**Podcasting with Youth** Lucas Maxwell, 2020-06-03 Learn how to set up a student-led podcast in your library, involve staff from several subject areas, market effectively, what challenges you are likely to face, and how podcasting will benefit the students and school overall. Podcasting from the library is a growing movement. *Podcasting with Youth* teaches librarians and educators how to set up, develop, market, and deliver a successful

youth-led podcast from their library. It also includes student input on what podcasters have learned, the challenges they have faced, and their plans for the future. Author Lucas Maxwell offers many helpful tips to librarians who want to learn how to create a program that puts students in charge and allows them to produce a tangible product that their peers will be interested in.

The book Dynamic Curriculum Development and Design Strategies for Effective Online Learning in Higher Education offers a practical guide and insights into the latest trends and best practices for curriculum development and design in the context of online learning. Organized into three main sections, the book begins with an overview of the current landscape of online learning and the challenges and opportunities it presents for curriculum development. It then delves into the design and development of online courses, followed by the implementation and delivery of those courses. The book is relevant to both novice and experienced educators and practitioners who are involved in designing, developing, and delivering online courses in higher education. It provides a comprehensive understanding of the strategies and techniques required to design and deliver effective online courses, while examining the challenges and opportunities presented by online learning in higher education. **The Professor's Guide to Taming Technology** Kathleen P. King, Thomas D. Cox, 2011-01-01 This book is provided as a guide, encouragement and handbook for faculty to introduce digital media in language you can understand and provide strategies and activities you can quickly assimilate into your teaching. We are excited that more people will be able to benefit from the powerful help and guidance contained in this book. We are even more exhilarated as we anticipate how each of you will discover applications and new directions we would never anticipate, and look forward. We look forward to your innovations as you use the material you discover here. This book responds to the needs of our changing world and students by revealing innovative technology applications and how faculty are and can use digital media in teaching in higher education because faculty make the quickest changes and learn how to do it best. It is a valuable resource for faculty from faculty, because it allows the sharing of successful teaching experiences with digital media with our worldwide colleagues so they may modify it, extend it, and

improve it. Moreover, in our work with faculty across all disciplines, we also find that many struggle to think about teaching in ways in which they can incorporate technology meaningfully. While we might be experts in our discipline (chemistry, philosophy, music, etc) due to the curriculum of terminal degrees, we might not have strong preparation in instructional design. We have been fortunate to bring together faculty experts across different disciplines to specifically speak about how and why to use digital media in higher education settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs.

**Amazing Slide Videographic** Dhony Firmansyah, 2018-05-21 Menyederhanakan data yang berlimpah dan mengubahnya menjadi bentuk visual merupakan tantangan tersendiri bagi presenter yang sehari-harinya berkutat dengan data. Perlu teknik penyajian yang baik, sehingga bentuk visual yang informatif ini bisa diterima di beragam media, baik offline maupun online. Infografis telah menjadi solusi visualisasi data dengan tampilan yang menarik dan pesan yang konkrit. Infografis dengan visual yang memukau, membuat audiens interest untuk menikmati sajian informasi dan larut di dalamnya. Karena infografis berdampak positif, beragam bentuk infografis pun mulai bermunculan, dari yang statis hingga dinamis. Banyak riset yang menyebutkan, bahwa gambar bergerak jauh lebih menarik perhatian dibanding tampilan statis. Oleh karena itu, animasi infografis yang dikenal dengan videografis menjadi tren baru untuk visualisasi data dinamis dengan wujud motion infographic. Audiens tidak lagi harus membaca banyak data, tetapi cukup melihat video yang menyajikan visual menarik, audio informatif, dan animasi unik yang meningkatkan kualitas serapan dan simpulan informasi. Videografis menggabungkan visualisasi data, story telling dan teknik animasi dalam satu kesatuan harmoni. Teknik pembuatannya yang mudah, efektif dan sangat ekonomis menjadikan videografis sebagai alternatif utama sajian informasi, mulai dari iklan komersial, e-learning, presentasi online dan offline, profil corporate, pengenalan produk, publikasi riset hingga sosialisasi peraturan dan Undang-undang. Pentingnya videografis sebagai informasi berwujud animasi memerlukan panduan yang runut, sederhana dan profesional. *Media dan Teknologi Pembelajaran Edisi Kedua* Prof. Dr. Muhammad Yaumi, M.Hum., M.A., 2021-09-01 Lahirnya buku ini didorong oleh begitu langkanya buku rujukan utama atau referensi penting yang berkenaan dengan kajian media dan teknologi pembelajaran. Kebanyakan buku yang beredar merupakan buku terjemahan atau referensi lama yang tidak memperhatikan perkembangan kajian teknologi pembelajaran dari masa ke masa. Padahal, dinamika kemajuan ilmu pengetahuan dan teknologi (saintek) begitu cepat dan arus globalisasi informasi dan komunikasi sangat deras, sehingga mengharuskan untuk memperbarui (merevisi) konten buku rujukan tersebut. Edisi kedua ini menyajikan

beberapa penambahan materi yang telah disesuaikan dengan kebutuhan mahasiswa, serta mengikuti perkembangan kajian teknologi pembelajaran terkini. Pada bab tujuh hingga sembilan, disajikan materi terkait belajar melalui media audio dan media video; serta dilanjutkan dengan pembahasan blended learning, yakni pepaduan pembelajaran tatap muka dan pembelajaran daring (online). Materi ini sangat penting untuk dipahami para mahasiswa yang kini dituntut melaksanakan pembelajaran jarak jauh (daring). Karenanya, pembahasan materi pembelajaran jarak jauh berbasis teknologi informasi dan komunikasi (TIK) di bab terakhir saling berkaitan dan menjadi amat relevan dengan tuntutan pembelajaran di masa kini. Buku teks pengantar ini sejatinya merupakan rujukan utama untuk para mahasiswa Fakultas Tarbiyah dan Keguruan di perguruan tinggi agama, dan tentunya juga patut dijadikan rujukan pembelajaran bagi mahasiswa pada perguruan tinggi umum lainnya untuk memperoleh pemahaman komprehensif tentang pengembangan media dan teknologi. *Applications of Machine Learning and Artificial Intelligence in Education* Khadimally, Seda, 2022-02-18 Modes and models of learning and instruction have shown a significant shift from yesterday's conventional learning and

teaching given this era's current educational and social contexts. Learners are no longer learning and communicating with human-generated, computed, and mediated—or traditional—learning and instructional practices, paving the way for machine-facilitated communication, learning, and teaching tools. Learning and instruction, communication and information exchange, as well as gathering, coding, analyzing, and synthesizing data have proven to be in need of even more innovative technology-moderated tools. Applications of Machine Learning and Artificial Intelligence in Education focuses on the parameters of remote learning, machine learning, deep learning, and artificial intelligence under 21st-century learning and instructional contexts. Covering topics such as data coding and social networking technology, it is ideal for learners with an interest in the deep learning discipline, educators, educational technologists, instructional designers, and data evaluators, as well as special interest groups (SGIs) in the discipline.

**Electronic Voices: Contact with Another Dimension?** Anabela Cardoso, 2010 This is the story of a normal woman who experienced the impossible objective contacts with another dimension through loud and clear voices received by electronic means during Instrumental Transcommunication (ITC) experiments. Dr Cardoso, a senior diplomat, describes the astounding experiences that transformed her life since she started ITC research in 1997. She presents extracts of conversations with her deceased loved ones and other personalities who insisted that they live in another world. The level of agreement between communications received by the author and concepts, even words, recorded by other experimenters from Jrgenson and Raudive to contemporary operators, constitutes compelling evidence of the reality of the next world that awaits us all. As communicators from Timestream told Dr Cardoso: The dead pass through here, you pass through here!. Electronic Voices breaks new ground in the literature
