Laytham, 2012-10-10 Should Christians w00t or wail about the scope and power of modern entertainment? Maybe both. But first, Christians should think theologically about our human passion to be entertained as it relates to the popular culture

that entertains us. Avoiding the one-size-fits-all celebrations and condemnations that characterize the current fad of pop culture analyses, this book engages entertainments case by case, uncovering the imaginative patterns and shaping power of our amusements. Individual chapters weave together analyses of entertainment forms, formats, technologies, trends, contents, and audiences to display entertainment as a multifaceted formational ecology.

Digital @ Scale Anand Swaminathan, Jürgen Meffert, 2017-06-26 A blueprint for reinventing the core of your business Value in the next phase of the digital era will go to those companies that don't just try digital but also scale it. Digital@Scale examines what it takes for companies to break through the gravitational pull of their legacy organizations and capture the full value of digital. Digging into more than fifty detailed case studies and years of McKinsey experience and data, the authors, along with a group of expert contributors, show how companies can move beyond incremental change to transform the business where the greatest value is generated—at its core. The authors provide practical insights into the three pillars of digital transformations that successfully scale: reinventing the business model, building out a business architecture from the customer back into the organization, and establishing an 'amoeba' IT and organizational foundation that learns and evolves. This is the ideal guide for all leaders who recognize the power and promise of a digital transformation.

**Behind the News** Sarat Chandran Nair, 2017-12-08  
Overweight, though, in showcasing topical economic issues that excite reader interest in general, *Behind the News, On a Journalist's Radar*, spreads out a rich and varied fare the sum and substance of which can't be defined by a single theme or title. Tersely presented is a pack of incisive reviews of headline-making stuff that come to surface often sparking lively debates right across the spectrum. *Behind the News* is all the more conspicuous for its venturesome and, indeed, the first ever, attempt to project a personality, magisterial enough to be equated with the tumultuous millennium that has just gone by. Elsewhere, the author picks up signals from the omissions and commissions of a host of law-makers, central bankers and the media to boot. Heroes and hero-worship are alien to the ethos of the financial world but *Behind the News* spots one in the thick of the 1997 currency crisis. For relief and spicing, fugitive pieces from personal life, career rounds and fictional sources too are keyed in. As for the Indian economy, the book's main focus, the author pithily notes it had never gained momentum at any point in history, and is unlikely to, given its empire-like structure and organisation. Also due from the author: *All in the Shadow of Marx*.

*SandStory* Joe Castillo, 2014 Unique, powerful, visceral, and spiritually moving are just a few of the words that have been used to describe what artist and America's Got Talent finalist Joe Castillo does.

The book provides detailed analyses of how technology realigns the boundaries between connection, consciousness and community. This book

reveals that alongside every engaged, nurturing and supportive group are those who are excluded, marginalised, ridiculed, or forgotten. It explores the argument that community is not an inevitable result of communication. Following an introduction from the Editor, the book is then divided into four sections exploring communities and resistance, structures of sharing, professional communication and fandom and consumption. Digital Dialogues and Community 2.0 combines ethnographic methods and professional expertise to open new spaces for thinking about language, identity, and social connections. Provides innovative interdisciplinary research, incorporating Library and Information Management, Internet Studies, Cultural Studies, Media Studies, Disability Studies and Community Management Offers a balanced approach between the 'bottom up' and 'top down' development of online communities Demonstrates the consequences on the configuration of a community when consumers become producers and their lives and experiences are commodified

**The Divergence Conspiracy** Keith

Bottin, 2014-06-03 A CIA agent embedded in the New York City financial community is assigned with his partner to handle the financing of the divestiture of billions of dollars of corporate holdings. The holdings are held by an elderly and wealthy Hong Kong businessman. The agent is curious why so much funding needs to be generated in such a short

period of time to fund the flu vaccine and cancer research at Shanghai Genomics. He later discovers that former scientists at Shanghai Genomics have died under mysterious circumstances. Then a close friend working on the divestitures is killed. Thereafter, the agent retrieves a sample of the flu vaccine and the DNA is scanned. Genes produced in the project would make the Chinese a super race. The agent reports his findings to the CIA director, who in turn reports to the president of the United States. The president discusses the matter with the president of China, and a plan is conceived to eliminate the flu vaccine dosages, which are located on a refrigerated ship in international waters. The plan includes the use of two B-2 stealth bombers armed with neutron bombs that would kill the live flu vaccine but not harm the ship. Will the plan be successful? Digital Health Eric D. Perakslis, Martin Stanley, 2021-03-19 Digital health represents the fastest growing sector of healthcare. From internet-connected wearable sensors to diagnostics tests and disease treatments, it is often touted as the revolution set to solve the imperfections in healthcare delivery worldwide. While the health value of digital health technology includes greater convenience, more personalized treatments, and more accurate data capture of fitness and wellness, these devices also carry the concurrent risks of technological crime and abuses pervasive to cyber space. Even today, the medical world has been slow to respond to these emerging risks, despite the growing permanence of digital health technology within daily medical practice. With over 30 years of joint experience across the medical and cybersecurity industries, Eric D. Perakslis and Martin Stanley provide in this volume the first reference framework for the benefits and risks of digital health technologies in practice. Drawing on expert interviews, original research, and personal storytelling, they explore the theory, science, and mathematics behind the benefits, risks, and values of emerging digital technologies in healthcare. Moving from an overview of biomedical product regulation and the evolution of digital technologies in healthcare,

Perakslis and Stanley propose from their research a set of ten categories of digital side effects, or toxicities, that must be managed for digital health technology to realize its promise. These ten toxicities consist of adversary-driven threats to privacy such as physical security, cybersecurity, medical misinformation, and charlatanism, and non-adversary-driven threats such as deregulation, cyberchondria, over-diagnosis/over-treatment, user error, and financial toxicity. By arming readers with the knowledge to mitigate digital health harms, Digital Health empowers health practitioners, patients, and technology providers to move beyond fear of the unknown and embrace the full potential of digital health technology, paving the way for more conscientious digital technology use of the future.
