competitors but on enticing customers. You could apply Boyd all you wanted to competitors, but unless this somehow caused customers to buy your products and services, you've wasted time and money. If this were all there were to Boyd, he would rate at most a sidebar in business strategy. Business is not War Part of the problem has been Boyd's focus on war, where "affecting competitors" is the whole idea. Armed conflict was his life for nearly 50 years, first as a fighter pilot, then as a tactician and an instructor of fighter pilots, and after his retirement, as a military philosopher. Coram describes (and I know from personal experience) how his quest consumed Boyd virtually every waking hour. It was not a monastic existence, though, since John was above everything else a competitor and loved to argue over beer and cigars far into the night. During most of the 1970s and 80s he worked at the Pentagon, where he could share ideas and debate with other strategists and practitioners of the art of war. The result was the remarkable synthesis we know as *Patterns of Conflict*. Discussions about generals and campaigns, however, did not give Boyd much insight into competition in other areas,

Emerging Technologies for Disaster Resilience Mihoko Sakurai,Rajib Shaw,2021-05-06 Technological advances have helped to enhance disaster resilience through better risk reduction, response, mitigation, rehabilitation and reconstruction. In former times, it was local and traditional knowledge that was mainly relied upon for disaster risk reduction. Much of this local knowledge is still valid in today's world, even though possibly in different forms and contexts, and local knowledge remains a shared part of life within the communities. In contrast, with the advent of science and technology, scientists and engineers have become owners of advanced technologies, which have contributed significantly to reducing disaster risks across the globe. This book analyses emerging technologies and their effects in enhancing disaster resilience. It also evaluates the gaps, challenges, capacities required and the way forward for future disaster management. A wide variety of technologies are addressed, focusing specifically on new technologies such as cyber

physical systems, geotechnology, drone, and virtual reality (VR)/ augmented reality (AR). Other sets of emerging advanced technologies including an early warning system and a decision support system are also reported on. Moreover, the book provides a variety of discussions regarding information management, communication, and community resilience at the time of a disaster. This book’s coverage of different aspects of new technologies makes it a valuable resource for students, researchers, academics, policymakers, and development practitioners.
