The Music Has Gone Out of the Movement David C. Carter,2012-09-01 After the passage of sweeping civil rights and voting rights legislation in 1964 and 1965, the civil rights movement stood poised to build on considerable momentum. In a famous speech at Howard University in 1965, President Lyndon B. Johnson declared that victory in the next battle for civil rights would be measured in equal results rather than equal rights and opportunities. It seemed that for a brief moment the White House and champions of racial equality shared the same objectives and priorities. Finding common ground proved elusive, however, in a climate of growing social and political unrest marked by urban riots, the Vietnam War, and resurgent conservatism. Examining grassroots movements and organizations and their complicated relationships with the federal government and state authorities between 1965 and 1968, David C. Carter takes readers through the inner workings of local civil rights coalitions as they tried to maintain strength within their organizations while facing both overt and subtle opposition from state and federal officials. He also highlights internal debates and divisions within the White House and the executive branch, demonstrating that the federal government's relationship to the movement and its major goals was never as clear-cut as the president's progressive rhetoric suggested. Carter reveals the complex and often tense relationships between the Johnson administration and activist groups advocating further social change, and he extends the traditional timeline of the civil rights movement beyond the passage of the Voting Rights Act.

The Birth of Head Start Maris A. Vinovskis,2008-11-15 One of the most popular and enduring legacies of President Lyndon B. Johnson's Great Society programs, Project Head Start continues to support young children of low-income families—close to one million annually—by providing a range of developmental and educational services. Yet as Head Start reaches its fortieth anniversary, debates over the function and scope of this federal program persist. Although the program's importance is unquestioned across party lines, the direction of its future—whether toward a greater focus on school readiness and literacy or the continuation of a holistic approach—remains a point of contention. Policymakers proposing to reform Head Start often invoke its origins to justify their position, but until now no comprehensive political history of the program has existed. Maris A. Vinovskis here provides an in-depth look at the nation's largest and best known—yet politically challenged—early education program. The Birth of Head Start sets the record straight on the program's intended aims, documenting key decisions made during its formative years. While previous accounts of Head Start have neglected the contributions of important participants such as federal education officials and members of Congress, Vinovskis's history is the first to consider the relationship between politics and policymaking and how this interaction has shaped the program. This thorough and incisive book will be essential for policymakers and legislators interested in prekindergarten education and will inform future discussions on early intervention services for disadvantaged children.

Formative Acts Stephen Skowronek,Matthew Glassman,2008-08-20 Political actors are a diverse lot, animated and engaged by the prospect of change. Operating inside and outside the government, they are out to instigate change or inhibit it, to promote or deflect it, to channel or absorb it. Their interactions keep the American polity in a perpetual state of development, rendering it always to some degree unsettled. In the past, the study of American political development has treated political institutions and ideas as disembodied subjects. In Formative Acts, leading scholars in the field seek to refocus the debate on the political agency of people, analyzing various modes of action and various sites of interaction with an eye to their transformative potential. Seventeen essays illuminate critical junctures in American political development—from the social movements for women's suffrage, civil rights, and workers' rights, to Reconstruction, to the regulation of prescription drugs—as vantage points from which to examine how change is enacted. Contributors question not simply how political actors behave but also how and to what extent their actions change the American polity itself. At the same time, the transformative act is presented as larger than any one actor or group of actors; often the act of transformation involves many actors and a panoply of motives. Three concepts claim center stage: political entrepreneurship—especially as it directs attention to ambiguity and malleability in the rules of action found in any complex institutional setting; political leadership—specifically the conundrum of democratic leadership; and political agency—particularly the strongly voluntaristic construction of that concept found within American political culture. The authors focus on each of these categories to link the study of political action more effectively to our understanding of the formation and reformation of American government and politics.

Trinidad and Tobago Lise S. Winer,1993-02-01 This volume describes the English and English Creole of Trinidad and Tobago. Sources from the early 19th through late 20th centuries are gathered from a wide range of materials: novels, editorials, advertisements, cartoons, proverbs, newspaper articles, plays, lyrics of traditional songs and calypsos, and oral interviews. Many of the older texts are now made easily accessible for the first time. The introduction includes descriptions of the

historical background, the sound system, grammar and vocabulary, speech styles, social and linguistic interaction of Creole and English, and implications for education and spelling. The older sources demonstrate much closer links to other Caribbean English Creoles than previously recognized. The texts and recordings of oral interviews are invaluable resources for researchers and teachers in linguistics, Creole Studies, Caribbean studies, literature, anthropology and history.
