The WhatsApp India Story Sunetra Sen

Narayan,Shalini Narayanan,2024-02-13 WhatsApp is used by over half a billion people in India today in all fields - in business, corporate and informal sectors, in government, for education and among friends, families and acquaintances. This book critically explores the social messaging app's rapid expansion in India and its growing influence and looks at whether, as a form of horizontal communication, it poses a challenge to more traditional structures of communication. The book examines WhatsApp's spread in the personal and professional lives of Indians and the myriad ways in which people in India are using the app in social and business interactions, including among people living with disabilities. Using case studies, interviews, surveys and in-depth research, it analyses key aspects of WhatsApp's massive popularity and its impact on how people

communicate. It also explores its impact on the psycho-social dynamics in India, including the dissemination of fake news and politically motivated content, and the consequent need for media regulation in the country. One of the first books to analyse the pervasiveness of WhatsApp and social media apps in different areas of Indian society, this book will be of interest to scholars and students of media studies, communication studies, digital media, cultural studies, cyberculture studies, sociology and social policy and media law.

Six Billion Shoppers Porter Erisman, 2017-09-26
An insightful, practical guide to e-commerce in emerging markets--and how to profit from their explosive boom. From China to India to Nigeria, e-commerce is entering a golden era in countries that were long left out of the e-commerce gold rush experienced in the West. If the story of the first twenty years of e-commerce's growth was set in developed markets, the story of the next twenty years will be set in emerging ones. The rise of e-commerce in emerging markets is being driven by three major trends: widespread internet adoption,

a rising middle class, and, most importantly, innovative new business models that serve the needs of local customers better than the models used by western e-commerce giants. *Six Billion Shoppers* takes readers on an exciting and colorful journey around the world to visit the next e-commerce mega markets and explore how a new e-commerce boom is opening opportunities for entrepreneurs and global brands alike. Traveling through Nigeria, China, India, Southeast Asia, and Latin America, Porter Erisman addresses e-commerce across these new markets and what it means for western brands. He argues that e-commerce in developing countries is revolutionary and will play a much larger role in emerging markets than in the West. With e-commerce in emerging markets entering a rapid period of expansion, *Six Billion Shoppers* explains how to seize the massive opportunity created by emerging market consumers and provides practical advice on how to ride this new business trend.

Trends in Data Protection and Encryption Technologies Valentin Mulder, Alain Mermoud, Vincent Lenders, Bernhard Tellenbach, 2023-07-31 This open access book reports the results of a study conducted in Switzerland in 2022 to provide an overview of the changing landscape of encryption and data protection technologies and their global usage trends. The Swiss Confederation tasked the Cyber-Defence Campus (CYD Campus) to identify the 38 most relevant encryption and data protection technologies, analyze their expected evolution until 2025, and derive implications for the military, civil society, and economy sectors. Fifty experts from academia, government, and industry have contributed to this study and provided their viewpoints on the different technologies and trends. This comprehensive collection of factsheets provides a reference for organizations and individuals that need to

elaborate coherent and efficient data protection and encryption strategies in the coming years. The 38 technologies have been sorted into five categories. First, encryption foundations represent the technologies used to create other encryption applications. Second, low-level applications represent the technologies that focus on micro functionalities. Third, high-level applications represent the technologies that focus on more abstract and macro functionalities. Fourth, data protection represents the technologies used to protect data without encrypting these data. Finally, use cases represent concrete ways the different technologies can be used together to create a working solution. The book serves as a guide for decision-making within administrations, government organizations, and industry. It will also be interesting for the tech-savvy board member or engineers looking to get an entry point into data protection topics. Last not least, the book will also be a valuable reading for anyone interested in data protection and encryption.

And there's precious little we can do to stop them. this book documents the dramatic increase in hacking and data mining incidents in recent years. The articles within it explore how these incidents affect world events, such as the United Kingdom's Brexit vote and the 2016 U.S. presidential election. The Internet as a Technology-Based Ecosystem

Nigel Walton, 2017-05-04 This book examines and critiques classical approaches to strategic analysis, whilst exploring alternative methods which utilise ecosystem and platform concepts, as well as chaos and complexity theories. The innovative study provides a critique of the neoclassical Newtonian school of strategy, and proves it to be largely inappropriate as a decision-making methodology in today's internet-based market. By developing a new biological

hydrothermal vent model in which analogical comparisons are made with the Information Communication Technology (ICT) sector, the chapters challenge existing paradigms of competitive advantage and analyse the extent to which the Internet can be considered to be an ecosystem in its own right. The Internet as a Technology-Based Eco-System offers a range of alternative models and analytical frameworks for the analysis of internet-based technology companies in the twenty-first century, creating a valuable tool for students and academics undertaking research in strategy, technology and electronic engineering.

Technology Strategy Nigel Walton, Neil Pyper, 2019-09-21 This dynamic and beautifully written textbook takes a modern and innovative approach to strategy by placing technology at its heart, bridging the gap between general strategy texts and specialist technology and innovation literature. It addresses the challenges and opportunities presented to organisations by disruptive technological change and takes into account the navigation of uncertain business environments. In addition to examining more established concepts and theories, the text also explores new disruptive business models and non-traditional approaches to strategy development such as effectuation, the Business Model Canvas and prediction logic. This comprehensive and critical approach is supported by a rich assortment of practical examples and cases drawn from different sectors and a range of exciting companies from all over the world, helping students and practitioners to apply theory to practice. This will be an essential core text for modules on technology strategy and innovation at upper undergraduate, postgraduate and MBA levels, and invaluable reading for senior executives and aspiring managers who seek to understand how to

implement strategy in a volatile disruptive environment.

Sand & Sea Ann D'Silva, 2019-01-07 People don't believe in the unseen, anymore, Only in things they can see for sure. They say love and soulmates exist no more, Yet they breathe an unseen air to live for sure. Not every story begins in the here and now. Some transit through time never ending. If time were to cease, then some things would live forever... It began in the garden beneath which rivers flow, the place where the Sand and the Sea were born before creation -- the first soulmates, the two halves of one whole, the two parts of the eternity sign. A part Koli, East Indian Catholic, Hannah lives in Mumbai where the Sea always watches over her. Yet her dreams are haunted by a voice that calls to her through the breeze... True love walks beside her in another life, yet she is unable to find a way back in time. Riddled with disappointment and distressing heartbreak, she is hopelessly drawn to the path the Universe has laid before her feet. Drawn to Istanbul, she finds part of the puzzle in the Ezan of the Blue Mosque. Could the man from her dreams be real? What could an Indian woman and a Turkish Imam have in common? Will Hannah find what she searches for? Only those who believe will pass the test. Everyone has their own journey; some get on to the path and to some, the path comes calling. This is the tale of the Sand and the Sea, Hanging on the edge of wait, watch and let's see.

Hegemony, Security Infrastructures and the Politics of Crime Gideon van Riet, 2021-11-01 This book examines the politics of crime and the response to it in Potchefstroom, a small settler colonial city in South Africa. It draws on the city's everyday practices and experiences to offer local bottom-up insights into security beyond the state. The book provides a comprehensive understanding of security beyond the state and how

security workers and residents experience and perceive their own security practices, their daily interactions with other security providers which influences power dynamics between those who express fear through various platforms and those deemed potential criminals. It aids in re-conceptualising violence and security governance in South Africa with a view to analysing the processes of crime prevention and management, the changing nature of public and private spaces and how these spaces interact with state and local authorities. In a rigorous exploration of the ways to tackle the complex problem of crime, the book critiques an overreliance on security infrastructures such as social media, gated barriers, neighbourhood residents' associations and private security companies. It also looks at how crime is treated as an individual as opposed to a societal problem. The book addresses the urgent need for collaboration across these fault lines to promote a more inclusive security in a broader fragmented social and political context. With a novel analytical approach based on the twin optics of infrastructure and post-structural hegemony, the book will be relevant to scholars and students of South African politics and critical security studies, as well as international audience interested in crime and private security.

Whatsapp Mastery for Grandpas Mateen

Soudagar, 2015-12-07 I have been using WhatsApp for a long time to communicate with my friends. WhatsApp began in 2009 when a few phone apps were competing to gain a significant share of the user base. Back then, the concept was still rather new to me. I never thought it would reach as many users as it has now. Earlier this year, in March 2015, my mother travelled to India and was able to meet with her family. Many of them were avid users of WhatsApp and convinced Mom to get it. After she had got back from India, she convinced my dad to get it too. Now they send messages, videos, and text to everyone anywhere - and they've become more adept at using it than I am! The most beautiful thing about WhatsApp is that it has not only simplified phone communication between users but also made things so simple that our older generation will find it easy to understand and

use. These days, most apps and software are tailored to younger folk who have been using technology all their lives. It's great that some newer companies like WhatsApp are tailoring their interface and features for all ages. This eBook covers everything you need to know and more about WhatsApp. It will get you up to speed with what everyone else knows about WhatsApp and get you using it just as well as they do. Plus, it will have you knowing things about WhatsApp that not many other people know. This book is written to take you from knowing nothing about WhatsApp to knowing everything and more. You can take what you want and apply it accordingly. WhatsApp and most other technologies are best learned in actual use, so don't just read this book and do nothing. After you read this book, or even as you're reading it, apply what you're learning with your phone in hand. I hope you thoroughly enjoy and recommend this book to anyone else you feel needs it.

Entrepreneurship in China Qihai Huang, Xueyuan Liu, Jun Li, 2021-09-27 China has grown to become the world's second largest economy in merely three decades and entrepreneurship has been identified as a key driver of China's fast growth. Since the mid-2000s, the country has transitioned from a predominance of necessity-based entrepreneurship to that of an opportunity-based entrepreneurship. The China Surveys of Global Entrepreneurship Monitor in the last fifteen years consistently indicate the country's high rate of entrepreneurship. Furthermore, more Chinese entrepreneurs have started setting their sights on business internationalisation. Against this backdrop of a thriving entrepreneurial economy, institutions and business environment are, however, not often viewed as friendly to private entrepreneurs and businesses. The re-emergence of entrepreneurship suggests a history of struggle to overcome opposition and obstruction, to survive

and grow, including rule ambiguities, rent-seeking, subsidies, and institutional constraints, such as industrial barriers, difficulties in getting access to critical resources, and weak property rights. China has also been experiencing economic slowdown, increase in inequality and worsening environmental problems since the turn of the century, clearly indicating that the rapid development of entrepreneurship in China presents a lot of puzzling questions. Entrepreneurship in China attempts to deal with these unanswered queries as well as provide an insightful and updated understanding of entrepreneurship development in China. The chapters in this book were originally published as a special issue of the journal, Entrepreneurship & Regional Development.
