The WhatsApp India Story Sunetra Sen

Narayan, Shalini Narayanan, 2024-02-13 WhatsApp is used by over half a billion people in India today in all fields – in business, corporate and informal sectors, in government, for education and among friends, families and acquaintances. This book critically explores the social messaging app's rapid expansion in India and its growing influence and looks at whether, as a form of horizontal communication, it poses a challenge to more traditional structures of communication. The book examines WhatsApp's spread in the personal and professional lives of Indians and the myriad ways in which people in India are using the app in social and business interactions, including among people living with disabilities. Using case studies, interviews, surveys and in-depth research, it analyses key aspects of WhatsApp's massive popularity and its impact on how people communicate. It also explores its impact on the psycho-social dynamics in India, including the dissemination of fake news and politically motivated content, and the consequent need for media regulation in the country. One of the first books to analyse the pervasiveness of WhatsApp and social media apps in different areas of Indian society, this book will be of interest to scholars and students of media studies, communication studies, digital media, cultural studies, cyberculture studies, sociology and social policy and media law.

Introduction to WhatsApp Gilad James, PhD,
WhatsApp is a popular mobile application that was

founded in 2009 by Jan Koum and Brian Acton. The app allows users to send text messages and voice messages, make voice and video calls, share images, documents, user locations, and other media. In addition to personal messaging, WhatsApp also offers a range of features for businesses, including WhatsApp Business, which allows small businesses to communicate with their customers and share updates over the app. WhatsApp has grown to become one of the most widely used messaging apps in the world, with over 2 billion active users across 180 countries. WhatsApp makes use of end-to-end encryption to ensure that only the sender and recipient of a message can access its contents. The company has been praised for its commitment to user privacy, although it has also faced scrutiny over its handling of false information and its role in facilitating political unrest. Nevertheless, the app remains a vital tool for communication and connection, particularly in countries where other messaging apps are restricted or banned. Its continued popularity is a testament to the users' trust in its security and reliability.

Connected Parenting Jai Mackenzie, 2023-02-23

Changing practices and perceptions of parenthood and family life have long been the subject of intense public, political and academic attention. Recent years have seen growing interest in the role digital media and technologies can play in these shifts, yet this topic has been under-explored from a discourse analytical perspective. In response, this book's investigation of everyday parenting, family practices and digital media offers a new and innovative exploration of the relationship between parenting, family practices, and digitally mediated connection. This investigation is based on extensive digital and interview data from research with nine UK-based single and/or lesbian, gay or bisexual parents who brought children into their lives in non-traditional ways, for example through donor conception, surrogacy or adoption. Through a novel approach that combines constructivist grounded theory with mediated discourse analysis, this book examines connected family lives and practices in a way that transcends the limiting social, biological and legal structures that still dominate concepts of family in contemporary society.

Handbook of Transnational Families Around the

World Javiera Cienfuegos, Rosa Brandhorst, Deborah Fahy Bryceson, 2023-01-01 This handbook compiles the most up-to-date research on transnational families. It employs a dialogue between classical approaches and cutting-edge directions in transnational family research to identify continuities and changes in terms of socioeconomic disparities and actors, and to analyze coexistence. Further, the volume adopts a twofold global and international comparative perspective. On the one hand, it focuses on different migratory flows around the world and describes their entangled logics; on the other, it is written by an international group of contributors, with a diverse range of professional backgrounds. Their contributions are based on sound empirical research, and explore geographical regions around the world. The handbook presents different thematic perspectives on transnational families, including an analytical focus on gender, global sociodemographic inequalities, power asymmetries, and border- and mobility regimes, as well as the organization of transnational care, transnational fatherhood, ageing, family reunions and return. It also includes a variety of methodological approaches to transnational family research, ranging from ethnography, biographical research, and life-course methods, to multi-sited approaches and quantitative surveys. Investigating an emergent debate, it sheds new light on migratory fluxes, their common and specific determinants, the types of actors involved, and ways to empirically and methodologically approach them. This is a must-read reference for social

scientists interested in family research, migration, and gender studies. Chapter 7 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Research into Design for a Connected World
Amaresh Chakrabarti, 2019-01-08 This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been “Design for a Connected World”. While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

CALL for widening participation: short papers from EUROCALL 2020 Karen-Margrete

Frederiksen, Sanne Larsen, Linda Bradley, Sylvie Thouësny, 2020-12-14 Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

India Connected Ravi Agrawal, 2018-10-01 Former chief CNN India correspondent and award-winning journalist Ravi Agrawal takes readers on a journey across the Subcontinent, through its remote rural villages and its massive metropolises, seeking out the nexuses of change created by smartphones, and with them connection to the internet. As always with India, the numbers are staggering: in 2000, 20 million Indians had access to the internet; by 2017, 465 million were online, with three Indians discovering the internet every second. By 2020, India's online community is projected to exceed 700 million, and more than a billion Indians are expected to be online by 2025. In the course of a single generation, access to the internet has progressed from dial-up connections on PCs, to broadband access, wireless, and now 4G data on phones. The rise of low-cost smartphones and cheap data plans has meant the country leapfrogged the baby steps their Western counterparts took toward digital fluency. The results can be felt in every sphere of life, upending traditions and customs and challenging conventions. Nothing is untouched, from arranged marriages to social status to business start-ups, as smartphones move the entire economy from cash-based to credit-based. Access to the internet is affecting the progress of progress itself. As Agrawal shows, while they offer immediate and sometimes mind-altering access to so much for so many, smartphones create no immediate utopia in a culture still driven by poverty, a caste system, gender inequality, illiteracy, and income disparity. Internet access has provided greater opportunities to women and changed the way

in which India's many illiterate poor can interact with the world, but it has also meant that pornography has become more readily available. Under a government keen to control content, it has created tensions. And in a climate of hypernationalism, it has fomented violence and even terrorism. The influence of smartphones on the world's largest democracy is nonetheless pervasive and irreversible, and India Connected reveals both its dimensions and its implications.

Social Media in South India Shriram

Venkatraman, 2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu, *Social Media in South India* provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life. While certain class tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the

blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.
